Enroll Monday at Pythian Building, Room 25

STAGE AND SCREEN

The Baird Comedians, who began a four-day repertory, changing each evening at the Riatio theatre Wednesday night, will close Saturday night.

The property man of the William de Mille production, "The Fast Set," at the Lasky studio, was run ragged when ZaSu Pitts began to "roll her own."

The actress, who is featured in the production with Betty Compton, Adolphe Menjou and Elliott Dexter, had never smoked and looked forward in dismay to that scene in the film in which she was to make the first attempt.

Dismay turned to consternation when she discovered that she also had to "roll her own," an accomplishment which not all habitual smokers have acquired.

For more than a week Miss Pitts used up great quantities of tobacco and cigarette paper, covering the floor about her chair for many yards with "mis-rolls."

Finally she announced with great pride that she had discovered the secret, and offered to "roll 'em" for all the members of the de Mille unit.

"The Fast Set" was written by Clara Beranger from Frederick Lonsdale's stage success, "Spring Clean," and is predicted to be one of the season's big screen hits.

Local film fans will be able to judge for themselves as the picture is coming to the Riatio theatre next Sunday.

A cast chosen from the ranks of the foremost screen players in the motion picture capital plays in support of Pola Negri in her latest Paramount production, "East of Suez," Raoul Walsh production, adapted by Sada Cowan from the Broadway stage play by Somerset Maugham, which will be the feature at the Riatio theatre Monday and Tuesday.

Edmund Lowe is opposite the star. He has a featured role along with Rockliffe Fellowes and Noah Beery. Lowe has been starred in several recent successes and will be remembered for his work in support of Betty Compton in "The White Flower."

Sniffly Colds Stopped in 5 Hours

The wonderful new prescription of a Cleveland specialist—known as Dr. Platt's Rinex Prescription—is guaranteed to stop the most annoying sniffly head cold in 5 hours or it costs you nothing.

Rinex capsules act instantly to purify the blood, clear up congestion and build up the entire system. They destroy the germs and stop the flow of mucus from the nose. So dizziness, headache and chilliness vanish like magic. Nose and eyes stop running. Often in 10 minutes you forget you ever had a cold!

Get Rinex today and just try it! Money back instantly if not relieved in 5 hours. No narcotics or harmful drugs. Be sure to get the genuine Dr. Platt's Rinex Prescription in the air-tight glass flask. Excellent, too, for Catarrh and Asthma.

Free Trial Offer

Just now, through a special introductory arrangement, you can obtain a trial treatment entirely FREE! Simply go to any of the drug stores named below and ask for a trial package of RINEX. No obligation at all on your part. But be sure to ask for your free treatment within the next three days—this offer is limited. It may be obtained in this city at

KRESSE DRUG CO.

HORSES FOR SALE

50 head of fine animals, ranging in weight from 1000 to 1700 pounds.

Good for orcharding, farm work and logging. Priced to sell. Write to

O. D. Martin, Sunset Garage 3rd and Jefferson St., The Bldg. - Or Phone 232 -

recommendations from former superintendents and principals.

Junior High Notes (Ray Stepping)

The Junior high first team tied with White Salmon and won last week 18 to 8, while in the activities beat a scrub team 14 to 12. The Junior high team will play Mosier and the second team will vie with Frankton. The last game was won by Frankton so Junior high is out for revenge. The team will be staged Friday afternoon after school at the high school auditorium.

At an assembly held Monday it was voted to retain the present student body officers. Arthur Cannon gave a report on the treasury funds. A paper drive is to be launched to help pay for the basketball suits. There will be a race between rooms to increase interest. If you have any paper you want to get rid of send it this way; we need it. Football letters were given to "Gus" Osborn, "Nibo" Olsen, Robert Goin, Ray Hathorne, "Bub" Sagers, Max Calandra, Glen Chrisman, Russell Acheson and Ronald Ingalls. Films were shown to the pupils on Yellowstone National Park, "America's scenic wonderland." Russell Acheson told about his visit there, which all enjoyed.

