Escaped Convict Killed. Fire in La Angeles, Disastrous Collision

. Mysterious Deaths.

George Friedenberg, a saloon-keepe was found dead in his saloon at San Francisco, having committed suicide by taking poison, because, it was alleged, of jealousy of his wife, Wm. C. Luders, a book-keeper, and W. H. Waldron, a printer, together with Friedenberg, had been drinking for several days. Luders was found on dose of morphine, the next day, and he died at the hospital. Shortly af-terward the body of Waldron was found in a hallway on Howard street. alt is supposed he died from alcohol-

ism. Coronor Stanton is nonpulssed at the turn events have taken, as these two were the only witnesses he relied upon for the inquest on Friedenberg, and as Luders in conversation Friedenberg, it is supposed he committed suicide, though no motive is apparent.

Disastrous Collision at Sea. A dispatch received at the Merwith the British ship Ardencaple, bound from Liverpool to Calcutta. The Wemyss, which sunk, carried 43,-342 centals of wheat, valued at \$63,-700, shipped by G. W. McNear. Ardencaple was badly damaged. She port on the coast of Brazil. A part of the crew of the Wemyss was

Shot by a Policeman. Officer Whalen, of San Francisco. heard the cries of a man on the corner of Russ and Folsom streets. Running there he found Officer Glennon, with a pistol, standing over a man who was bleeding. On examination it was found that he had been shot by Officer Glennon in three places. He was taken to a hospital, where he lies in a critical condition. The cause of the shooting was not disclosed.

Wholly Unknown An unknown man was found by a policeman before daybreak, lying in an insensible condition at the foot of a bank near the Union Iron Works, in San Francisco. He had fallen over the bank, which is twenty feet high while drunk. At the receiving hospital his injuries were pronounced fatal. All the ribs on the left side were fractured, as was his right hip, and he had suffered contussion of the brain. Who the man is, is not known. There was nothing on him that would help to

Escaped Convict Killed. There have been frequent fires and robbery on Fowler Bros.' railroad, near Dutch Flat, Cal., causing heavy losses.

On seeing the officers two ran away and the third was killed. Henry Watters, one of the hunting party, was shot in the leg by one of his own party, but not much injured. The men are supposed to be escaped convicts.

Fire gutted a two-story wooden

building in East Los Angeles, owned by L. Stronmee. The lower portion was occupied as a tin shop and picture store, and the upper floor was used as a lodging house. The loss is esti-mated at \$2,500, partly insured. The interior of a three story structure ad-joining, owned by J. N. Abbott, was flooded causing a loss of \$1,100, in-

sured. Successful Military Expedition. Capt. McConihe, commanding offiper of the recent army expedition to Yaquina bay, rode into Portland and telegraphed the news of his arrival to killed the youngest child and his wife, Vancouver. The expedition, which consisted of two companies of infantry

and a platoon of artillery, took course southerly from here on the west side through Sheridan and the Grand Ronde Indian reservation to exploring party was fitted up with a pack train, and mounted upon mul-s. went down the coast to Yaquina bay The captain, with the main command came back east of the Coast mountains, and took their march through King's valley and along the route of he Yaquina river to Yaquina bay. From this point the whole command returned on the west side by a different route, having marched in all about 400 miles. They are now stationed about three miles up the river. "I am well pleased with the result of the expedition," said Capt. McConhie. both in the advantages accruing to the troops from the marching exper-ience, and the successful passage of

Such tramping expeditions are an-nually customary, and this is the only one this year." Louis English, while at work dig ging a deep trench for a sewer at Scattle, W. T., was caught by a cave-

way picked over the rocky headlands

dug him out in a half-dead condition. It is hardly expected, he will survive internal injuries, resulting from the pressure he received.

Poisoned by Canned Goods. Three families have deen poisoned by eating canned goods at San Diego. and the engineer and postal clerk are Cal. Four memb rs of the family of badly injured. W. F. Baltimore are prostrated, and Katie, the youngest daughter, is not expected to recover. Four members of the family of Capt. Charters and Mrs. Miller and her daughter, are also in a critical condition.

