No. 21

FOOD-CLOTHING-SHELTER

ESSENTIALS we must have; luxuries we all desire. Isn't it odd that two families of equal size and equal income will often differ quite materially in their enjoyment of luxuries.

It all depends on how the income is handled. Careful householders budget their expenditures, allow first for saving for future needs and accumulation of a surplus out of which good taste may be gratified and the luxuries of life obtained.

Let this bank be your depository where the surplus for future essentials and luxuries may pile up, safe from loss or theft and from temptation to spend unnecessarily.

True-To-Name Nursery

H. S. GALLIGAN, Proprietor
Hood River, Oregon

A vigorous healthy stock of apple, pear, cherry, peach and apricot trees, grown on virgin soil. All pear and apple trees are grown on the best type of French root; the cherry on Black Mazzard roots—these are without doubt the best type of root stock for this locality. So we are pleased to offer at this time a fine lot of trees that are grown right together with the benefit of our 27 years of practical experience growing trees in Hood River. We also offer a liberal discount on quantity orders and for cash. Bear in mind that every tree we offer is guaranteed absolutely true-to-name and of the best producing type. Your inspection and patronage will be appreciated. Phone 4796.

Schouboe On Field Staff

Clark Schouboe, former scout executive for the mid-Columbia-Deschutes area, has become a member of the field staff of the national council, Boy Scouts of America, according to The Dalles Chronicle. This staff is commonly known as "The Flying Squadron," and is an organization of service men who travel over the United States doing special scout work in sections where it is found necessary. Mr. Schouboe's first assignment is expected to be in Mississippi, in connection with the flood rehabilitation work, following the recent disasters. Later assignments will probably take him to Louisiana

and Wisconsin, he said, on leaving The Dalles for the middle west last week.

Indian Summer Again

The mid-Columbia is experiencing a recurrence of Indian summer. With bright sunshine prevailing the temperature reached 75 here Tuesday. Nights of lower levels have remained mild and no killing frosts have occurred. The frosts of higher elevations, however, have given foliage of shrubbery such coloring that the forests are fairly aflame, and the appeal of the woodlands and good weather have stimulated October motor traffic to record proportions.

Why We Do It

When your DOCTOR hands you that little SLIP of paper all filled with MEANINGLESS marks and figures and SYMBOLS, (meaningless to you that is) it is a definite ORDER to be filled in a VERY DEFINITE way and permits of NO variation or SUBSTITUTION. Every DRUGGIST is required by law to go to SCHOOL, and get himself all plastered over with DIPLOMAS and then pass a rigid EXAMINATION before he is PERMITTED to monkey with one of THOSE things. That is for YOUR protection. We have two registered PHARMACISTS here at our store and EVERY prescription is DOUBLE CHECKED to INSURE its accuracy.

MORAL: We are not in business for our health but for yours.

NEW VICTOR RECORDS EVERY FRIDAY

Those Mythical Millions

Last week we said that if Columbus had, in 1492, begun saving ten cents a day and the habit had been continued by a trustee or successor down to date, the accumulation at 3% would now amount to the tremendous sum of over THREE HUNDRED MILLION DOLLARS.

We know, of course, that no one wants to save money for some one else to spend four hundred years hence, but the figures are interesting.

1492	\$ 0,000.00	1552	\$5,911.00
1502	420.00	1562	8,800.00
1512	980.00	1572	11,485.00
1522	1,725.00	1582	15,732.00
1532	2,717.00	1592	21,995.00
1542	4,044.00		

In the first hundred years, that tiny but steady dime-a-day at 3% grew to \$21,395.

You may still wonder how it got to be **three hundred millions**, so we'll show you the second hundred years next week.

CANKER EXPERT IS ASSIGNED

CONGRESSIONAL DELEGATION ACTIVE

Representative Sinnott, Here This Week, Tells of Securing Pathologist to Aid in Canker Control

The co-operation of all local apple shippers and their insistence, coupled with the excellent team work of members of the Oregon congressional delegation has resulted in securing the assignment here of an expert plant pathologist to study perennial canker, according to Representative N. J. Sinnott, here from The Dalles to confer with fruit men before leaving the latter part of this week for Washington.

