

# For winter driving— change your oil

IN winter your automobile requires a free-flowing oil, if it is to start quickly and be free from dangerous friction. All oils do not meet this requirement, but here again Zerolene proves one of its superiorities — it flows freely at low temperatures.

To determine the correct body of Zerolene for the winter lubrication of your car, consult the Zerolene Correct Lubrication Chart — at Standard Oil Service Stations and at dealers.