Attempt to Wreck a Train. An attempt was made to wreck the overland train near Los Angeles, Cal. The train reached a dark point near the outskirts of town, where the track is on an embankment. When the engineer saw something on the track he reversed the lever and put on the air brakes, but the cow-catcher struck the obstruction, which proved to be a telegraph pole, evidently laid across the track by some unknown persons.

Seven Months' Fire Record. Following is the fire record of Portland, Or., from January 1 to August 31, as taken from the record of the fire commissioners: During the month of January there were twenty-two alarms. The total loss was \$4,224 65, on buildings \$1,408 15, contents \$2,816 50; total amount insured for \$10,700, on buildings \$4,600, contents \$6,100; total insurance paid \$3,649 65, on buildings \$1,2,08 15, on contents \$2,441 50. During February there were six alarms. Total loss \$558, on buildings \$105, contents \$455; total amount insured for \$850, buildings \$100, contents \$750; total insurance paid \$388 25, buildings \$55, contents \$333 25. During March there were nineteen alarms; Loss, \$10,355 05; buildings \$2,166 05; contents \$8,189 Insurance, \$22,775; buildings, \$19, 895; contents, \$2,900. Insurance paid. \$1,855 05; buildings, \$1,166 05; contents, \$689. During April there were eleven alarms. Loss, \$2,446 76; buildings, \$796 76; contents, \$1,650 Ipsurance, \$11,500; buildings, \$1,500; contents, \$10,000. Insurance paid, \$1,546 76. During May there were fourteen alarms. Loss, \$2,550-75; buildings \$1898 75; contents, \$552. Insurance, \$2,900; buildings, \$1,400; contents, \$1,500. Insurance paid on buildings, \$1,098 75; contents, \$352. During June there were two alarms. Loss, \$100. Insurance none. During July there were thirteen alarms. For this month the losses and insurance are not reported. During August there were fifteen alarms. For this month also there is no record of the

AGRICULTURAL.

DEVOTED TO THE INTERESTS OF FARMERS AND STOCKMEN.

The sheep must have a dry location at night. Dampness is fatal to sheep, being the cause of distempts, while wet pasture fields conduce to foot-rat.

A half-bred ewe, bred to a Shrop shire ram is reported from England @45c dropping six well matured lambs at one wirth. Another produced four lambs and two others triplets.

Sheep eat so many different kinds of plants which horses and cattle refuse that the addition of a sheep, by had drifting, was captured on Com-berland hill, R. I., where it had caught other stock refuse, really increases the product of the pasture.

The vessels carrying frozen mut-grade, 15@25c.; pickled, 20@25c.; tons from Australia are said to be taking out their refrigerators to abandonthe business, while the South American trade is preparing for an increase in the same line

Southdown rams are the best for crossing on small native breeds in order to produce excellent muttom. The ewes from such cross should be mated with Oxford or Shropshire rams if larger size be desired.

The Indiana Farmer is authority for the statement that the Shropshires per lb., 124c. have grown more rapidly in popular favor than almost any other mutton breed of sheep, especially in the central Western States.

An English farmer, writing of feeding ensilage to his flock of five hundred sheep, saps that they did better on it than on any other food, and last year of his 480 lambs not one died, and his ewes did better than usual.

The way to build up the sheep in-The way to build up the sheep in ples, 7½c. per lb.; machine dried, 10@ dustry is to weed out the flocks, go for 11c; pittess plums, 13c; Italian, greater capacity for mutton, and increases in the individual, and put a raisins, \$2 40@2 50. creases in the individual, and put a small flock on every farm, where they will pay their way, even if wool isn't

The points to be observed in putting up wool are, not to fold the fleece too Marrain, 10 @12c.; tallow, 3@34c. tightly as to destroy its elasticity; not to try to sell twine for wool, and

M, \$22 50; No. 1 ceiling, per M, suming greater proportions in New \$22 50; No. 1 rustic, per M, \$22 50; York and New England. To meet stepping, per M, \$25 00; over 12 with the greatest success it is found inches wide, extra, \$1 00; lengths 40 important to select ewes for dams that to 50, extra, \$2 00; lengths 50 to 60, are large milkers, and to so feed them extra, \$4 00; 1½ lath, per M, \$2 25; as to keep a liberal flow of milk long 1½ lath, per M, \$2 50.