Leroy Childs, superintendent of the Hood River experiment station, and representatives of fruit shipping concerns and grower's organizations took up the matter of securing an expert with Representative Sinnott last year. The fruit interests enlisted the aid of United States Senator McNary. Through the activities of Mr. Sinnott and McNary, W. S. Ballard, plant pathologist of Fresno, Calif., was sent here by the bureau of plant pathology of the United States department of agriculture to study the canker situation and report. He spent more than a week here and forwarded an exhaustive report to the bureau. The report, however, fell into the hands of the assistant secretary of agriculture and did not reach Secretary Jardine. The assistant secretary wired to those interested in the matter that no funds were available for an appointment of a pathologist.

Representative Sinnott spent some time here this summer and conducted an independent investigation. He secured a comprehensive lot of data on the situation from Mr. Childs. Mr. Sinnott, while attending the Pendleton Round-Up saw United States Senator Steiwer just as the latter was leaving for Washington. Mr. Sinnott informed Mr. Steiwer of the canker situation and advised him that he would send on to the capital the report of Mr. Childs. He advised Mr. Steiwer to carry this report direct to Secretary Jardine. Mr. Sinnott said he knew that funds could be secured to carry on the emergency work.

After Mr. Sinnott had returned to his home at The Dalles and just as he was leaving for some other part of eastern Oregon he was approached by R. J. McMane, president of the Apple Grower's Association, and Truman Butler, local banker, who urged that he get busy and lend further assistance in securing the appointment of a pathologist. Mr. Sinnott informed the local men that Senator McNary was chairman of the committee that provided funds for the work desired here, and suggested that they again get in touch with him. They reached Senator McNary and the latter got in communication with Secretary Jardine while Senator Steiwer was here with him in Washington. With Mr. Steiwer present in Washington, armed with alarming facts concerning the perennial canker, and the other two members of the delegation firing the requests of their constituents from here, the United States department of agriculture was made to realize the seriousness of the situation. Mr. Sinnott says, and the petitioned relief was granted.

Mr. Sinnott has received word that a competent pathologist will be assigned to permanent work here as soon as a qualified man can be located. The same information was conveyed to Truman Butler in a telegram from Senator McNary.

HOWARD CLOE WINS AIRPLANE CONTEST

Howard Cloe, son of Mr. and Mrs. E. T. Cloe, was adjudged winner Saturday night of the airplane contest staged here by E. Steele, member of the Rotary club, who is active in boys' work. Lieutenant A. W. Davis, one of the judges, complimented the youth on his knowledge of aeronautics. The stunt model plane showed that young Cloe knew the technique of airplane construction.

Other youths who won awards in the airplane model contest were: Melvin Linwood, William Gallaway, Vincent Orcutt, Roderick Finney, Robert Markley, Lawrence Kincaid and Charles Abbott.

Great interest was shown by youngsters in all parts of the valley. Mr. Steele, in a talk to the Rotary club last Thursday, said that he had been called by a number of mothers, who told him that his airplane contest had aided them in keeping their children occupied at home during the ban placed as a result of the infantile paralysis alarm.

The plane was exhibited last Saturday and Monday at the Economy market. They attracted the attention of hundreds.

GOVERNOR MANN VISITS ROTARIANS

Henry Manny, of Seattle, Governor of District No. 1 Rotary International, who Monday paid an official visit to the local club, declared that the sixth object of the service club, which proposes the encouragement and fostering of peace and international good will through the international expression of leading professional and business men, will go further in influencing international relations than the activities of diplomats.

With the world map hanging from the wall of the dining room of the Waukena, where Mr. Manny was the chief speaker at a luncheon, coloring of various countries was given to show where 2700 Rotary clubs are now instituted in 42 different nations. Rotary international now has 130,000 members.

These members, representatives and leaders of their various businesses are receiving constantly the same literature. They are imbued by the same ideals of service to mankind, "an unselfishness," said Mr. Manny, "and you cannot tell me that they are not going to bring about a better feeling of good will."

Mr. Manny characterized Rotary

ideals as serious, tempered by the joy its members gain from their songs at the weekly luncheons and the good fellowship entered at such gatherings.

Mr. Manny visited the Hood River club the first time last May on the night the charter was formally presented. He cited that the hood that Rotary takes on men might have been gained from the fact that representatives from 12 other clubs were here at the Columbia George hotel that night to greet the new club members.

Rotary, Mr. Manny declared, offers an opportunity to build up a fellowship of diversified interests. It supplies the medium for bringing together different types of business and professional folk. The true Rotarian, he declared, is a member not just for the short luncheon period each week; he engages constantly in an effort to render a service to all the business world.

