GIRLS IN DURANCE.

A Brazilian Custom Which Would Find Favor in This Country. The typical American girl has often been censured for too great freedom of manner.

The lady asked if the guest were possessed of a wife. When he replied in the negative, she enquired upon the delights of married life.

The hostess thereupon disappeared within the room, whence sounds of whispers and giggling presently issued.

"Why do you lock them in?" asked the guest. "It is the custom of our country," returned his host.

"But do they never go out?" "No, never," was the reply. "They learned to ride when they were children, but since then they have been shut up in the house, where they will remain until husbands have been obtained for them."

"An excellent clergyman, possessing much knowledge of human nature, instructed his large family of daughters in the ordinary practice of music.

In any case of mental weakness, arising from any cause, Dr. J. C. Ayer's Sarsaparilla is a sure cure. It acts very quickly, and permanently cures. Two or three bottles have often sufficed to cure cases of long standing. Price, \$1.50 a bottle. All druggists.

INDICATION OF DYSPEPSIA. Is the inability of the stomach to dissolve the nutritive elements of the food. In such case, the food acts as an irritant, producing pain and distress, and if unchecked, leading to constipation and piles. It requires usually but slight treatment to effect a perfect cure.

HAMBURG FIGS. Are mild in action, assisting nature and never doing to effect a complete cure of very bad cases of dyspepsia, the Figs. at once cleanse the stomach and intestines to meet the food which is normal in character. Hamburg Figs are sold at 25 cents a box every where. Dose.

WONDERFUL BLIND MAN.

He Works the Typewriter and Keeps an Interesting Set of Books. A most remarkable blind man has been brought to public notice by the proposed founding of an institution for the instruction of the sightless people in this city.

THE PAPER TRADE.

Recent Discoveries Which Bid Fair to Revolutionize the Paper Industry. "We now make about every thing from a shirt to a car wheel out of paper, but we are also making paper out of nearly every thing," said a Yankee manufacturer.

The most recent invention in our trade—and it is one which bids fair to revolutionize it altogether—is the process of making paper out of cotton. It was recently discovered by a gentleman from Georgia, who has thus opened up another great industry to the South.

The discoverer, after much study, came to the conclusion that the hulls could be made into paper-pulp. An analysis of the hulls showed that it is composed of nine layers, the two upper ones being black and coarse, while the remaining seven are of very fine fibers.

"Can paper be made cheaper from this pulp than by the old process?" "The time and cost of reducing the hulls to pulp is only 60 per cent. of what the present process requires, thus the price of paper will be reduced about one-half, while the quality will be much better.

"The first step, as indicated above, is to hold the corks back so they will come in during September of next year. In the vicinity of a butter factory it is desirable that the majority of the patrons shall agree to make the butter in the factory as made by the factory, that the factory may be kept running through the winter.
