Mr. and Mrs. L. G. Geisler and son, Jerry, of Portland, were weekend guests of the Bonneville Drug company pair, Mr. and Mrs. O. L. M. Hauser.

Bruce Babb, manager of Wiggly Wiggly has been transferred to the Astoria store. His place will be filled by Joe Jefferson of Astoria.

Jimmy Reimer, switchboard man for the engineers, thinks Portland is too dead, so the government's star basketball player wended his way to Seattle over the week-end.

A trio of Leland Stanford University professors, interested in engineering, were taken on an extensive tour of the dam project Saturday by Lieutenant Colby Myers and Albert Bauer.

Miss Dorothy Haniff, the girl who says "Bonneville," or "number please," spent the week-end at her sister's home in Stevenson.

Mr. and Mrs. A. P. George, of Portland, started work on their new home in the fast-growing district back of Tyrell's tavern, on the highway, last week. A. V. Bebeau also laid plans for the construction of his home bringing the number of houses complete or planned to 12, all within the past two months.

Miss Etta Grunke, of French's Coffee Shop staff, was a Portland visitor Monday.

Mr. and Mrs. Jack Moorhouse have taken up residence on the hill behind French's, where the former is head chef, in one of the finest trailer houses in the dam district.

Work in connection with the new government buildings forced George E. Goodwin, engineer in charge of contract inspections, and Charles Shoblom, foreman on the administration building and civic auditorium, to motor to Portland Friday.

Frank C. Linton, government safety inspector, returned to work last week after a seven-day illness with the flu.

One of the proudest government guards on the reservation is Officer Frank Caroon, the husky Canadian, who is back from a week's vacation, with a new car. Not high-hat, but awfully proud.

One of the reservation's largest and most successful bridge luncheons in many months was held Friday at the guest house by Mr. Ben Torpen and Mrs. W. W. Laxton. In addition to the hostesses, 26 women were invited. First, second and third prizes were awarded to Mrs. Alan Brandes, Mrs. John Torkelson and Mrs. George Goodwin, respectively.

HATCHERY EMPLOYEES BUSY

Two new homes, for the use of men working in the Bonneville fish hatchery, were under construction last week, on the northwest end of the grounds. A large crew was also busy, under the personal leadership of Mr. Anderson, hatchery superintendent, in making the annual spring cleanup of the grounds, raking out the moss from the grass and spading around the shrubs and flowers.

BONNEVILLE SCHOOL NEWS

A popularity contest is under way among the boys and girls of the school, sponsored by the Bonneville Women's club, who will award the prizes at the Community Fair Friday night.

Now in the lead are: first-second grades, Michael Moran and Betty Silvers; third-fourth, Kathleen Waring and Lois Linton (tied), and Albert Olds; fifth-seventh-eighth, Florence Gudhart sixth, Ione Goodrich, and Norman Waggoner and Billy Noble (tied); seventh-eighth, Florence Gudhart and John Teerlink.

The Schoolboy Sluggers moved into the lead in the competition for the school baseball title last week, by winning two games, over the Red Devils and the Yankees.

Lois Meyers and Russell Kelsey were omitted from the list of pupils published last week who were neither absent or tardy.

The first grade has a new pupil this week, Ray McVeigh, from the Locks. Also added last week were Richard and Albert Willey of Portland, to the third-fourth grade room. Virgil Anderson returned to school Monday after a week's illness.

Napoleon, the third-fourth grade room's toad, disappeared several days ago. He is thought to have jumped out the window.

ENGINEERS GET DUCKING

Five government engineers, surveying on the upper Columbia near The Dalles, suffered a ducking in the river Thursday when their boat was capsized by the wind. They were rescued by another government launch, but not before Stanley Sannes, of Portland, suffered seriously enough from the submersion to be treated at the hospital.
