BERRY GROWERS TO MEET FRIDAY NIGHT

Chamber of Commerce tomorrow night to discuss plans for handling this season's berry markets. A letter from Manager Steele is as follows:

"A committee, appointed from your board, after going into all details, recommends that berries be handled on the same pooling basis as in previous years. It recommends that a sufficient number of growers pack their berries in order to hold our present markets; and, that at any time the Association sees the necessity for curtailing shipments to prevent market gluts, upon proper notification the growers will pack a certain percentage of their previous day's pick and send the balance to the cannery. The cannery has agreed to pay the field run price on such berries.

"All growers are urged to be present at this meeting in order to reach a decision, if possible, on what method will be pursued with this season's crop."

Mohair Furniture Covering Ofter Confused With Hair Cloth

Mohair as used in upholstery is a eep nepped fabric of plush woven rom Angora goat hair and does not esemble in any way the old fashione haircloth prevalent in pariors of the past. Who does not recall trying to stick on the slick and shiny seat of a black haircloth sofa or parlor chair?

Mohair plush has been used for great many years in Pullman cars, hotel lobbies and other public places where it had to stand the most severe wear and abuse. Now it is woven in most beautiful shades of taupe, beaver, mouse, walnut and many other colors both figured and plain, lending itself

to the finest effects in color schemes.
