

In Nature's Refrigerator

Thousands of years ago, re-treating northward with the ice, the mammoths of Europe and Asia made a last stand in Siberia. Countless numbers bogged down in the soft, icy marshes, were frozen in the unthawing soil. They are occasionally discovered now, perfectly preserved for more than 10,000 years in nature's refrigerator; the hide, hair, flesh, even the remains of undigested meals in their stomachs; bunches of moss, grass, sedges and wild thyme unchewed in their mouths. Siberian farmers cut off chunks of the red flesh to feed their dogs. —Literary Digest.

ARE YOU ONLY A THREE-QUARTER WIFE?

THERE are certain things a woman has to put up with and be a good sport.
Men, because they are men, can never understand a three-quarter wife—a wife who is all love and kindness three weeks in a month and a hell cat the rest of the time.
No matter how your back aches—no matter how loudly your nerves scream—don't take it out on your husband.
For three generations one woman has told another how to go "smiling through" with Lydia E. Pinkham's Vegetable Compound. It helps Nature tone up the system, thus lessening the discomforts from the functional disorders which women must endure in the three ordeals of life: 1. Turning from girlhood to womanhood. 2. Preparing for motherhood. 3. Approaching "middle age."
Don't be a three-quarter wife, take LYDIA E. PINKHAM'S VEGETABLE COMPOUND and Go "Smiling Through."

Watch Your Kidneys!

Be Sure They Properly Cleanse the Blood

YOUR kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as nature intended—fail to remove impurities that poison the system when retained.
Then you may suffer nagging backache, dizziness, scanty or too frequent urination, getting up at night, puffiness under the eyes; feel nervous, miserable—all upset.
Don't delay? Use Doan's Pills. Doan's are especially for poorly functioning kidneys. They are recommended by grateful users the country over. Get them from any druggist.

DOAN'S PILLS

What Irvin S. Cobb Thinks about

SANTA MONICA, CALIF.—

Out here the new Authors' club is functioning nicely and abounds in surprises. For instance, at one of our luncheons, the following types were observed:

An Armenian, he being the only Armenian I ever met that didn't try to sell me a rug.

A visitor from Aberdeen who not only bought for himself but wanted to buy copiously for others.

A native writer who declined to talk about his own works.

A British writer in the same admirable fix.

A radio comedian who did not discuss his nationally important feud with some other radio comedian—probably saving that stuff for his regular broadcasts.

A house committee chairman who neither bragged nor apologized.

If we can only maintain this average, the Authors' club will become the most unusual organization on earth.

"Made in Japan."
A HIGHLY patriotic function there was a tiny American flag at each place, and on mine I found, in very small print, "Made in Japan."

And it is officially stated that at least three out of four of the totem poles sold to tourists in Alaska as authentic relics of the aborigines come also from the orient.

Collegiate Cosmeticians.

THE students' newspaper of the University of Wisconsin has made a scientific study of the subject and announces that the average coed (female type) uses enough lipstick in one year to paint four barns. That sounds like an exaggeration, or may be mouths are running longer and barns are running smaller. But the barns do look better for being painted.

Movie Family Parties.

MONTHS after a moving picture studio has changed hands or undergone an upheaval—such earthquakes being quite frequent—the new bosses sometimes are still finding, tucked snugly away in the payroll, relatives by blood or marriage of the ousted bosses. To you, reader, a new production may be either an epic or a flop, but out here it's often just a pleasant family party, extending even unto the third generation.

In other words, Hollywood has added a new line to the old spiritual, as follows:

"All Gawd's chillen got kinfolks!"

An Anti-War Prescription

IF SENATOR HIRAM JOHNSON of California had never done any other statesmanlike thing—and he's done many a one during his long service in Washington—this country would owe him a debt of gratitude for that act which he put through congress providing that America can lend no more moneys to any foreign government still in default for sums previously borrowed from us.

Can any sane man doubt that certain European powers, now heavily in debt to us, would not be at one another's throats if they were assured of financial backing by Uncle Sam for their fighting. In other words, they'd love to enjoy another world war so long as they didn't have to pay for it. But once in awhile, even a born sucker takes the cure, provided there's a Hiram Johnson to write the prescription.

The Mark "Sterling"

Fascinating History of the Term and Its Meaning Wherever Applied

THE name sterling silver has a fascinating history. The name originally was Easterling, but in the progress of time became contracted to sterling. The Easterlings were a group of men who, in the Twelfth century, came to England from Camden in Europe, a place to the east of England and from this geographical fact gained their name. The men formed a guild to uphold standards of excellence in their work, and to protect themselves from robbers and pirates.

The high standards pertained also to the coinage with which they paid those with whom they dealt. So unvarying was this money, and of such pure silver, that it became a gauge of excellence for all silver. The proportion of pure silver to the alloy was enormous, being at the ratio of 925 silver to 75 copper in each 1,000 parts. This same ratio pertains even today in all sterling silver.

So adamant is this ratio, that no deviation of it is permissible under the name sterling. Severe penalties are laid down by our federal statutes for infringements of this ruling. So when you see the word sterling on the silver you already have or on pieces you are buying, you know the articles are of the finest grade of silver. The silver may be marked 925 fine, or 925-1000, for all these markings indicate the same thing—sterling silver.

The term solid silver is not synonymous with sterling silver since the proportions may not be 925 fine. Solid silver is a more flexible term permitting more alloy.

The word plate, when applied to silver was once a guarantee of pure silver, but now the word is so associated with plated silver, that the name, silver plate, has lost its high standing. It is recognized in its true sense of sterling, by a comparative few persons, those only who know its

rightful significance, and are versed in names of silversmiths, recognizing wares as true plate or as plated silver thereby.

So absolute is the meaning of sterling as the highest grade possible in coinage or silverware, that the word has become synonymous of worth and value whether applied to silver, material things or to character.
