Wednesday afternoon I am in Cascade Locks and Wednesday night I may be reached at the Roosevelt Inn in Bonneville. Other times call us collect at Hood River 3761.

—Jack Travis.

### SUBSCRIPTION RATES

Three months .....	\$0.50
Six months .....	\$1.00
One year .....	\$2.00

## INDUSTRY MOVES

Industry is moving to the south and west at a rapid pace, according to close observers. Ten years ago textile factories began leaving the east for southern locations. Today the movement is not confined to textile mills; factories of many kinds are now joining in the move.

Lower wages, reduced living costs, lighter taxation and freedom from labor union troubles are declared to be back of this movement. It is noticeable that in choosing new locations the factories are avoiding large centers of population. Industry decided years ago that concentration in and around the big cities of many manufacturing concerns is detrimental to both themselves and the country.

This decision, and the results now evident in carrying it out, are going to mean much to towns like Cascade Locks. It is bound to result eventually in a decrease in size and importance of the big cities of the country and the growth of our smaller towns and cities as industrial centers. The southern states, for instance, already have shown plenty of proof of this. The growth in towns between 1,000 and 5,000 has been remarkable through the south in the past 10 years. Will these towns not become the fair-sized cities of the next 10 years? No, say the wise ones. Industry has learned its lesson. It prefers to do business in many small towns rather than in one large city. Not only is this seemingly the wisest way for industry, but best for the American people.

### A FINE INVESTMENT ALWAYS

There's no excuse for anyone with a plot of ground large enough for growing vegetables not having a garden, and no matter what the weather conditions are at this moment, it is not too late to start one that will prove a fine investment before the coming summer is over. Not only is it a good investment, but a garden affords a healthy and wholesome exercise, and since many people fail to get a sufficient amount of exercise it may also prove economical from still another standpoint—it may save doctor bills. But it is the satisfaction of having fresh, home-grown products for the dinner table, right out of your own garden instead of out of your pocket, that stamps a garden as worth while. We know it is pretty hard to keep from "burning out" under the hot suns that will come a little later on, and it takes a lot of fighting to lick the weeds. But there is always more genuine pleasure in doing something hard than something easy—and that is just one more of the many reasons why the man or woman who is not garden-minded is losing out on a fine investment.

## RAILROAD SUBSIDY OPPOSED

Talk is heard of subsidizing the railroads, if the increase in freight rates will not care for the expense of operation. This is a movement which should be squelched at the start, for there will be no end to requests for paternalistic help. Many lines of business could find reasons for a government subsidy.

The railroads should be required to clean house before receiving any consideration along the line of a subsidy. Railroad wages may not be too high, although they are certainly high enough, but there are many ways in which revenues are bled by payments for overtime, out of all reason. Too many bureaus are maintained with positions at high salaries, and the Association of American Railways alone supports 21 bureaus at great expense. There are too many subsidiaries whose income is not counted as transportation revenue.

Each railroad keeps scores of solicitors, whose salaries and office and traveling expenses run into huge sums of money. The shippers must bear this added expense. The carriers have too many unnecessary expenses and too much overhead to come forward with good grace asking for a government subsidy.

—Yakima Morning Herald.

## KITE DANGERS

To the average boy a kite is nothing more than a few sticks and some paper and twine. It appears on the surface of it to be just about the most innocent toy ever invented. And yet, newspapers in various parts of the country have found it necessary to issue warnings to kite flyers, especially since several fatalities have resulted from it. The kite, so long as it consists of only paper, sticks and string, is not dangerous. It is when a few feet of wire to form the frame, or a light strip of copper to help form the tail are added that the kite becomes dangerous, and the danger is traveling in every electric wire that runs above the head of the boy who is flying the kite. Coming in contact with a "live wire," the kite that contains metal of any sort becomes a conductor of electricity, and if it happens to be a high-tension wire, enough electricity can be carried down through the kite string to kill. Children are not expected to know this, and the kite-flying season is at hand; parents should see that they are cautioned without delay.

