FUBLISHED EVERY FRIDAY LAFAYETTE - - OREGON

The Tariff on Paper.

Congressman Whiting made speech in the House on the tariff as it concerns paper. He deprecated any change in the rates, notwithstanding paper is made here, he said, of as good quality and quite as cheaply as abroad. He concluded as follows:

This ought to be a satisfactory condition to the consumer of paper, and to the laborer who makes it, and I repeat that I am at a loss to understand why in the absence of any complaint on the part of the consumer, laborer or manufacturer, there should be any proposition to change the tariff rate. It will be said in reply: If these things are so, why do you want a tariff on paper at all? My answer is that we want a tariff to prevent the European manufacturer from sending his surplus production here-thus breaking down our market, closing our mills and throwing our labor out of employment. We welcome home competition, but we do not want to compete with the whole world, and especially with that labor which does not receive one-half the compensation of American labor. The advocates of the policy of protection to American manufacturers claim that the consumer obtains the product at a reasonable price through competition among our own people, and the facts I have narrated furnish the most conclusive proof that the paper industry is a marvelous instance of the good result and practical effect of such a policy, and of the correctness of the position taken by those who favor protection. When it is now proposed to reduce the duty on paper we confront you with a condition, not a theory-the condition being high wages, low cost to the consumer, constant improvement in quality, and no general demand for any change in the tariff.

It is estimated that not less than \$500,000,000 are invested in wateringplace and tourists' resorts in this country, the Jersey coast leading off with at least \$100,000,000.

MICHAEL CUDAHY, once a bright young Irish hog-chopper, and now the partner of Phil Armour; is worth over \$2,000,000, and he and his wife are leaders in Chicago's best society.

A MUSEUM fakir in a Western town recently announced that he would exhibit an educated man, born and bred in Chicago, who could, novertheless, speak only broken English. When the people went in to see the curiosity they found that he was a stam-

No city on the Pacific Coast has blown its trumpet louder than Los Angeles One would imagine that it was doubling its population and wealth every week, and yet it is proposed to discharge thirty of the schoolteachers and oblige those retained to do double work for the same pay.

## TELEGRAPHIC.

AN EPITONE OF THE PRINCIPAL EVENTS NEW ATTRACTING PUBLIC INTEREST.

Three boys-Jacob Heem, Samuel Ditson and Wm. Anderson—were drowned in the Missouri river near Omaha, while bathing.

Nearly the entire business portion of Suffolk, Va., was destroyed by fire, which started in Webb's oil warehouse. The losees aggregate \$400,000, with

the cause. Jacob Moore, a carpenter, shot and

killed his sister-in-law, Mrs. Mary Moore, at Detroit, Mich., then shot at her daughter, and missing, shot him-

Kate and Dennis, children of Patrick J. Byrnes, of New York, were drowned in the harbor by the upsetting of a rowboat. The father was saved with difficulty. A. L. Pruden, assistant secretary to the president at Washington, received

intelligence that his son, aged 16, was killed in an accident on his farm in A masked robber entered the farm house of Conrad Doup, near Cleve-land, Ohio, and beat the old man with

a club, bound his hands, and stole

Willie Ellsworth, 18-year-old son of Dr. Ellsworth, an old resident of La-Porte, Ind., was shot in the bowels and killed by Oliver White, another young fatal. man of the same age, during a quar-

Fremont Emmons, a young man who deliberately stabbed Bertha Shults at Pawnee City, Neb., a short time ago, because she had refused his proposal of marriage, was taken from the authorities and lynched by a mob.

E. B. Eddy's lumber mill at Birchton, Canada, burned, together with the entire season's cut, valued at \$420,-000. A number of workmen's house and tool-houses were lost. The total loss will amount to \$500,000, on which there is an insurance of \$100,000.

On the Ohio Valley railroad, be tween Henderson and Marion, Ky., William Cardwell, James Nichols and Sam Nunn indulged in a shooting scrape. Cardwell and Nunn were fatally shot, and Nichols jumped from the train and escaped.

A Burlington fast train, west bound ran into a car which got on the main track near Round Grove, Ill. The en gine and one car were completely wrecked. The engineer and fireman were badly hurt. None of the pas-sengers were injured.

Fifty armed men visited the jail at Carthage, Tenn., and took out O. H. Handly, who, on September 17th last, killed J. B. Warman, a deputy sheriff. The sheriff refusing to give up the keys, the mob, with axes and crowbars broke into Handly's cell. The murderer was carried across the river and hanged to a tree in sight of the

D. F. Ford, an old prospector of Fucson, Ariz., has been robbed and murdered by Papagoes near the Quialand ranch, on the Quijetos road. Ford has been missing for two months, but was thought to be prospecting in the mountains till a few days since, when one of the Indians disclosed the murder, and offered to escort a party

An inmate of the asylum at A1 . of the patients in the female ward in some manner opened a hot water faucet in the bath room, and allowed the tub to be filled. Mrs. Crull, seeing the tub full, threw off her clothes and jumped in. She was cooked to death before assistance arrived. Her trouble was melancholy.

