

Honey Golf Balls

The uses to which honey is put are many and various, but perhaps the most unusual is in making golf balls. The honey is placed in a round stout rubber sac and is forced in under tremendous pressure. Around this the usual rubber is wound and it has the ordinary outside. It is said that honey being non-evaporable and virtually unaffected by time or temperature gives a ball that stands up under all conditions.

Books Classified as Silk

Book lovers in England are protesting against a new ruling of the customs department that imported books whose bindings are lined with silk or have bookmarks of silk ribbon should be classed as silk, and the silk duty charged. One bibliophile has publicly asked if tomes bound in calf shall be quarantined and taxed as herds.
