Patsy Snider, 18 months old, attempted to give the Dam Chronicle reporter a news item Tuesday but couldn't make herself understood. Perhaps she was trying to tell him she will dance at her aunt's wedding at The Dalles Sunday.

Fabulously rich deposits of gold not only are known to exist, but they have been thoroughly tested and plotted. Only catch is that they are so inaccessible the amount of gold that could be shipped out wouldn't pay for the venture.

It is said that all the mechanical principles and devices embodied in early automobiles had been common scientific knowledge for years, needing only coordination to become the machine that rewrote the history of private transportation.
