Spencer Will Speak at Big Chamber Rally

Lloyd Spencer of Seattle, world traveler and teller of a hundred and one side-splitting anecdotes, will be the principal speaker at the annual meeting of the Mid-Columbia chamber of commerce, scheduled for the first time in Hood River at the Columbia Gorge hotel Tuesday, November 17, at 7:30 P.M.

Minor Corman, president of the Oregon-Washington Telephone company and also president of the Mid-Columbia chamber, says he expects about 250 persons to attend the meeting, representing the chambers of commerce in Yakima, Goldendale, White Salmon, The Dalles, Cascade Locks, Vancouver, Wash., Portland, Bend, Arlington and Pendleton.

A feature of the meeting will be a series of short stunts and skits, from five to 10 minutes in length, to be put on by local talent from Hood River and some of the visiting chamber groups.

Immediately following the dinner a short business session will be held, and from then on the program will be run through as promptly as possible, as Mr. Corman wishes to end the meeting by 10:30 P.M.

All committees working on the dinner, meeting and program will gather at the hotel at 4 P.M. next Tuesday to make final preparations for the get-together, which Mr. Corman hopes will be the best in the history of the chamber. He also says he expects an excellent dinner will be furnished by the hotel management at nominal cost.

Walter W. R. May and Ben Edelson will head the Portland delegation.

As many Hood River business men as desire may attend the meeting by purchasing tickets before next Tuesday at the Hood River cham-

ber of commerce. A turnout of 100 or more Hood River people would be highly gratifying to the committee in charge.

Expert Tells How to Keep Shoes Dry

Waterproofing boots and shoes for farm and school use protects both the wearer's health and the shoes, says Mrs. Azalea Sager, extension specialist in clothing and textiles at Oregon State college. While waterproofed shoes should not be expected to keep the feet perfectly dry if worn too long in very wet weather, they will help during rain or snow storms and on wet pavements or wet ground. They should not be expected to take the place of overshoes or boots. They keep in perspiration to a large extent, but not so much as rubber footwear does.

One of the several simple formulas will do for waterproofing shoes, Mrs. Sager explains. They are all applied in the same way. The grease may be softer for waterproofing shoes in winter than that used in summer time and more of it may be used, in fact, more than the leather will actually absorb, if maximum water resistance is desired. An excess does no harm in winter.

Formula 1: Natural wool grease, 8 ounces; dark petrolatum, 4 ounces; paraffin wax, 4 ounces.

Formula 2: Petrolatum, 1 pound; beeswax, 2 ounces.

Formula 3: Petrolatum, 8 ounces; paraffin wax, 4 ounces; wool grease, 4 ounces; crude turpentine gum (gum thus), 2 ounces.

Formula 4: Tallow, 12 ounces; cod oil, 4 ounces.

Melt together the ingredients by warming them carefully and stirring thoroughly. Apply the grease with a swab of wool or flannel when it is warm, but never hotter than

the hand can bear. Rub it well into the leather with the palm of the hand, especially where the sole is fastened to the upper.

The most convenient way to saturate the sole and welt is to let the shoes stand for 15 minutes in a shallow pan such as a bread tin containing enough of the melted waterproofing material to cover the entire sole. Rubber heels should not be put in the grease. If the shoes have rubber heels, use a piepan to hold the melted material and set the shoes astraddle the rim of the pan with the heels outside.

LAND TRANSACTIONS

Week of October 29 to November 5, 1936. Compiled from data furnished by the Hood River Abstract & Investment company.

Oregon-Washington Railroad & Navigation company, Union Pacific company and Apple Growers association, agreement pertaining to lease originally to Hood River Apple Vinegar company assigned to Apple Growers association, covering part of fractional block 16 in city of Hood River, dated August 6, filed October 30.

Long, Low Contours Mark New Plymouth for 1937

REVOLUTIONARY "safety styling," and massive bodies pillowed on rubber-poise mountings for a new kind of "hushed" ride make their bow with the new Plymouth for 1937. Hypoid rear axles, complete soundproofing and big airplane-type shock absorbers are other Plymouth innovations this year. Interiors

are roomier, with the added luxury that only extra space can give. Eight "deluxe" and three "business" body types are included in the 1937 Plymouth line. The models shown above are the new Four-Door Touring Sedan (lower left), the Two-Door Sedan (upper right) and Rumble Seat Coupe.