Mr. Manny gave a brief history of Rotary; how it was founded in 1905 in Chicago by Paul Harris, a young attorney. Originally, the aim of the club was more or less selfish, for the purpose of advancing the business interests of the individual member. A change was launched in 1910 with the advancement of the idea of service and unselfishness, a bettering of business ethics.

The second club was organized in 1908 in San Francisco, and the third in Oakland, Seattle had the fourth club. Out of the first 16 clubs, the Pacific Coast had eight. Thus, Mr. Manny cited, the great western country has had a great deal to do with Rotary.

Mr. Manny told of the Ketchikan, Alaska, Rotary Club, the only one in the great northern territory.

"That club," said Mr. Manny, "is an example of what a Rotary club should be. Without any club action of its own, but through the individual members it is participating and cooperating in every good movement on foot in the Alaskan city."

Mexico has 24 Rotary clubs and 141 cities are being surveyed for membership. When they are all established, we will not need our soldiers on the border any longer."

Mr. Manny said that the members of Rotary in other countries are taking Rotary club work even more seriously than in America. London has 39 clubs. The visitor told how King George, of England, and King Albert of Belgium, have given their sanction to the Rotary work. Mussolini has urged his business and professional men to aid in establishing clubs in that country.

Mr. Manny cited the six objects of Rotary and briefly defined each. He declared that it is an effort to make practical the theory of good fellowship and the golden rule.

Mr. Manny told how extravagances had been eliminated from the administration of Rotary affairs in headquarters in Chicago. The admirable system installed there by Harry Rogers, Mr. Manny said, has resulted in a saving of \$100,000 a year.

Mr. Manny was accompanied here by Mrs. Manny, who was a guest while in the city of Mrs. C. H. Jenkins, wife of the president of the local club. They left Monday afternoon for Pendleton.

Guests of the club Monday were Hon. J. Sinnott, of The Dalles, and Leslie Butler.

At the club luncheon last week, R. E. Steele was commended for his activity in starting an airplane contest among the boys. A number of the club members gave extemporaneous talks on the meaning of Rotary to them.

A round table luncheon will be held today at the Waukena, in order to accommodate the few members who were not present Monday or any visiting Rotarians who may be in the city.

A song written for the occasion by Walter H. Woodgett was sung by Albert T. Case at the luncheon for Governor Manny. Mr. Case was accompanied by R. B. Perigo on his accordion.

CAR SHORTAGE IS CUTTING SHIPMENTS

With the movement of apples just well under way, a shortage of refrigerator cars created a hamper for local shippers this week. Because of the volume movement of California wine grapes, the Pacific Fruit Express announced that apple shippers here would only be able to secure an approximate 50 per cent of their requirements. The shortage will last for another two weeks, it is expected.

Railway officials are urging that shippers use box cars, especially for apples rolling from here to Portland. The shippers, however, say that heavy breakage results when box cars are used. The Apple Growers Association, which is shipping 20 cars of pears to Portland for loading on refrigerated ports, bound for European ports, said that the pears would have to move the short distance under ice. The Association expected to load 25 cars of apples for export in Portland. These will be largely handled by Columbia river steamer, the Beaver, now making a regular daily trip between here and Portland. Trucks, too, will be used in forwarding the export apples.

Up to last Saturday the Apple Growers Association had shipped only 100 cars of apples and 55 cars of pears. Daily shipments this week will average 20 cars.

"UNDER COVER" WILL BE GIVEN NOVEMBER 4

The play, "Under Cover" which the American Legion Auxiliary Dramatic club has been rehearsing for several weeks has been definitely set for Friday, November 4, at the new high school auditorium.

It is a highly dramatic play of four acts interspersed with many high lights of keen wit and sparkling humor—a play to suit every taste, with plenty of action, thrills, mystery and humor.

The cast is taking an unusual interest and is rehearsing four nights a week in order to get the play in first class shape to present. The cast includes: Mrs. A. J. Anderson, Wayne Poland, V. C. Morgan, Herman Mende, Mrs. Walter Ford, Banks Mortimer, Mrs. Eunice West, Mrs. Ed Krieg, Jas. Wilson, C. C. Lindley and Mrs. J. L. Murrphy, who is directing the play, also takes a part.

Miss Morrison Gives Dinner Party

Miss Mildred Morrison gave a delightful dinner party at her home on Sunday afternoon. Those present were: Sylvia Stewart, Betty Coulter, Edith Patton, Ruth McClain, Catherine Kelly, Carol McRocher, Kathleen Hartwig, Vesta Scholl, and Miss Ann Olson.

