Westerners know what a tire should be,

ONE glimpse of California, or Oregon, or Washington, or any Western state proves that the West is the motor ground of America!

California, for instance, leads New York and every other state in registration of passenger automobiles!

A group of successful Akron tire engineers caught a vision of the opportunities in the West. Its vast resources and possibilities for growth appealed to them.

Digging into the facts, they learned that 30 per cent of the nation's tires are used west of the Mississippi. And only 3 per cent were made there!

They transferred their skill and resources to the West.

These C.T.C. Cord tires today are regarded as one of the three or four really fine tires in America. Nine western states give it a remarkable sale. Further East its good name is rapidly spreading.

We shall be glad to give you expert information about your tires, and— if you need them—put on C.T.C.s—either balloons, semi-balloons, heavy-duty cords or oversize cords!

"Quality will never be sacrificed to meet a price!"

When John E. Cook and Chris Ball, of Yakima, Wash., arrived here Thursday to lay claim to an automobile recently found loaded with a quantity of assorted liquor, they were held by District Attorney Baker, who was awaiting word from federal prohibition authorities in Portland. The car, occupied by four young men, ran into the rear of a machine driven by Mrs. E. M. Reed, of Portland, Sunday, May 17. The latter notified city authorities who found the car abandoned. An overcoat left in the machine carried a Washington driver's license issued to Cook, who the evening following the accident telephoned from Portland that his car had been stolen in that city.

District Attorney Baker, however, declared that, investigation disclosed that Cook and Ball, the former owner of the car, left Yakima about 1 a. m. Sunday. He claimed that he has evidence that both men were in the car at the time of the accident.

SUSTAINED QUALITY

MOTORMATES

Only when the quality of gasoline and motor oil is rigidly sustained, can you be certain of efficient and economical motor operation. The MOTORMATES—Associated Gasoline and Cyclo Motor Oil—are sustained quality products on which you can always rely.

It takes a sustained quality gasoline to give you easy starting, responsive power, long mileage and complete combustion. Associated Gasoline gives you all of these requisites in perfect balance and has always done it.

Lubricate with Cyclo Motor Oil—made by advanced refining methods. It does not break down nor thin out rapidly under engine heat. It maintains an oil tight piston seal. Its use prevents many serious motor troubles.
