Why Gum-Dipping is so Important to Car Owners

GUM-DIPPING—the Firestone extra process builds into tires extra quality by impregnating and insulating every fiber of every cord with rubber.

This exclusive method is carried out in special Gum-Dipping plants, after which the cords are put through the usual calendaring process.

By this method, added strength and flexibility are imparted to the cords, making Gum-Dipped Balloons most serviceable and enduring over rough roads.

J. A. Willis Offers Reward

J. A. Willis, truck gardener, who lives alone near the west edge of the city on Railroad avenue, reported Tuesday that microbeas raided his home and gardens Monday night. He expressed the belief that some kind of drug was used on him as he slept. He found his home in wild disorder, and a huge pumpkin had been brought from his garden and placed just inside the door of his cottage.

"I was up until 11 o'clock, listening in the radio," said Mr. Willis. "And whoever gave me the call came after that. The visitors dismantled my radio, taking part of it away. Everything was strewn around the building. I will give \$100 reward for the apprehension of those who entered my house. I haven't an enemy that I know of, but I am going to be prepared in case my house is broken into again."

Card of Thanks

We wish to thank our friends and neighbors for their kind aid and expressions of sympathy during our recent bereavement during the time of the last illness and death of T. J. Jarvis. Mr. and Mrs. E. Phelps
