

## Water Outlet To Hatchery Is Rushed

Providing a water supply for the new salmon hatchery building at Bonneville, workmen this week continued cleaning the pool where the Tanner creek flume empties, and erecting forms for re-routing the water.

A concrete intake on the west side of the pool was completed this week, giving access to the pool for two ten-inch mains. One of the mains will deliver between 800 and 900 gallons per minute to the hatchery, feeding 40 outlets at the hatching troughs which require 15 gallons per minute each. The other main will be secondary, used only when necessary.

One hundred twenty hatching troughs have been set up in the hatchery building, and excavation is virtually complete for six new rearing ponds west of the present group.

## Many Miles of Chewing

### Gum Consumed Annually

Over 100,000 miles of chewing gum are sold every year, the major portion being consumed in the United States, states the Montreal Herald.

Chewing gum in its raw state is the juice of a tree known as the sapote, which grows in various parts of Central America.

The sapote is a graceful tree, with a straight trunk some forty feet high. It is tapped very much after the manner of a rubber tree, spiral cuts being made in the bark, through which the juice runs down the trunk to jars placed at the foot.

The sap, or "chicle," as it is called, looks like milk when it first enters the jar, but on exposure the color changes to a dull yellow, and thickens until it is almost like sirup.

The gum is taken out of the jars and boiled down in huge pots, after which it is kneaded and excess moisture is squeezed out. It is then molded into large loaves, cooled, and wrapped in canvas for exportation to the chewing gum factory.

In the factory it is mixed and boiled in copper vats to the desired thickness, and sugar is added with flavoring essences.

## Must Give Up \$2,964 Job to Be Socialist Alderman

Bridgeport, Conn.—It will cost George C. Rosenbeck \$2,964 to be an alderman in the common council from the Seventh district for the next two years.

The Socialist alderman is an employee of the city, working at the municipal garage under supervision of George Wood. Since the charter provides that no alderman may hold a municipal job, Mr. Rosenbeck is expected to resign his city position.

He gets \$28.50 a week in the garage. There is no salary for the aldermanic office.

## Incriminating Evidence

### Coughed Up by Burglar

Toledo, Ohio.—It was more than circumstantial evidence which proved to be the downfall of a suspected burglar here. The suspect denied that he stole a diamond ring from the home of Mrs. Katie Golden and asked questioning police detectives to search him. The detectives were searching him when the man's face suddenly flushed. He gulped and then coughed up a diamond ring valued at \$250.

## SCHOOL MEET HELD AT CASCADE LOCKS

Conditions at Cascade Locks high school were discussed at a meeting called Thursday night at the school by W. J. Carlson, Cascade Locks representative on the Hood River county school board, who desired to spur gossip that the school is not fully standardized.

### PIPE LINE GOES IN

That plank overpass you've been bumping across on your way to Bradford's island during the past week, right there at the intersection of the road past the government houses with the main road, marks the crossing of an eight-inch pipe line which will carry Grade A (drinking) water to the power house. Pipe has been laid under the highway but has yet to be laid along the east side of the road to the island.

### RIGLER HAS TOUGH LUCK

Howard Rigler, Jr., who was counting on his "Dam Special" to bring victory in the soap-box derby run in Portland Saturday, was disappointed when he came in fourth in his heat, due largely to a bump in one wheel caused by the valve's pulling out of its socket. He hooked onto a motor cycle for a low uphill, and the cycle hauled him so fast the valve couldn't stand the strain. Several Bonneville residents went in to Portland to see Howard race.