INSPECTION WORK SHOWS HEAVY GAIN

The magnitude of the Hood River valley apple crop was reflected the past shipping season in the activities of the office of County Fruit Inspector Kocken. In his financial statement for the past year, Mr. Kocken announced Monday that six deputies had been required the past season in giving federal inspection to carloads of apples where desired. In 1922, the first year federal inspection was in charge of the fruit inspector's office, no deputies were needed. Only two men were required for the work of inspecting carloads of the 1923 apple crop. Where fruit was shipped to eastern storage the federal inspection was withheld until its removal.

A fee of \$5.50 per car is charged for inspection. A dollar goes to the federal government. The state board of horticulture and 50 cents is appropriated for office administration. The sum of \$3.50 is applied toward paying the salaries of deputies. Because of the numerous orchard packs and widely separated shipping stations, the fees were sufficient to pay the salaries of deputies. Shippers, however, made up the deficiency.

The summary of Mr. Kocken's report was as follows:

Receipts—Hood River county appropriation, year 1924, \$2900; fees collected from liens, \$133; Oregon State Board of Horticulture, car inspection fees, \$3472.65; shipper's guarantee on inspectors' pay to date, \$85.88; total, \$6190.93.

Expenditures—Inspector's salary, \$1998.00; travel and office expenses, \$1014.55; six deputies, salary and expenses, \$2651.90; secretary's salary, \$180; secretary's expenses, \$181.45; office rent, \$20; total, \$6046.50.

Balance—\$1144.43.

H. R. CREAMERY NOTES

At a meeting in Portland Monday of the officers and directors of several creameries, final steps were taken to incorporate a central organization to be known as the North Pacific Co-operative Creameries for the purpose of cream grading and standardization of butter grades. Six creameries have so far joined the organization and others are expected to join in the near future. Those joining are: Capital City Creamery, Salem; Lower Columbia Co-operative Dairy Association, Astoria; Eugene Farmers Co-operative Creamery; St. Paul Creamery; Hood River Creamery; Ravon Dairy Co., Portland. The Mt. Angel Creamery will pass on at their stockholders' meeting February 9, and is expected to join in the movement as it was stated in the Portland meeting that its board of directors is unanimously in favor of the plan. It is also hoped by those interested in the movement that the creamery at Skamokawa, Wash., and the Monmouth creamery and possibly others will join very soon. The O. A. C. creamery will also work in conjunction with the association.

The first move will be to employ the services of an inspector and arrangements are being made to secure Chris Johnson, at present dairy manufacturing specialist, U. S. Department of Agriculture, Salt Lake, Utah, who will devote his entire time to assisting the different creameries in the association with their cream grading and butter standardization program.

The organization of the creameries has been developed by the marketing committee of the Portland Chamber of Commerce, marketing department of Oregon Agricultural College, working in conjunction with the office of J. D. Mickle, state dairy and food commissioner, and the various creameries interested.

CHURCHES

English Lutheran Church

Regular services at 11 a. m. The Sunday school meets at 10:30 a. m. P. Hilgendorf.

Seventh Day Adventist Church

Sabbath school Saturday 10 a. m. Preaching service 11:15 a. m. Prayer meeting, Wednesday 7:45 p. m. All are welcome.

St. Mary's Catholic Church

First Mass, 8 a. m. and second Mass at 10:30 a. m. Sunday morning. Evening devotions at 7:30 o'clock tomorrow Friday, evening and Sunday evening. Tel. 3132. Father Joe Smith, pastor.

Missionary Alliance

Prayer meeting Wednesday at 7:30 p. m. Do you want a revival at Hood River? Then ask God for it.

C. R. Delepine, Pastor.

Asbury Methodist Church

Don't forget the mother and daughter banquet Friday evening at 6:30 o'clock. Sunday the school meets at 10 a. m. Morning worship at 11 o'clock. The pastor will begin a series of short sermons on the history and place of the Methodist Episcopal church. He will speak for 15 minutes at the close of the League devotional service in the League room. There will be no other evening service than this. The public is cordially invited to attend all these services. Prayer meeting is held every Thursday evening at 7:30. W. N. Byars, Pastor.

Scotts Lake Local Apples

The following letter, written to the Oregonian last week, shows the popularity of Hood River apples in Scotland:

"The following is an extract from a letter received from a person living in Aberdeen, Scotland, which may interest apple growers and others.

