MAN SHOT, ROBBED, ON THE HIGHWAY With a bullet wound in his left arm, Joe Belleger, transient, appeared at the police station Monday morning, seeking aid of officers in apprehending a man named Ted, who, he declared, shot him on the Columbia River highway about 4.30 and robbed him of \$48. "Late Sunday night at a filling station I bought gasoline," said Belleger, "and the man saw my money, mostly small bills. Just this side of Wyeth we had a blowout. After he had replaced the tire he suddenly struck me with a wrench, the blow landing on my neck instead of the back of my head. Partially stunned I turned to protect myself when the man drew his pistol and shot me. I fell forward and laid still as if dead, and he evidently thought he had killed me. He reached into my coat pocket, taking my pocketbook, and then jumped into his car speeding off to the east." Belleger described his assailant as redheaded, about five feet tall, well built, with high cheek bones. He estimated his age at 22 years. SUGGESTION ON THE TAX QUESTION There is now before congress an amendment to the federal constitution which provides for taxing the income from future issues of state and municipal bonds, by the federal government. It also provides that states may tax the incomes from future issues of government bonds that are owned within their borders. In plain English this means that the income derived from tax-exempt bonds, instead of being tax-free as in the past, would hereafter be subject to taxation in the same manner as income earned in any manner whatsoever. Commenting on necessity for doing away with tax-exempt bonds in order to encourage the investment and loaning of capital in productive enterprise and agriculture, E. D. Chassel, secretary of the Farm Mortgage Bankers Association of America, says: "Wealthy individuals subject to a federal income tax of 50 per cent to 58 per cent are buying 5 per cent, 5½ per cent and 6 per cent tax-free securities now, at a par; or at a very slight advance. A 5 per cent security, tax-exempt, in the possession of a person receiving an income of a million dollars a year yields him as much net income as a taxable security paying an annual interest rate of 11 per cent. "For the last five years great difficulty has been experienced in obtaining capital for railroads, for industrial or development purposes, for the reason that the wealthy owners of such capital are laying their wealth away in tax-free investments. That condition will grow worse and worse as the years go by and each year the demand for government aid will become stronger and stronger as capital is lured away into tax-free securities. "More than a billion dollars is now diverted every year from agriculture and business to tax-free bonds. This is a knife that cuts both ways. It deprives industry of the needed capital and it shifts heavier taxes upon agriculture and business. If that leak is stopped by the passage of the amendment, agriculture and business will thrive as never before.—Pacific Manufacturer.
