HOOD RIVER, OREGON, THURSDAY, NOVEMBER 10, 1927

No. 24

## Kresse Drug Co.

The Rexall Store

# One Cent Sale

NEXT WEEK—Thursday, Friday and Saturday, November 17, 18 and 19

BUY ONE ARTICLE AT THE REGULAR PRICE AND GET THE SECOND ONE FOR ONE CENT.

That's the Plan of Pricing in This Annual Event which Turns the Thoughts of Thousands of People Toward Economy.

This will be the Largest Sale of Standard Goods the United Drug Co. has ever put on, as the Sale includes such items as Klensox Tooth Paste, Arabesque and Symphony Lawn Stationery, Narcisse Talcum, Cascade Pound Paper and Envelopes, Liggett's Box Chocolates, Aspirin Tablets, Face Powders, Face Creams, Shaving Creams, Hot Water Bottles and Hundreds of other Wonderful Bargains.

KRESSE DRUG CO.,—The Rexall Store

## THE GREATEST FOOTBALL GAME

BE THERE PROMPTLY AT 1 O'CLOCK TOMORROW AFTERNOON AT THE NEW ATHLETIC FIELD TO JOIN IN DEDICATION OF THE NEW FLAG-POLE.

Go forth with a record football crowd for Hood River, sit on the new bleachers on one of America's most beautiful football fields and root for Hood River. Eugene has a strong team and tomorrow's game will be one of the best interscholastic games of the state this year.

Send the youngsters down to the Rialto Theatre to be guests of the American Legion Post at a free picture show at 10.30.

After Lieutenant Kelley has dropped a ball from an airplane at 1:30, the football game will start.

A parachute jumper will leap from an airplane between halves.

At 6 p. m., the Annual Ex-Service Men's Banquet will be held at the Hotel Waukoma.

At 9 p. m. the Annual Armistice Day Ball will start at K. of P. Hall. Bud's Aces will make the music.

## WE WILL BE SHIPPING APPLES AND PEARS

Out of this and other Districts all through the season.

If you have Fruit still unsold either here or in storage, let us sell it for you.

DOMESTIC AND EXPORT

## DUCKWALL BROS.

CASH BUYERS APPLES and PEARS

FRANZ BUILDING

Second Floor

## In The Nation's Service in 1917

TODAY, a power in the nation's progress

ARMISTICE DAY this year brings out the contrast between 1927 and ten years ago. In 1917 men and women were serving the nation in history's greatest war.

Now, in the fields of civil life, those millions are serving their home communities—and thus the country at large.

We are proud to number so many of these veterans among our customers

## FIRST NATIONAL BANK

## Nothing Succeeds Like Success

We left those imaginary heirs of Christopher Columbus with a mere \$344,852.00, which at a dime a day invested at 3% had from 1492 to 1692, earned them this amount.

From that date the amount grows by leaps and bounds like this:

1712	\$ 614,051.00	1832	\$ 19,423,643.00
1732	1,092,625.00	1852	25,898,611.00
1752	1,943,424.00	1872	46,042,955.00
1772	3,455,956.00	1892	81,855,123.00
1792	6,144,901.00	1912	145,521,199.00
1812	10,925,248.00	1927	226,367,509.00

When we wrote the Columbus Day Ad, we inadvertently made the computation to 1935 instead of 1927 and those last eight years increased the amount by about seventy-five million dollars.

These figures are as bewildering as Andy Gump's and the best way to get back to amounts we can understand is to open a Savings Account with a dollar or more and add to it a dollar or more each week for ten years. TRY IT!

## True-To-Name Nursery

H. S. GALLIGAN, Proprietor  
Hood River, Oregon

A vigorous healthy stock of apple, pear, cherry, peach and apricot trees, grown on virgin soil. All pear and apple trees are grown on the best type of French roots; the cherry on Black Mazzard roots—these are without doubt the best type of root stock for this locality. Se we are pleased to offer at this time a fine lot of trees that are grown right together with the benefit of our 27 years of practical experience growing trees in Hood River. We also offer a liberal discount on quantity orders and for cash. Bear in mind that every tree we offer is guaranteed absolutely true-to-name and of the best producing type. Your inspection and patronage will be appreciated. Phone 4796.

