

VETERANS OF FOREIGN WARS TO GIVE DANCE AT MERRILL'S FRIDAY

Dam Site Post No. 3051, Veterans of Foreign Wars, have taken the lead in creating entertainment for the crowd that is expected to visit the Bonneville dam area on the occasion of President Roosevelt's trip to the dam next week.

The president will be at Bonneville Friday afternoon. Following the ceremonies at the dam the veterans will put on a dance at Merrill's pavilion in Cascade Locks. To President Roosevelt has been dispatched an invitation to honor the war veterans with his presence at the dance, even though he does nothing more than stop in and say a few words.

The dance will begin in the afternoon and continue far into the night. "Larry" Sherman at Bonneville and "Jim" Merrill at the Locks have each contributed beer for the occasion and the liquid amber will be dispensed free while it lasts. So the veterans are confident that everyone is going to have an enjoyable time.

Tickets for the dance have already been put on sale and invitations are out to posts of the Veterans of Foreign Wars at The Dalles, Hood River, Portland and other towns to make up parties and join in the fun.

Efforts are being made to bring in a ferris wheel, a merry-go-round and other concessions for the purpose of furnishing entertainment for the thousands of visitors who will want to make a holiday of their visit to the dam.

GERMANY'S POSTAL SYSTEM VERY OLD

The first postage stamps for what is now the republic of Germany were those of the house of Thurn and Taxis, a noble family which had operated a postal system for almost 300 years. Early in the Sixteenth century this post reached from the Netherlands through Germany and Austria to Italy, but during a war in the Netherlands had fallen into disuse.

After this war when the counts of Thurn and Taxis again attempted to set up the monopoly, several of the German states which had meanwhile organized postal systems refused to recognize the grand hereditary postmaster. This was the condition of affairs when stamps were put in use to prepay mail matter.

The Thurn and Taxis post office joined the Austro-German Postal union in 1851, and, conforming to the rules of that body, issued stamps. The German states not served by Thurn and Taxis had, generally speaking, issued stamps prior to that time. There were many systems of coinage in use in the various states using the Thurn and Taxis post and it was necessary to group the states in two bodies termed the northern district and the southern district with a series of stamps for each.

BRAZIL'S JAPANESE COLONY INCREASING

Japanese colonists in Brazil now number about 140,000, according to an investigation made recently with the assistance of the bureau of international research of Harvard university and Radcliffe college. They are there as the result of a varying stream of emigration which began about 1907.

These colonists own about 1,225,000 acres, and the greater part of them are settled in the state of Sao Paulo—where they number 125,000—and the adjoining state of Minas Geraes. A few thousand live in the northern part of the country.

The first Japanese colony was established in 1912, in Iguape, Sao Paulo, where the Overseas Enterprise Joint Stock company of Japan owns at present a plantation of more than 154,000 acres. The immigration began with contract laborers, needed because the coffee industry was suffering from a shortage of labor. Practically all the Japanese in this region are engaged in agriculture.

The government-subsidized Yokohama-Buenos Aires line of the Osaka Shosen Kaisha brings the emigrant to his new home and the supervision of the Overseas company continues in Brazil.

Tricks of the Trade

There is an unusual kind of museum in the weights and measures office in London. It is full of exhibits that betray the trickery of mankind. One of the strangest is a pint tankard which appears quite genuine inside and out, but always shows a 10 per cent shortage. The trick is due not to a false bottom, but to a cunning inner lining. There are also such things as hollowed-out weights filled with cork, "official" stamps forged on half-pint tumblers, scales weighted with granite, and a five-gallon oil measure with a stone wrapped in flannel wedged into its base.—Tit-Bits Magazine.

Neon Lights Tell Flyers of Peril

Steel towers equipped with tubes of neon lights which are visible at a great distance are used in England to warn pilots to stay clear of an area containing several giant wireless masts, some of them more than 800 feet high. It has been found that the neon warning lights serve efficiently in directing the attention of aviators to the hazard of the several towers grouped in a central location near a British broadcasting station.—Popular Mechanics.

Death Rate Lowest

The Piedmont section lying along the foothills of the Blue Ridge mountains in North Carolina is said to have a lower death rate than any territory of like size in the United States.

EVENTS OF THE WEEK
