

## DEPICTING PEOPLE AND EVENTS

### Lion Cub Quints Thrive in Circus

Clyde Beatty, wild animal trainer touring with a circus, has a soft spot in his heart for the baby lion quintuplets which are on the road with him. Birth of five lion cubs is a rarity, according to Beatty, and extremely sensational in the animal kingdom.

### 'Dizzy' Confident Arm Is in Shape

Take it from Jerome "Dizzy" Dean, his "arm" is all right. He also stated that the shoulder which was injured last season has been given a complete rest all winter. Left to right, Charles Leo ("Gabby") Hartnett, manager of the Chicago Cubs; Andrew Lotshaw, trainer, and Dizzy himself at Catalina Island, Calif.

### BREATH OF SPRING

Breath of Spring could be the name of this smart ensemble in early leaf green coloring worn at Hampshire House. The monotone green frock is of a soft imported wool and the bolero jacket of green and yellow crossbar tweed. The bag is of the same fabric.

### Modernized Cavalry Practice Wartime Maneuvers

Weather conditions and rough terrain do not stop the mounted soldier. He operates as well in fog or rain as when atmospheric conditions are favorable. To the horse cavalry the passage of bad terrain is all in a day's work. Graphic illustration of this is furnished in the picture at the left where a 75-mm gun battery unit nears the top of a steep hill during First Cavalry division maneuvers at Fort Bliss, Texas. Right: A 75-mm gun unit photographed during night firing.

### NO MORE NIGHTMARE

The "spud" is no longer a cause of nightmares for the men of the 138th regiment of the Missouri National Guard, assigned to kitchen police duty. A bushel-size potato peeling machine which whirls the potatoes between abrasives, wearing down the potatoes instead of the enlisted men, has been installed in the regiment's armory at St. Louis.

### World's Largest Carillon for New York Fair

Work on a 75-bell carillon to mark the hours and provide music for New York World's fair visitors was started at the Deagan plant in Chicago recently. The carillon will be the largest ever built. The 25-ton musical instrument will be removed to White Springs, Fla., after the fair, where it will be placed in the Stephen Foster memorial. Left: A workman checks a collection of more than 100 tubular bells from which the 75 will be selected. Right: Miss Jeanne Brown sets the Westminster chiming device which will automatically sound the hours on the carillon.

### CLOSED DOOR POLICY

As a protest against what he terms a "misuse" of science by the totalitarian states, Professor Percy Bridgman, Harvard university physicist, has shut his research laboratory to visitors from those countries and refuses to discuss his experiments with them.
