### Chicago Coeds Shake a Mean Leg

1—French officialdom assembles at ceremonies in which a bust of the late Myron T. Herrick, American ambassador to France, is unveiled. 2—Arthur J. Altmeyer, recently appointed chairman of the social security board to succeed John G. Winant. 3—Batallion of the famous International brigade credited with saving Madrid from assaults of the rebels.

University of Chicago coeds "swing it" in rehearsals for the annual show of the Mirror, women's dramatic society. A tower of the famous old school looms in the background, gazing down austerely on the modern collegiate chorus girls. Left to right: Marjorie Kuh, Frankie Burns, Marjorie Ryser, Louise Huffaker.

### G. B. Shaw Sits for the Sculptor

### NEW SOVIET OFFICIAL

The gadget being demonstrated here by Mme. Sara Kopelle, movie drama coach, and Nan Grey, film actress in Hollywood, is called the kymograph. Developed by a London physicist, the device registers by graph the vibrations of the human voice, making mistakes in speech plainly visible. It is being used in the training of actors and actresses.

George Bernard Shaw, British playwright and caustic critic of modern life (left), pictured in London with the sculptor Sava Botzaris and the bust which sculptor Sava Botzaris is making of him which is to be cast in bronze and gilt.

A recent photograph of Vice Premier Valery Ivanovitch Mezhlauk, who has been appointed to the post of commissar of heavy industry of the U. S. S. R. to succeed Gregory K. Ordjonikidze, who died recently. Mezhlauk is well known in the United States, having traveled extensively about industrial centers here. He is an exponent of American methods of production.

### Vision of the 1939 Golden Gate Exposition

### Savant Discovers New Comet

A vision of the 1939 Golden Gate International exposition, now rising from the waters of San Francisco bay. This is Architectural Artist Chesley Bonestell's conception of that section of the 400-acre exposition which faces Yerba Buena island and the Bay bridge, and is at right angles to the main gateway.

Dr. Fred L. Whipple of the Harvard observatory, who announced recently the discovery of a new small comet in the constellation Canes Venatici (the hunting dogs), is shown in his office at Harvard university, checking over negatives made at night of the stars. The comet, which has a tail about "one degree long" and is of the twelfth magnitude, was discovered by the astronomer when he examined a photographic plate he had taken.