There is always, an uncertainty regarding the temperature for churn-No mere machine would ever fill the ing. While from 62 to 65 deg. is place of the old-fashioned printer, comusually accepted as the proper temperature, the milk from some cows produces cream that requires as high as 67 deg to form butter. On e. ch as 67 deg to form butter. On e.ch dressed, 6c.; sheep, 3c; dressed, 6c. airy farm practical handling of the hogs, dressed, 8@9c.; veal, 5@7c. milk only can determine how best to churn for first-class butter.

To get the cream quickly from milk, as soon as it is drawn from the cow skim milk will be of a very 'superior chumps in the West who imagine, be- quality. If the cream is to be made into butter, it should be kept at temperature of about 65 deg, and churned at a temperature of from 55 to 60 degrees.

The idea that any method of feeding turnips to cows, either just before or just after milking, will save the next mess from being flavored, is a popular mistake. Heating the milk water it was of a bright red color and will cause the flavor of the turnip to evaporate so that it will not affect the butter made from it. But there are objections to this. The butter from milk thus treated will be soft, and the milk, if used as food, will have a constipating effect which it did not beore possess.

If hens are confined in somewhat narrow limits there is 'a great advantage in having two runs to be used alsible these should be arranged so that a one-horse plow can be introduced and the ground be plowed or dragged over every time a change in quarters is made. A few sowings of easts, dragged in will keep the fowls busy scratching for the grain, and what es capes them and grows will be worth even more for green f. od.

The competition among market gardeners is now so great that early vegetables for outdoor planting are of ered by them cheaper than most farmers can grow the few they may require. Send an inquiry to any lead market gardener, and the writer will be surprised to learn how che ply tomato, cabbage, lettice and other plants are furnished to those ordering by the quantity. It is often better and cheaper for farmers to buy these than to try to grow them, with the poor facilities that most can command.

-A Maine fishing schooner recently caught on the Georges Banks, on halibut trawl, a queer fish. It weighed seventy-five pounds, and is described as being "about as large as the top of a hogshead, and almost as broad long." When first taken from the marked with silver spots, varying in size from that of a three-cent piece to that of a silver dollar. After the fish had been out of the water a while, the red became purple, except on the fins. which retained their vivid hue. The fins, three in number, were small in proportion to the body, and the tail was short and broad.

-"What b-e-a-u-tiful peaches," said an old lady as she stopped at a stall in the market and admired a basket of ernately through the season. If pos- early peaches. They were covered with pink gauze and looked very tempting. The old lady bought the peaches and took them home. The next day she appeared again at the stall and showed the stallkeeper a small piece of pink net. "Do you keep that kind of veiling for sale?" she asked. The stallkeeper told her that he did not. Well," she said, "when I got them peaches home they were small and our and green, and I thought if I could get some of that stuff that made Elizabethan age—had gathered them look so pretty and plump in the basket I'd wear it myself. If it would improve me as much as it did the by my handom, but this puddle hath extraordinary peaches folks would think I'd found depth! Methinks 'twere well that we depth! Methinks 'twere well that we depth! the Elija of life."—Detroit Free Press. return, and defer the executions until -A man, who was very sad, once

heard two boys laughing. He asked them: "What makes you so happy?" Said the elder: "Why, I makes Jim glad and gets glad myself!" This is the true secret of a happy life-to live so that by our example, our kind words and deeds, we may help some one else. It makes life happier here, and Heaven will be happier for the company of those we have, by God's help, brought

If there were to be any difference between a girl's education and a boy's, I should say that of the two the girl should be earlier led, as her intellect ripens faster, into deep and serious subcts; and that her range of literature should not be more but less frivolous, salculated to add the qualities of patience and seriousness to her natural poignancy of thought and quickness of as much for patching and repairs, as wit; and also to keep her in a lofty and wuld have made it thorough at first ourse element of thought — Ruskin.