## FILING MADE ON LOST LAKE

### THE DALLES DISPLAYS AMBITION

Neighboring City Would Secure Supply For Municipal System From Hood River Water Shed

Press announcements that the city of The Dalles has filed on waters of Lost Lake, to be utilized in the development of a municipal gravity system for the neighboring mid-Columbia county seat, Tuesday created considerable speculation among local folks. While W. L. Clark, city engineer, said The Dalles filings will not conflict with those of Hood River on a large spring on Laurel creek, just north of Lost Lake. Captain Geo. R. Wilbur, secretary of the East Fork Lumber Co., and attorney at large for the city, declared in litigation now before the United States supreme court, expressed the opinion that irrigation and power interests will never permit the plan as outlined by The Dalles without a court order.

The matter of The Dalles filing was made the chief subject at the Tuesday luncheon of the chamber of commerce at Cottage Park. Mr. Wilbur declared in addressing the chamber members that he doubted the feasibility of the neighboring city's plan. Captain Wilbur cited that an adjudication of all water rights of the Hood River Valley, in circuit court here and the supreme court for 10 years and now before the United States supreme court, had established the rights of appropriators and that the river lacked a sufficient flow to go around. The Dalles plans on withdrawing 30,000,000 gallons of water daily from a tributary of the East Fork on the east side of Mount Hood, returning the water to the river from Lost Lake, which would be raised by a 25-foot dam, impounding water that would run off during the winter and spring frosts.

Captain Wilbur cited authentic figures to show that such a plan would be nearly impossible. City Engineer Clark said that the municipality had received notice of the activities of The Dalles some weeks ago and had made a thorough investigation of the city's filing at Salem. It was discovered, he said, that H. L. Vorse, a former local hydro-electric promoter, already has a filing on Lost Lake, similar to that on The Dalles. Mr. Vorse, who made his filing some 10 years ago, recently displayed renewed activity. He proposes to tunnel under the ridge west of Lost Lake and carry impounded waters to Eagle creek for supply to a power house proposed at the mouth of that stream.

Citizens acquainted with the United States forestry service attitude toward such a development as The Dalles propose, expressed the belief today that construction of a 25-foot dam, to raise Lost Lake, will not be permitted. To raise the lake 25 feet, it was cited, will ruin the camping places along the lake shore and end the forestry service's plans for further recreational development there. The forestry service recently secured from the Oregon Lumber Co., a large shoredland tract similar in location to that of the forestry service's change for timber in other sections of the Mount Hood national forest. These negotiations were conducted for the purpose of developing the lake shore as a recreational center. It was said.

Last year The Dalles bored a well, which it was thought would solve the problem of water there. The cost of pumping, however, is said to be so burdensome as to make the well financially impractical.

The Dalles Chronicle Monday afternoon carried the following story on the water matter: The first definite move in a gigantic plan to give The Dalles an almost inexhaustible supply of water direct from the snow-covered slopes of Mt. Hood was made today, when an application to construct a 25-foot storage dam at Lost Lake was filed with the forest service at Salem by The Dalles City water commission, through a brief prepared by its engineer, David G. Glass.

The plan is so intricate and involved that it is difficult to describe without reference to a map. In brief, the city water commission desires taking approximately 30,000,000 gallons of water per day from Cold Springs creek on the east side of Mt. Hood and replacing this flow from other sources to keep from conflicting with water rights on the lower stretches of Hood River.

Cold Springs creek is a cold, clear stream, and high springs from Sewer Clark glacier, originating between Blue Grass ridge and the east slope of Mt. Hood. The Dalles water commission in 1923 filed an approximately 30,000,000 gallons of water from a minimum low flow of the stream. This application is still pending.

Tentative plans call for a six-mile pipe line at least two feet in diameter, taking the water of Cold Springs creek from a point well behind Blue Grass ridge, down across Sand creek, the Mt. Hood loop highway, the east fork of Hood River, Dog river, thence through a tunnel approximately a quarter of a mile in length, and dumping it into Deer creek, a tributary of Mill creek.

This is the only new line calculated to increase the water supply of The Dalles. The 30,000,000 gallons of water available in Cold Springs creek at the lowest point in the year is approximately 10 times the amount of water now available in Dog river at the time of the lowest water and the greatest need.