APPLE PICKING ABOUT OVER

HEAVY SHRINKAGE IN VALLEY CROP

Estimates of Tonnage Vary From 900 to 1200 Cars—Washing Machines

Washing Machines

Apple growers of the mid-Columbia districts have taken the recent good weather and practical advantage of the now under way and are now under way and washing pickers and packers. However, will be busy for several weeks, furnishing a large payroll for pickers and packers.

Picking crews were observed in all districts Sunday, picking the harvest had been delayed.

While the 1927 apple crop has shown a heavy shrinkage since harvest was started, estimates at the present time vary widely. Some shippers express the belief that the tonnage will not exceed 900 carloads. The maximum estimates place the crop at 1200 cars. The tonnage will be the lightest in years.

Considerable confusion has been evidenced among shippers and operators of central washing plants over injuries to fruit caused by submerger types of cleaners in several instances. This type of machine has been taken out of the cleaning plants and others installed.

The central washing plants will be busy for several weeks, furnishing a considerable payroll. Employees at the plants are for the most part local residents, and the payroll funds will be kept at home.

BEND-HOOD RIVER GAME TOMORROW

(From Hood River Guide)

What is expected to be the hardest game of the season will be played Friday afternoon at the new high school field when Hood River will tangle with the powerful eleven from Bend.

Bend will no doubt have a strong team as they have a team composed of practically all lettermen and experienced men from last year's squad. Brown, a halfback and triple threat man, is the main cog in their offense. His running, punting and passing is outstanding as was shown last year, when he was instrumental in bringing about a 10-12 drubbing to Hood River last year.

Last week Bend defeated Eugene 20-12 and in doing so displayed a surprising aerial attack and match cover through the line. This alone should show them as tough opponents for Hood River and they will no doubt pull a few new tricks out of their locker to display to the Hood River fans.

The blue and white squad will be in top shape for this game as they have been pointing to it all season.

Hood River's top line will be the same as in the last two games with Mendenhall and Acheson, ends; Goin and Von Lubken, tackles; Wallace and Olson, guards; Johnson, center; McCulley, quarterback; Stratton and Woodford, halves; Hills, full.

KRESSE DRUG CO. DELUGES BARBERS

(By "De Hole")

Before an audience of approximately 150 spectators the Kresse Drug company employes walloped the Bon Ton Barber shop wool clippers in a bowling contest Tuesday night by a total of 141 pins at the alleys in the basement of the Electric Kitchen.

George Smith, who had previously never bowled a game in his life, was by far the feature bowler of the contest, and made a most exceptional showing for his first three games with a total average of 101 pins for each of the three contest games.

Herman Kresse was the high man of the evening with a total pin score of 502; while his nearest competitor on the barbers' team was Clyde Simpson who turned in a total pin score on the three games of 442.

The alleys were in wonderful shape for the contest and no alleys were allowable on that account.

Much enthusiasm was displayed by the audience and each faction was rooting to a fare-thee-well all through the contest.

The outcome of the game means that the employes of the Kresse Drug company will collect a free hair-cut, massage and shave from the Bon Ton employes, and will also gather around the festive board and partake of a free feast given by the barbers.

The teams were composed as follows: Kresse Drug Co.—Ray Lee, christened "Violet Ray"; Don Lamson, George Smith, George Hams, and Herman Kresse. Bon Ton Barbers—Clyde Simpson; "Cotton" Cosley, Larry Boyd, "Bill," and "Frank."

Because of the extreme spirit shown by the onlookers Tuesday night, it is predicted that the bowling league, which will be composed entirely of strictly business house teams, no ringers or outsiders being allowed to bowl on a league team, will be one of the most interesting and closely followed contests of any the city has witnessed for many, many moons.

The bowling alleys are in A-1 shape and bowlers will not have to contend with low scores, splits, and bad breaks because of any fault of the alleys.

New pins are being ordered by the establishment to be used in tournament play only, and bowlers will be given every convenience that could be obtained in any of the larger cities.

It is expected that the league will start about November 1.

One Day Convention Tomorrow

The One Day convention, one of a series of fifty in the country, and one of three to be held in the state, is scheduled for tomorrow at the First Christian church, Ninth and Eugene streets. The territory represented, the interest generated, and the program outlined, promises a fine gathering. The chief feature of the event will be the men's banquet at 3.30 served by the ladies of the church at 50 cents per plate. Among the speakers of the gathering will be Chas. G. Egan of Bombay, India.
