STEVENSON

(From Skamania County Pioneer)

W. R. Price is setting out a filbert orchard of 500 trees. Carson valley is daily becoming more progressive and more agricultural.

During the past week the activities of spring have been general all over the county. The ranchers have been able to do a large amount of work and have been making good use of the dry weather. An increased acreage in all lines will be planted is the encouraging report from every district in the county. Spraying is well along in the Underwood section, but the indications point, the orchardists say, to a light apple crop this season as two heavy crops do not follow one another. On the other hand prunes promise to be a large crop if the weather man does not shoot in an order for late crops. Grain and root crops in the western part of the county will show quite an increased planting over last year, ranchers in that section say. Oats and corn will be the principal crops with a normal planting of potatoes.