Deputy Sheriff Hayes, of Blakfoot, Idaho, arrived at Bozeman, Mont., and identified Alex. Woods, the negro remurdered his wife and was senteneed to be hanged on June 20. At the Derby, who has just reached his ma jority, succeeded to a rent-roll of at been at large ever since. Hayes had least £150,000 a year, and an immense the necessary requisition papers with him and took his prisoner back to I laho. The hanging has been fixed for August 17.

Deputy Sheriff L. S. Elmer murdered Miss Mollie Korbel, at Washington, Dak., under circumstances of peculiar atrocity. She was a domes-tic in the sheriff's employ, and had been interested in the management of the household during the temporary absence of the family. She had just given the prisoners supper when Elmer, who carded in the house, asked her if see intended going out that evening. She replied that she would if she chose, whereupon Elmer shot her three times, causing instant shot her three times, causing instant death. He had not been paying her attention, and no cause is known for his set. He was at once locked up. A crowd gathered and tried to storm the jail, but the ringleaders were arrested before anything was done.

## COAST CULLINGS.

DEVOTED PRINCIPALLY TO WASHINGTON TERRITORY AND CALIFORNIA.

A young man named Peter Leonard, d Sacramento, Cal., was caught between two fruit cars in a freight yard, and crushed to death.

A son of Morris Murphy, 13 years old, of Marysville, Cal, was accidentally killed in a drift in the old mine at Smartsville.

A daughter of Dolph Mills, colored, of Yazoo C.tv, Miss., poisoned her father and three brothers fatally at breakfast, Family dissensions were

Won Ah Ly, who murdered another Chinaman in San Francisco July, 18, was arrested in Ah Fook's place, Chinatown, in San Jose, by Chief of Police Brown.

Frank Havery, an employe in the Denn Lomond vineyard in Santa Cruz, Cal., was shot and killed by Carl Russ, a fellow workman. shooting was accidental.

H. W. Platte, a well-known real es tate dealer and pioneer resident of San Jose, Cal., fell from a stepladder at his residence and broke his neck, dying instantly.

The east and west bound freight trains collided at Antelope station, nest Sacramento, Cal. Ten cars are badly wrecked, and three engines dis-abled. No one was injured.

Wm. Hood, conductor of a passenger train, was crushed in the chest, while coupling cars near Vacaville, Cal. It is thought his injuries are A fire broke out in the Hidden

Treasure mine, near. Forest Hill, Cal. A number of miners were killed and some who went to their rescue were also killed.

W. B. Howard, a piano agent of Los Angeles, Cal., deserted his wife and children, leaving them penniless. It was also learned that he was a deulter in a large amount. John Blake, a laborer, about 45

rears of age, was run over and killed by a freight train at San Mateo, Cal. He was sleeping under a hay car, and the train in switching ran over and Charles Kennett's boot and shoe

tore was being burglarized at Seattle, W. T., when the proprietor, sleeping in the back part of the store shot twice. The man was not hit, but was captured by the police. A robber stopped a stage at San

Luis Obispo, Cal., containing six persons, made them all stand in lire, robbed them. He also obtained Wells, Fargo & Co.'s treasure box, containing about \$1,000 and made good his es-

Near Red Bluff, Cal., the clothing of two young Indian women, passen-gers on the Redding local train, bound south, caught fire in some inexplicable way, and in their fright they jumped from the train, one being instantly killed, and the other dying shortly after. The remains buried where they were found.

Antone Klespar, a German living at Port Kenyon, Cal., who had been away from his family for some time, returned, and asked his wife to live with him. She refused, and he cut her throat with a pocket knife. Then he came to Ferndale, procured a box of "rough on rats," took it and died in a short time.

Wm Bein a miser, at San Fran cisco, left a fortune of about \$250,000 to charitable institutions, but it was chorage, Ky., Laura Crull by name, declared void, on account of a law literally boiled herself to death. One compelling a will leaving an estate to out at least thirty days before the testators death. Bein made his will just twenty-eight days before his death.

The Napa train ran into and killed Alexander Carmichael, near Vall jo, Cal. He was 13 years old, and, with another boy, ran away from home. He was walking on the track and had sat down on a rail to rest, and fell asleep. The engineer of the trun did cently arrested there, as the man who not see him in time, and he was struck on the head, and soon died. The other boy narrowly escaped.