A Kansas woman's club debated for four hours the most dreaded disease among women, and then reached the conclusion it was—of all things—lockjaw!

It remains a debatable question whether the automobiles are ruining the younger generation or whether the younger generation is ruining the automobiles.

Man is never satisfied. If he is poor, he stews over his debts and if he gets hold of some money he can't sleep for fear somebody will steal it.

People who have a reputation for making money hand over fist usually manage to keep their hands and fists over it, too.

Another trouble with the soft answer is that while it may turn away wrath it won't turn away a hard-luck story.

Thinking her nose is shining makes a woman feel as uncomfortable as a four week's growth of beard makes a man.

We are told that there are 293 ways of making change for a dollar. That's interesting, but how do you get hold of the dollar?

Some few girls have a fine sense of humor, but most all of them have a fine sense of rumor.

## CELILO

O! Celilo, Mineehaha;  
Close beside your laughing water,  
Tucked in shacks, instead of tepees,  
Wafts the Indians' happy laughter.

With hair bobbed,  
Instead of long braids  
Shirt and skirt instead of buckskin,  
High heel shoe, instead of moccasin;

Using language, of perfect English,  
Camped they there to catch the big fish;  
Bubbles high! bubbles low;  
Laughing water, O! Celilo.

—Alma Bedsaul,  
Parkdale, Ore.

## Recipes . . .

### STRAWBERRY SHORTCAKE

Sift together 1 pint of flour, 1 teaspoon of salt, 4 teaspoons of baking powder (level), chop in 2 tablespoons of butter. Wet with milk for a soft dough (about ½ cup usually.) Bake 12 minutes. Split and butter and put the following between and on top: 1 cup crushed strawberries, 1 cup sugar, 1 beaten egg white. Beat all together until firm. Then trim the top of cake with whole berries or some cut in halves.

### Fish Croquettes—

One pint cold boiled fish, free from skin and bone, minced fine, with 1 pint hot mashed potatoes; 1 tablespoon butter; ½ cup hot milk; 1 egg well beaten; pepper and salt and little chopped parsley.

Mix thoroughly and let cool; when cold mix into balls, dip into beaten egg, roll in bread crumbs and fry in hot fat, or just roll them into flour if egg prices are too high. For a sauce, add 2 hard-boiled eggs cut in thin slices to white sauce.

## Household Hints

To improve the flavor of carrots, turnips, cabbage, onions and peas, add a fourth of a teaspoon of sugar for each three cups of water used in cooking.

Meat rubbed well with vinegar before cooking is less likely to be tough.

Fresh rhubarb needs little water when it is cooked as a sauce and none at all when it is used in a pie.

Candlewick spreads should be washed in plenty of hot water and soap suds. They should then be rinsed several times in clear, warm water and hung up in the shade to dry. When they are perfectly dry, they should be placed, tufted side down, in a cotton blanket and pressed gently with a warm iron.

When using buttons for trimming it is best to use the shank style of button. Instead of sewing on in the usual way, work tiny buttonholes the size of the shank. Slip the button into these holes and fasten on the underside with a safety pin. This saves much time when laundering and lengthens the life of the button.

Make leftover rice into cakes, fry them in bacon fat and serve with maple syrup. They're delicious.

Too much flour in cakes causes them to lump in the middle or have a tough, cracked crust.

To prevent griddle cakes from sticking, rub the hot griddle frequently with salt firmly in a piece of cloth. Keep this up all during the baking.

The dwarf dahlias used for bedding purposes are single but are very pretty and have a long flowering season. The Coltness gem hybrids are the best known, but several other kinds are being listed in this spring's catalogues. These dahlias are grown from seed.

Scientists at the University of Southern California have discovered that "the very chemicals in onions and garlic which bring tears to the eyes have germ killing powers which may be useful in fighting disease." Investigations are now being made to determine the usefulness of these mildly poisonous chemicals in healing diseases caused by germs.

