> Spraying of Apples (By Leroy Childs)

Due to the fact that apple scab has not been a serious factor in the valhave not been particularly the recommendation of the early scab prays. Perhaps we will come grief for not making this reco tion, as apple scab can only be con-trolled by rather consistently follow-ing a definite spray program throughout the spring. In other words in not urging the application of lime sulphur in the delayed dormant, we are taking a chance. Growers, to insure freedon from apple scab, should apply the de-layed dormant, pink and calyx appli-cations of lime sulphur. There is no turned from Eugene, where she visited the family of her daughter, Mrs. G. P. will develop, and for this reason it is formed by Dr. V. R. Abraham, with the family of her daughter, Mrs. G.