"Do you use many apples? To my taste no fruit is as good as apples. They are trying to get people to use more here. There is nothing better for health. My doctor told me to buy them by the box, which I am now doing. They are the Newtown Pippin kind, and they keep all through the winter. They come from Hood River, Oregon, so they must be good."

"The granite city of Aberdeen has a population of about 200,000."

Bridge Company Seeks Land

An action has been filed in the superior court of Klickitat county by the Oregon-Washington Bridge company against the state of Washington to condemn and appropriate submerged land in the Columbia river below low-water line, to maintain necessary bridge piers of the Interstate bridge between Hood River and White Salmon. According to an order entered, on stipulation, the state will receive \$25 and a decree of condemnation and appropriation will be made.

Cherries in Bloom

Wasco county cherries are in bloom, says The Dalles Chronicle. The cherries are not on the trees, however, but in a vase in the home of Dr. G. E. Sanders. Dr. Sanders clipped a few twigs from trees in his orchard immediately after the below-zero weather, to see if the trees had been damaged. He placed the sprigs in water, in the house, and they have developed into full bloom. This indicates that the cherry trees were not damaged by the cold, Dr. Sanders believes.

Oak Grove Folk Want Road

Residents of the Oak Grove district are urging that a proposed trunk line highway from Dee be carried across Hood river near Bloucher station in order to bring the orchardists of the Dee flat section into town over the West Side. They cite that such a route will eliminate the heavy adverse grade at Davidson hill.

Longer Years of Service

No agricultural machine made is put to such trying tests as the Sprayer. First there are weeks of idleness when it is menaced by rust. Then comes the terrific grind and high pressure, hour after hour and day after day, when sand, dust and chemicals may work viciously at unprotected bearings. But look, Hardie is now providing a

DUST-PROOF HOOD

which gives the utmost in protection. Hardie Sprayers have always enjoyed the reputation for unusually long life through perfect alignment, micrometer fit and protective housings. But now we have the ultimate—the hood—made possible by the Hardie cooling system. A non-chokable circulating pump connected with pipe coils immersed in spray tank keeps up a continuous circulation of cool water through engine—a simple yet perfect cooling system.

Other Exclusive Hardie Features Will Also Interest You:

Light Weight Cushman Engines—weigh less than 50 lbs. per horse power—one of the reasons why Hardie Sprayers give the greatest power per 100 lbs. of weight. An automotive type engine with throttle governor, float feed carburetor, gravity gas feed, counter-balanced crank shaft and force feed oiling system. Has ample power for highest spraying pressure.

Pumps That Eliminate 90% Wear—Plungers have two soft packings to guide them; all wear comes on these; replaceable in two minutes. No crosshead or guide. Porcelain-lined cylinders. Bronze bearings. Extra heavy crank shafts. Machine-cut gears. Light running, yet gives high pressure and capacity. Has accurate pressure regulator.

Underlung Autoplex Trucks—have low center of gravity, as the load is carried but 12 inches from the ground. Insures easy traction, through use of large wheels, broad tires and wide track. Safe on side hills. Pivoted wheels (as on autos) prevents pole-whipping and allow turning in 20-ft. circle. Rocking bolster relieves strain on frame on rough ground.

Steel Frame—lightest and strongest ever used under a sprayer.

Suction Setting Chamber—stops the rapid movement in suction line long enough for sand and heavy foreign matter to collect and settle before the spray liquid passes to pump.

Porcelain-Lined Cylinders—made from semi-steel castings, machined to a gun-barrel finish. Coated by an improved process with very hard porcelain. Bore is perfectly true and hard as glass.

Air Cleaner—has proven 99% efficient in dust separation. Cleans automatically by centrifugal action. Treats 25% more air than the engine uses. Small, compact. Means longer life for engine.

New Hardie Gun—gives a wider range than any gun heretofore and gives perfectly even distribution. Makes as fine a mist as the finest nozzle and throws it a greater distance than ever before accomplished. Completely controlled by less than a quarter turn of handle.

Hardie Dealers Are Plentiful in every fruit section. Complete stocks of parts are carried on hand. Service seldom needed, but SERVICE when you do need it.
