

CASCADE LOCKS

(By Clara Nix)

Friends and neighbors wish to express their deepest sympathy to the Frank Moran family upon the loss of their young son, Mickey. Little Mickey will be greatly missed by his many friends and pals.

New Year Party Success

The party given at the I. O. O. F. hall on New Year's Eve by the Cascadia Rebekahs and Odd Fellows was a huge success. The hall was beautifully decorated with silver rain and ferns. It was a gala affair with horns, whistles and serpentine galore. Nearly all of the invited guests were present and everyone had a merry time. More than a hundred and fifty members and guests enjoyed the occasion.

The evening was spent dancing and playing cards. Refreshments were served just before the guests departed.

The committee in charge was composed of Mrs. Bess Harrington, Mrs. Anna Haggblom, Mrs. Martha Carns, Mrs. Bernice Murray, Mrs. V. L. Garner and Mrs. Clara Nix.

We do hope they will have more of these get-togethers.

Bonneville Rate Tariff Near Decision

Speaking before a group at Aberdeen, Wash., Administrator J. D. Ross stated that Bonneville Dam electric rates probably will be set within three weeks.

Ross cautioned residents of Grays Harbor and other surrounding counties not to consider using Bonneville power in competition with the electric energy offered by private companies without first offering a fair purchase price to the utilities. He said two competitors could never give as good a rate as a single outlet.

Jack Cluck, attorney for the state Grange and several power districts, said the Pacific County district was considering purchasing both the Willapa Harbor Electric Company and the Grays Harbor Railway & Light Company by agreement if possible and condemnation if necessary. Both companies are subsidiaries of the same holding company, the Federal Light & Traction Company.

No power district could be formed in Grays Harbor County until the regular election next November.

CHEMICAL PLANT EXPLAINED BY OFFICIALS

(Continued from Page One)
tively, of the weed killing chemical. "Construction of a plant for sodium chlorate manufacture will begin shortly on a site near Bonneville Dam in Oregon, it was announced in a recent statement by President Leonard T. Beale of the Pennsylvania Salt Manufacturing Co., and President Ralph N. Chipman of the Chipman Chemical Co. Land for the plant has been acquired by President Beale's Company, one of the most prominent in the chemical in-

dustry.

"This site was selected because of its close proximity to Bonneville Dam, a federal project which will supply low cost electric power. Tidal water facilities make both water and rail transportation available.

"Planned production of sodium chlorate at the Bonneville Dam plant will not only adequately supply the needs of agriculturists of the Northwest, but the increasing demand from farmers throughout the country as well. The Chipman Chemical Co. has promoted the use of sodium chlorate for many years, not only for the control of noxious weeds but for the use by railroads in maintaining a weed-free right of way. Many of the large rail systems use it continually.

"Crop loss, through weed damage, is three times greater than that caused by insects in the United States, agricultural authorities report. It is 1 2-3 times the loss from plant diseases and 12 times that caused by livestock diseases.

"There are a number of weed pests, such as bindweed, sometimes called creeping jenny, morning glory, field bindweed, Canada thistle, hoary cress, and others that are 100 per cent crop destructive. When these weeds are prevalent on a property, it is an impossibility for a farmer

to procure a loan or mortgage on his land.

"For years, noxious weeds have been spreading in the Northwest and on the Great Plains. Farm authorities realize today that these weeds are as great a menace to agriculture as soil erosion. In ten years bindweed will double its acreage spread if not checked.

"Sodium chlorate is recognized as effective, economical specific for weed destruction. Realization of this, through experience in recent years, has caused so great a demand for the chemical that Presidents Beale and Chipman decided it would be to the interest of American agriculture to join their industrial forces in sodium chlorate production and distribution. In this, The Pennsylvania Salt Manufacturing Co's fully developed modern process will be used."

ARMY POPULAR

The advantages of service in the United States Army are being recognized more and more by the young men of Oregon, according to Major H. D. Bagnall, District Recruiting Officer for the Portland District. The Major reports that more men were enlisted during the month of December, 1937, than in any previous December since 1923. A total of 146 men raised their right hands and said "I do" during the past month.
