YEAR'S GRAIN CROP TO BE VERY SMALL

Report by the Government Is Sensational.

Chicago.—United States production of grain this year is the smallest in 33 years according to a report released by the Department of Agriculture.

The report was even more sensational than that issued a month ago.

Indicated total for the five major grain crops is 3,307,000,000 bushels, which compares with 3,781,000,000 bushels last year and the 1927-31 average of 4,900,000,000 bushels. This reduction of 1,600,000,000 bushels from the average gives a clear picture of the ravages of the spring drouth.

Total wheat production is estimated at only 484,000,000 bushels, the smallest since 1896, when it was 428,000,000 bushels. Corn crop is estimated at 2,113,000,000 bushels, which, with exception of 1930, is smallest since 1901. Oats production is pitifully small, only 568,000,000 bushels, and the smallest in 44 years.

In all instances the official estimates were below trade expectations. Average of private estimates was 516,000,000 bushels wheat, 2,321,000,000 bushels corn and 304,000,000 bushels oats.

A reduction in winter wheat estimate was entirely unexpected; in fact, some increase was looked for in view of the good yields in southern Kansas and parts of the soft wheat belt. It is noted, however, that the condition of winter wheat is two points higher than a month ago, and the smaller bushel estimate is due to reduced figures on acreage. The latter is given as 32,485,000 acres against 34,275,000 acres a month ago.

Production of winter wheat is given as 304,000,000 bushels compared with 400,000,000 bushels a month ago, 352,000,000 bushels last year and the 1927-31 average of 632,000,000 bushels. Area harvested last year was 28,426,000 acres.

Spring wheat crop is placed at 89,400,000 bushels, compared with 176,000,000 bushels last year and a five-year average of 254,000,000 bushels. Condition of spring wheat is given as 88.4 per cent against 52.1 per cent a year ago and the 1922-31 average of 76.6 per cent. Spring wheat area is 11,511,000 acres against 19,072,000 acres last year and five-year average of 20,338,000 acres.

Production of corn is estimated at 2,113,000,000 bushels, comparing with 2,344,000,000 bushels last year and a five-year average of 2,516,000,000 bushels. Condition of the crop as of July 1 is placed at 71.8 per cent of normal, about 1½ points better than a year ago, but 8 points under the 1927-31 average.

A feature of the corn report is the much reduced area, given at 92,920,000 acres against 102,379,000 acres last year and five-year average of 100,700,000 acres. The official acreage is materially below the average of private estimates.

Crop of oats is estimated at 568,000,000 bushels compared with 732,000,000 bushels last year and five-year average of 1,181,000,000 bushels. Crop condition is 40.6 per cent of normal. The report takes recognition of abandoned acreage, giving area as 33,348,000 acres against 36,704,000 acres harvested last year and a five-year average of 39,673,000 acres.

Yield of barley is placed at 125,000,000 bushels compared with 157,000,000 bushels last year and five-year average of 270,000,000 bushels. Area is estimated at 8,712,000 acres, nearly 1,500,000 acres less than harvested last year and compared with five-year average of 11,963,000 acres.

Rye crop is 17,200,000 bushels against estimate of 18,800,000 bushels a month ago, 21,184,000 bushels last year and five-year average of 40,000,000 bushels.

Heavy reduction is also shown in hay production. Estimate of 52,000,000 tons of tame and 5,500,000 tons of wild hay, compared with 69,000,000 and 8,900,000 tons, respectively, last year.

Father and Daughter Dead in Suicide Pact

Norwalk, Conn.—Robert J. Easton, sixty-four-year-old real estate man, and his daughter, Jayne, thirteen, were found dead in the garage under their home in what authorities said was a suicide pact. Death was due to carbon monoxide poisoning.

Four Killed in Crash of Italian Bombing Plane

Rome.—Antonino Domenico, well known civil aviator, and three Italian soldiers were killed in the crash of a bombing plane at the Montecelio airport. Domenico was a war ace and a holder of several prizes for altitude records with cargo.

Bakers Have Blue Eagle Code

Washington.—The billion dollar baking industry went under a blue eagle code, which the national recovery administration said would not increase the price of bread and might even lower it.
