TOM SCOTT SAYS:

CHEVROLET a trustworthy car.

-That when the United States Government chooses Chevrolet Cars for use on the Mexican Border, to run down smugglers and bootleggers. Chevrolets must be right.

--- The following account from the Portland Oregonian states: "That government inspectors have found their transportation needs demand a car of rigid construction, free from the necessity of frequent repairs, and, in the South, with ample cooling facilities to withstand the desert heat."

--- They say further, "To pursue these lawbreakers with a good prospect of landing the quarry, the inspectors have found that they must not only have good, speedy cars, but vehicles that will stand hammering and pounding over gullies and dry washes and will not sink too deep in the sand. Experience has shown them, that in the Chevrolet they have a car needed for their purpose.

---Now what more can be said?

-All we ask, is that before you buy, let us demonstrate this new, modern, and strictly up-to-date car. You will be surprised, and as Marmon says, "New pleasures await you."

-We learn from the Oregonian that "Carl Akely, the explorer, is using Chevrolet cars and trucks on his present trip to the African jungles in search of animal life for the American Museum of Natural History, New York City.

-The red blooded American, young or old, wants a modern car - Chevrolet will meet your approval.
