FIRST POLO GAME.

Something About the Most Exciting and Exhilarating of Sports.

Polo, or hookey on horseback, as i is sometimes called, is the national house from the town of Sonoma. game of the people of Gilgit, a mounminous country to the north of Cashmere. Reports had reached India, by way of Cashmere that the Gilgittis were a race of blue-eyed Kaffirs (unbelievers in Mohammed), and it was sugore up the track and was arrested. gested that they were probably the decondants of one of Alexander's settlements, and to solve this question the Punjab government, in the spring of 1886, deputed Dr. Gottlieb Leitner to visit the country and inquire into the history and language of the people. As the richest mine in Washington to.Tifar as concerns that matter, the language tory or Idaho. of Gilgit was proved to be a sister lan-

guage of Sanscrit, and not like Hindi or Greek, a daughter language; but the contested over the effort to get pospoint of interest for us is that Dr. Leitsession of the glit to a deceased daugh ner took as much interest in the nater, just previous to her death, of \$15,000. It is claimed he was incomtional game of polo as in the language, and persuaded three natives of the petent mentally to make the gift. country to return with him to British India and bring their polo sticks and ponies along with them. The party reached Monday, the locomotive of the Santa Fe Short line struck a wagon contain-Sakon, the capital of the Punjab, some ing William Bentley, sr., aged 76 years, his wife, aged 80 years, and his time in August, 1866, and the game having been discussed at Government daughter and daughter-in-law. They house a couple of teams were got up were all four killed outright. They were residents of El Modena, six milos and the day fixed for the trial games, which all the European residents turned out to witness. The teams were com from Santa Ans. posed of Captain Charles Marshall, Lieutenant Pemberton, Lieutenant R. Nicholetts, Mr. C. F. Amery, Dr. Lietner, Serdan Mohammed, Hyath Khan, the three Gilgittis, and one other, and the game thus inaugurated rapidly acquired popularity, clubs being established pr omptly at all the military stations. The game was played with an votes of the inmates of the Veserans' energy, and with such speedy ponles of home at Yountsville is the basis for ok that severe casualties were the confest. There are but 68 votes frequent, so much so that considerable in difference on the face of the reare was brought to bear on the army authorities to put a stop to it, but they wisely forbore, and the game was votes were cast against him at Yount-

The great point is never to stimulate a sudden flow of sap by manuring when its effects will be im-mediately felt. For this reason it is ing material is still used, but it is were made, and the interest account the boat's crew sold it to a farmer, to

best to apply manure just before the pear tree enters the dormant state indi-cated by the falling of the leaves. old fashioned worm fence. Old rails —There is one old-time habit, says an exchange, that used to be widely prevalent in the United States, especi-Early in the fall is the best time In practice, however, August is said to be the proper time, for there are rare-ly rains that come early enough to stimulate growth the same season. Thus during the whole of winter the manure has had an opportunity to bethe growth of our population, but that in many States it is less than half as

manure has had an opportunity to be come mixed with the soil. The tree starts with a vigor which can be steadily maintained during the sum-mer. Heard's Dairyman says: "A great deal of vagueness exists yet among butter makers on the subject of ripen-ing cream. A great many men and women who have had a chance, at

----000, and Ohio 41,000,000. The total increase for the yea. is believed to be not far from 560,000,000 bushels, or

-The champion absentminded man e East Union, Me., is he who bedded his more than twice the entire product of horse with shorts instead of sawdust the other night. He found out his misparison affords aid to the imagination take when his horse had eaten up his in forming a conception of the surplus available for exportation, either dibedding s. 1 it became necessary for his rectly or in the form of meat and and walk him up and down the road for owner to rise in the middle of the night exercise. -A konge met hie death in an odd

rectly or in the form of meat and other provisions; but only when the anind dwells upon the magnitude of the entire product of more than 2,000, 000,000 bushels is it possible to realize the significance of the name to which corn is now entitled as king of cereals manuer in Choctaw County, Ala. He stepped on the end of a short pole that was in the road, when the other end rmised and stuck in his abdomen. Be corring frightened, he then made a lunge forward, and in doing so drove the stick "nearly through him," causing death in a few minutes.

With a lace slip of black, anoti er of whit and silk petticoats of different colors, the economical dresser can outdo the exameleon in the matter of change, at a very triffing New ging' ams come in all possible

growing on such land all that is necessary to keep them in vigorous health and fruitfulness is to secure to them a monopoly of the soil and the rainfall and to keep all weeds and grasses in complete subjection; but it will take a long time to beat this fact into the heads of the average man who has lost a portion of his orchard and has resolved to save the remainder by liberal manuring. Some kinds of manure, how-

ever, and some modes of applying them may be absolutely hurtful to apple trees. If sheep are kept in an orchard and the land is not overstocked, the result is beneficial, for they eat the fallen fruit and distribute droppings over the whole area. But if sheep manure be distributed in quantity under the trees, it has a tendency to draw the woolly bark louse; and horse manure has the same effect. Cow manure attracts the white grub, and fresh and unfermented manure of any kind producenthe white rot of the roots. Liquid manure, compounded by soaking apple pomace with pigeon dung, guano and the like, and made quite weak, is an excellent fertilizer, which may be used by amateurs on a small scale. If to apple pomace fifteen to twenty per cent. of fine rock phosphate be added, it is the best of all ertilizers for the apple and pear. Along shore where seaweeds abo no better and more profitable uses of it can be made than to apply it liberally to apple orchards. And last, but not least, no more successful use can be made of tobacco stems than to mulch fruit trees with them; they repel insects, absorb moisture and in that way make an excellent mulch, and as they rot slowly they give up potast salts and other forms of plant food essential to the health and fruitfulness of all sour fruits.-B. F. Johnson, in N. Y. Tribune.

-By love's delightful influence the attack of ill-humor is resisted, the vio lence of our passions abated, the bitter cup of affliction sweetened, all the injuries of the world alleviated, and the sweetest flowers strewed plentifully along the most thorny paths of life .--Zim nermann
