**Announcement . .**

I have just completed a year of practice, as a Chiropractic Physician, in Hood River. It has been a year with the usual hardships endured by one who is endeavoring to build up a business in a new location, but a year that has made me certain that I want to remain in Hood River as long as I practice my profession.

In my practice here I have found a great many people who know the value of Chiropractic as a method of treating disease, but I have also found many with a lack of understanding of Chiropractic, particularly as to the educational requirements, methods of treatment and the benefits in conditions other than simple "back-ache." It is with this in mind that I am preparing a series of articles on "Modern Chiropractic." The first one will be "What Is Chiropractic?" and will appear in this newspaper October 15.

If your physical condition is not what you think it should be, why not come and see me? You will find Hood River has a drugless clinic that is as completely equipped as any in the state.

Consultation is free and you are not obligated to take treatments.