Approximately one and one-half billion dollars are spent on highway construction and maintenance in this country every year. Only about one per cent as much is spent in organized traffic safety work, according to Secretary of State Earl Snell.

## Land Transactions

Following is a list of transfers of real property, recorded in Hood River County from April 13 to April 20, as published by the Hood River Abstract & Investment Co.:

Eleanor A. Darby to E. L. McClain, Jr., quit claim deed, conveys tract 75-ft. x 100-ft in NE corner of block 2, Riverview Park Addition—Hood River.

Central Lumber Co. to John & Adeline Meyer, deed, conveys strip 5-ft. x 50-ft in SE corner of lat 3, block 10, Cascade Locks Addition, and S½ lot 4, except east 10 ft.—Cascade Locks.

Richard M. Dukes, Helen Lucile Dukes Hoel and Arnold O. Hoel, to Charles V. and Catherina Rathbun, warranty deed, conveys lots 5 and 6 in block 4, Winans Addition—Hood River.

Edgar G. & Adela Krussow to State of Ore., by and through its State Highway Comm., warranty deed conveys a parcel of land lying in SE¼ SE¼, sec. 1 T 2—About 2 miles SE of Hood River.

K. C. and Josephine Bucklin to Percy F. and Margaret F. Bucklin, warranty deed, conveys lot 4 in Woodmen's Subdivision off block 8 of Pleasantview Addition—Hood River.

Graham Dukehart and U. S. National Bank, trustees of estate of Edward MacGregor, deceased, to Lillian H. Thornquist, deed, conveys lot 1, 2 and easterly 37.6 feet of lot 3 in block A, also an easement 16-ft. wide across northeasterly portion of lot 2, and easterly 37.6 feet of lot 3, block A.—Hood River.

Anton Coperude to William Coperude, warranty deed, conveys tract in SE¼ 1W¼, Sec. 22—Mt. Hood.

A. S. and Vera M. Kolstad to C. W. & Betty Hamilton, conveys tract 101.9 feet x 78 feet in NE corner of unplatted portion off Riverview Park Addition, just west of Bennett tract.—Hood River.

Grace E. Lang to State of Oregon by and through its State Highway Commission, warranty deed, conveys a parcel of land lying in SE¼ NE¼, Sec. 5 T 2 N R—Lindsay.

Masonic Homes of California to Julia E. Lamb, deed, conveys E½ lot 15 in block 9, Hull's Subdivision of lots or tracts A and B of Pleasantview, subject to contract of sale with George L. Emry and wife, which contract is this day assigned to said Julie E. Lamb.—Hood River.

Mark Skinner, Supt. of Banks, to W. B. Bower, deed, conveys W¼ NE¼, Sec. 26 T 2.

## Meetings

American Legion, Bonneville Post, No. 88, second Tuesday of each month at the Civic Auditorium, Bonneville.

Bonneville Parent-Teachers Association — First Wednesday every month, study club at 1:30, regular meeting at 2:30 in Bonneville grade school auditorium.

Bonneville Rod & Gun Club—Fourth Monday of each month at Civic Auditorium, Bonneville.

Bridal Veil Lodge, No. 117, A.F. and A.M. — School house, Latourelle falls, second Saturday in each month. Visiting Masons welcome.

Cascade Yacht Club—Thursday, cabin 8, Enquist addition. Everyone welcome.

Cascade Locks Chamber of Commerce — Merrill's dining room, Tuesdays, noon.

Cascade Locks City Council—Second Monday of each month, city hall. Cascade Locks Boy Scouts — High school, Tuesdays, 8 P.M.

Bonneville Boy Scouts—Grade school auditorium, Tuesdays, 7 P.M.

Cascade Locks Townsend Club—Odd Fellows hall, first and third Fridays, 8 P.M.

Rebekahs—Cascadia lodge, Cascade Locks, first and third Wednesdays of each month, Odd Fellows hall, 8 P.M.