At Dangber's ranch, near Genor Nev, a band of Washoe Indians be came engaged in a drunken quarrel. One of the band was knocked with a club and then tramped to death. His head was beaten in with bricks, and nearly every bone in his body broken by the infuriated savages. While he lay, begging for his life, half a dozen Indians were jumping up and down upon his body until he was a shapeless mass. The murderers fled to the hills and have not yet been captured.

A fatal shooting scrape occurred at Merced, Cal. It seems that a man named Williams borrowed a pistol and started out to kill Dan Donovan, against whom he had a long-standing grudge, Failing to find him he got in a quarrel with a man named Morley. Williams was drunk. He fired at Morley, missing him, but striking a is in the stalk may sweat out. Then man named Adams in the chest. give it an hour or so of sun and air, Adams died after lingering a few and it will be found to be more thor-He was a blacksmith, and re-

## AGRICULTURAL.

DEVOTED TO THE INTERESTS OF FARMERS AND STOCKMEN.

To Kill Lice and Ticks on Sheep. The following from the Indiana Farmer a m st excellent method, and worthy the attention of every man who owns sheep, whether they have lice, ticks or any other vermin or not. It is practiced by Mr. Bothwell, the largest sheeps

the largest sheep-grower in Missouri: Take one quart of sulphur to every gallon of salt, mix thoroughly, and put the mixture into a trough. your sheep have access to it. Set your trough in the presture where your sheep are most accustomed to lying down, or in under a shade tree, and keep the mixture dry by n aking as shed out of boards. Use the mix-ture until you are confident the lice or ticks are all killed. Any one that has never used it will be surprised at the results.

Five hundred thousand orange trees have been set out in California and their cultivation is extending.

The whole value of fences in the United States may be set down at \$2,000,000,000, and it costs \$100,000, 000 annually to keep them in repair

By far the best potato for late spring use is the Blue Imperial, It does not sprout readily, but remains compara-tively solid until early-planted new potatoes are ready for use.

Now is the season when butter taints very quickly, and none more quickly than the choicest article. is a time for special care in manufac-ture, and for the earliest practicable consumption. The wool product of California has

veraged nearly 40,000,000 pounds per year since 1880, bringing to the State \$6,000,000 a year. This is about oneseventh of the entire wool product of the country.

Penuts are becoming a popular and profitable crop in Georgia. The peanut plant makes forage and rich and nutritious hay, and 125 bushels to a single acre will raise and fatten many pounds of bacon. So long as the milk is warmer than

the surrounding atmosphere it is throwing off vapor and is thereby purified. It will not then absorb odors, but the germs of fungi and other microscopic life may fall into it and do it injury. Odors in the stable indicate the air

therein is impure. Use of absorbents is very important in summer. Once a week the stable should be sprinkled with a solution made of one pound of copperas in two gallons of soft water. A churn should be scalded with

boiling water, made alkaline with washing soda. Every particle of milk and cream should be removed. After being well washed the churn should be rinsed again by using boiling water. If the fruit is likely to be at all

crowded, the removal of a third or even of a half of it will often result in a much larger and finer crop than if all had been allowed to remain, and the pecuniary returns will be correspondingly better.

It is generally acknowledged that winter dairying pays best, and for this reason farmers should give more attention to this part of the business. To attempt this next winter suitable feed must be raised this stimmer, and good warm stabling provided.

Corn and potatoes may often be top-dressed to advantage after planting, providing fine manure is used. The cultivation of these crops during n will mix the manure charitable organizations to be made the soil much more perfectly than it could be if plowed under.

Serouts of suckers in apple orchards should be promptly removed. They frequently start in great numbers where the pruning has severe, and they should be pinched off as soon as they appear. Removed when in leaf, suckers or sprouts of this character are less liable to have successors.

One advantage in keeping the soil loose is that when a shower comes, no matter how hard, the water does not run off, but goes down into the soil, whereas, if the surface of the soil be hard, some of the water will run off during a heavy shover. Hence, culluring a dry season, but enables the soil to absorb a larger proportion of water when rain falls.

When grass has stood to long and overripe before cutting, it look dry that it seems to need but little curing before putting into the barn; yet late-cut hay is as frequently damaged in the mow by not being well-cured as is that which is cut before it has bloomed out. It is most fre-quently "smoky." To prevent this it should be cut when there is no dew or rain upon it, and put into heaps, in which it should stand twenty-four hours or longer, that the juice which hours. He was a blacksmith, and re-spected by all. Williams was arrested. days of hot sun.