In fact, the diversion of this water is the most simple of the projected plans which call for returning this amount of water to the three concerns which hold rights on the lower river, namely, the East Fork Irrigation company, the Oregon Lumber company at Dee, and the Pacific Power & Light company at Powerdale.

The different plans to care for the prior rights will be discussed briefly and in turn. In order to supply the East Fork Irrigation district, it is proposed to take water from Clear creek across a low divide and dump it into Evans creek, thence by another canal, it is into the East Fork Irrigation ditch. More water can be supplied in this manner than The Dalles water commission proposes to take out of Cold Springs creek, it is claimed.

By diverting water through the main canal of the Dee Irrigation district, or through a new canal if it is not possible to use the old canal, to a point above the mill dam of the Oregon Lumber company at Dee, it is proposed to avoid a conflict with the lumber company's right.

In order to take care of the power company's right, it is proposed to construct a dam at Lost Lake, which is expected to store 7,697 acre feet of water. A table has been prepared to show that this water may be let out in quantities sufficient to care for the power company's right.

Two reasons set forth in the brief for seeking a new water supply for the city of The Dalles. The first is the inadequacy of the Dog river supply in times of extreme heat. The second is the cost of pumping from the city well, which is almost prohibitive to the higher points of the city.

Another point which is stressed by the water commission but which does not appear in the brief for the forest service, is that the commission is filing the necessary within the next few years of replacing the 15 year-old pipe line from Dog river to Mill creek.

Another point which the water commission advances in support of its plan is that the Dog river water-shed is becoming more difficult to protect from contamination. The forest service has constructed a fine road from Brooks Meadows to Bottle Prairie, and another from the meadows to the Mt. Hood loop. The proposed connection between The Dalles and the Mt. Hood loop people near the present Dalles city water supply.

## CELEBRATION PLAN COMPLETE

### THE AMERICAN LEGION IN CHARGE

Preparations Indicate That Armistice Day Activities Will Equal Those of Any Past Year

Preparations are complete by the American Legion post for activities tomorrow that will equal if they do not excel those of any Armistice day celebration since the great war was ended at 11:00 a. m. in 1918.

It will be a full day for the legionaires, especially those who are members of the colorful and tuneful drum and bugle corps. The buglers and drummers will go forth early to serenade Civil and Spanish-American war veterans.

At 10:30 a. m. the legionaires will be hosts to a free picture show for grade school children. At 1:00 p. m. the Legion members will gather at the athletic field of the new school to dedicate a 90 foot flagpole, which was given by the post by the Oregon Lumber Co. A flag will be presented to the school by the Women's Relief Corps, the members of which will participate in the dedication. The Knights of Pythias band will then give a concert and the drum and bugle corps will execute drills on the athletic field.

The football game between the Hood River and Eugene high school football teams will begin when Lieutenant Calkley G. Kelley, noted flyer, arrives by airplane from Vancouver, Wash., and drops a ball on the field. Between halves a commercial plane will take the air and a parachute jumper will leap from it.

Bleachers have been constructed to care for the big crowd expected at the football game. The crowd, it is anticipated, will set a record for local athletic events.

The annual Armistice Day ex-service men's banquet will be held at the Hotel Waukoma at 8 p. m. and at 9 p. m. the annual ball will start at the K. P. hall.

## WILL BATS EXTERMINATE THE MOTH?

Will the common bat replace the spraying machine in Pacific northwest orchards?

Fruitgrowers who have investigated the use of the flying mammals to exterminate pestiferous insects in other parts of the country express the belief that there is merit in the plan of establishing community bat roosts in the commercial orchard districts of Oregon.

Washington, Indeed, W. Kelly Price, a grower of Yakima, Wash., who last year established a bat roost on his place and who last Friday night addressed a group of 25 growers here, declared that he encourages his experiments has convinced him that the use of bats will enable growers to eliminate spray for codling moths.

Mr. Price was accompanied here by Dr. I. M. Miller, a Yakima physician and orchardist. The latter declared himself as thoroughly convinced that bats will solve the problem of arsenical spray; the residue of which is now such a worry to fruitgrowers in all parts of the country.

The story of the use of bats in insect elimination was first carried to the world, according to the visitors by the Holland magazine, an agricultural publication, owned by Fred Holland, of Dallas, Tex. Dr. Charles A. R. Campbell, medical research editor of the magazine, is known as an authority on bats that are natural enemies of insects. Dr. Campbell had for years experimented on bats in exterminating mosquitoes. He succeeded in finding a constricted bait with which he lures bats to especially constructed roosts.

