DANCE NETS \$60

Sixty dollars was netted by Bonneville post, No. 88, American Legion, toward their children's party at the dance they sponsored last Saturday night at the Bonneville auditorium.

The next dance, proceeds from which will be used for the same purpose, will be held November 28. Already funds are on hand which will assure a lot of fun for the kids, and Legionnaires estimate that another \$30 will put on a sumptuous affair.

Air is often referred to as "ozone" whereas actually there is ordinarily no ozone whatever in the air. Ozone is an unstable form of elemental oxygen and is often created when an electrical spark passes through the air. It lends a familiar odor to electric shops and power plants. Air itself is made up of about 78 per cent nitrogen, 20 per cent oxygen, and the remainder of carbon dioxide and the five rare gases.

Don't Burn the Candle at Both Ends

Shopping for pharmacy needs without regard for price and quality is like burning the candle at both ends—you're apt to get caught in the middle. If you pay top-heavy prices, you sacrifice economy; if you get inferior or shelf-stale goods, you invite dissatisfaction. Shop at Keir's, where you obtain pharmacy needs of highest quality and freshness, priced to promote savings.