Mr. Price was so impressed with the experiments of Dr. Campbell that he visited him in Texas and declared that this visit convinced him that bats may be successfully used by orchardists.

Mr. Price the past summer left a block of his apple trees in the vicinity of his bat roost un sprayed. No worms or stings on apples were found on these codling moths, as mosquitoes, by at night, and the bat is a night-flying, insect-eating mammal. An examination of the stomach of bats has shown that they will make the moths a major source of subsistence when the insects are available.

J. H. Koberg, pioneer local truck gardener, who attended the meeting addressed by the Yakima visitors, recalled that bats were formerly plentiful in an old barn on his place, located on the Columbia lowlands just east of here. Mr. Koberg said he was not bothered with mosquitoes in those days. The barn burned. Of late years the insects have been a pest at his place during certain weeks of the summer months.

Dr. Campbell, who has devoted the most of his life to a study of bats and their insect-eating habits, has announced that he does not feel justified in disclosing the secret of his bait; that he will bait roosts for \$500 each. He further specifies that the roosts must be erected by a man sent to the fruit districts by him. The total cost of erecting and baiting a bat roost will reach \$1500.

E. L. McClain, Jr., of Los Angeles, Calif., owner of extensive East Side holdings, has written his superintendent, Roy Miller, to visit the Yakima bat roosts and investigate them. Mr. McClain will probably establish the first such local control for codling moth.

## THE LITTLE THEATRE CLUB IS ACTIVE

The Little Theatre Club, which originated among folk of the West Side, where for the past several years an annual amateur theatrical production of merit has been produced, will give an evening of one act plays the latter part of November. Andy Walters is chairman of the Membership committee of the organization. The one act plays are being directed by Miss Kathleen Carlow and Mrs. E. D. Barrett.

## CHURCH AND HOME SERMON FEATURES

### Getting people to church on Sunday evenings, is somewhat of a problem among ministers and church workers in most places, and Hood River is no exception.

From the present indication, however, it looks as if the First Christian church is in a fair way to solve that problem. The church is being filled, with the audience increasing with each Sunday evening.

What is the excitement? Well, the pastor, W. O. Livingstone, (he doesn't like the term Reverend) is delivering a series of sermons on the theme, "The Church and the Home", and the people are sitting up and listening, listening as they do not do ordinarily. He is succeeding in attracting his audience, and is keeping them awake.

In the first place the platform of the church is made over to represent a room of a dwelling, and each Sunday evening some one, or more, of the business houses of the city are furnishing the room to represent some phase of home life. Three of the series have been delivered, and five more are yet to come. On two of these Sunday evenings the room represented a living room of the home, and on last Sunday evening it was furnished as a kitchen, with electric range, electric refrigerator, metal table, sink, etc.

But this is not all; the aim of the series is to link up in a more intimate manner the church and the home, and on Sunday evening his theme was, "The Heart of the Home", which he defined as "Mother Love." The speaker did not mince matters, and he is calling for a spate of epistles. He pictured the mother of ancient Israel, in contrast to the flapper mother of the present day; he was at his best, and he ordinarily has the faculty of making himself understood. His message of Sunday evening might be considered by some as sensational, but it did bristle with truth, ever a redeeming quality, some of which was almost uncomfortably applicable.

He stated that the training and education of the child is the result of the cooperative work of the home, the school, and the church, and that it must consist of the physical, intellectual, moral and religious training, and that we are largely failing in the task. Said the speaker, "This is an age of moral decay," and "These three institutions must cooperate to save from disaster. He contended that the child's training should begin before it is born, and stated that "Hundreds of children are damned before birth, anathematized through life, and sent to hell at death, with never a chance."

He paid his respects to Judge Ben J. Lindsey's theory of "Companionate Marriage," which he characterized as "The most damnable doctrine since Rousseau." If the past three sermons are a sample of what is to store in the other five, with the probable ascending climax, as the announcements would indicate, it would seem that there will be something out of the ordinary doing at the First Christian church between now and the holidays. His theme for next Sunday evening is, "Should the Wife Obey Her Husband?" There were two baptisms following the sermon Sunday evening.
