-It may be doubted whether the actice of chewing gum has an injurious effect on the eyes of the gum chewer, but it hurts the eyes of other people.-Somerville Journal.

Lincoln County, Georgia, requires on the average only a day and a half of court. At the last session the only prisoner who has been in jail in the county for several years was let go on his own recognizance, the prosecutor failing to appear.

-Statistics lately published in England show that the world has 700 Cræsuses worth \$5,000,000 or over, of whom 200 reside in England, 100 in the United States, 100 in Germany, 75 in France, 50 in Russia, 50 in India and 125 in other countries.

There is a new high-wire act. Two men starting from different ends of a slack wire meet and pass each other, going by on a waltz step. A woman actually dances on the wire, and a man trots across it with a companion upright on his shoulders.

-A lady saw a driver, angry with his horses for some fancied offense, about to lash them severely. She interrupted him by inquiring the way to a certain street, to a certain man's house, both of which she knew very well. But the driver, too gallant not answer the lady's questions, had opportunity for his temper to cool, and stick. If the egg has been lately laid, restored the whip to its socket without striking a blow.

-Time, twentieth century. Place, at the polls. First Female Voter-"How do you do, Mrs. X? Who are you going to vote for for governor?" Second Female Voter-"O, I have not decided yet. The Republicans have put up Mr. A. They say he's very popular, and sure to be elected. But Mr. B, his opponent, he doesn't seem to have any friends at all, poor fellow; guess I'll parent birds take no more notice of renders his party there will always be vote for him." First Female Voter-"So will I." - Yankee Blade.

- What will it cost ma, Uncle Rastus, to have my coop whitewashed?" "I kain't tell yet, sah, till I makes an estimate ob de size and dimenshuns. That night the owner was disturbed by a loud noise in the hen-coop. "Hi, there!" he shouted from an upper window, "what are you doing there?" was the reply, "It's Unc. Rastus. "and he's figgerin' on de size an' dimenshuns ob de coop."-Harper's Ba-

-"This is the darndest place I ever was in," exclaimed the bucolic gentleman at the theatre. - "I've been looking around for the last half-hour and can't find the door." "Don't you see the sign on that door?" asked the gentlemanly usher. "Exit, that's Latin, and means the place where you go out."
"Then why in time don't it say so? I don't know nothing about dead lan-'Cause a feller can't read Latin, he's got to burn to death in case of fire, eh?"_Boston Transcript.

-"Men," said the captain of the steamer to the frightened passengers huddled about him. "it is true we are not gaining on the leak, but we are only fifteen miles from land, and if necessary we can throw overboard 2,000 tons of freight to lighten ship. There is no occasion for alarm. We have several hundred casks of rum in the hold that we can ____ "No occasion for alarm!" exclaimed a tall Kentuckian, turning pale with apprehension. "Captain, do you intend to throw that rum overboard?"-Chicago Trib-

-The average age of locomotives is about twelve years, yet many, through proper habits of living, taking their meals regular and avoiding all intoxicating beverages attain quite a respectable old age. The oldest running engine in Germany has been on the road since 1845, and is consequently forty-three years old; quite a Methuselah, in fact. With regard to its habits it has always confined itself strictly to water, though it has been addicted to smoking all its life. It is sad to see a locomotive grown prematurely old by getting on trains and running all night, but they are often met with-in collisions.-Texas Siftings.

-Flagstaff, Me., is an interesting town for two reasons. It always has a Miles Standish among its citizens, and the Standish farm covers the ground where Benedict Arnold encamped on his Quebec expedition, and where he erected a flagstaff, from which the place received its name. G. W. Standish, one of the leading men of the town, is the only remaining son of Miles Standish, who was the eighth direct descent from Miles Standish, the captain of Plymouth. G. W. Standish's only brother, Miles, died seven years ago, but he left a son Miles, now twenty-two years old, and G. W. has a son Miles, who is four years old.

Young lady (at dinner, sadly, to partner)—"I was forcibly reminded yesterday, Mr. Larkins, of the opening words of the poem, 'I never loved a dear gazelle.'" Mr. Larkins (with interest)-"Yes!" Young Lady-"Yes; I was presented with a lovely little lamb which I tenderly nursed and cared for through the summer, and of which I grew very fond. Yesterday the poor little creature broke its leg and it became necessary to kill it. I've felt so distressed over the matter." Mr. Larkin-"It is indeed, Miss Brown, truly sad." Young Lady—"Ah, yes, Mr. Larkins, and the piece de resistance of to-day's dinner is all that is left of my poor little lamb. It nearly breaks my heart. Won't you have a small piece of the crisp fat, Mr. Larkias? It is simply delicious."-Epoch.

-When you see a man carrying a book bearing on the cover the title, "Great Expectations," or "Our Mutual Friend," don't rush to the conclusion Post Intelligencer. Walking quickly that he is going to read Dickens. Many up to a staid old gent on the street she of the dainty volumes so labelled are will dexterously clip a button from his bollow, except that they contain a halfplat whisky flask. By touching a
spring the mouth of the flask springs
into view, all ready for a "nip." So

A VERY CURIOUS BIRD.

Habits of the Maleo, a Queer Creatur Found in the Eastern Seas.

The maleo is about the size of a small turkey, and not unlike one in appearance, and belongs to the family of megapodes, or "big-feet," which are also called "mound-builders."

These latter are gallinaceous birds

They do not make regular mounds, a series of elevations and depressions. like a rough, confused sea. Contrary to what we should imagine, the very large eggs are not found at the very bottom of the depressions, nor on the summit of the mound of gravel, but in shallow trenches, and on the slopes of the irregular hummocks.

The natives of the island understand perfectly how to find them, by probing in the gravel with a flexible, delicate and just covered, the gravel is very little packed, and easy to penetrate with the stick. Then the gravel is scraped away-the stick used again-and so the egg is reached at last.

It is often three or four feet below the beach, however, on which the tropical sun is ever shining, hatches the eggs at this depth; for, after they are paign rubbish... once deposited and covered up, the

The male birds, as well as the hens, dig up the gravel to form the mounds, and throw up the material in perfect showers; and they do this in an odd way, and not scratching alternately, with both feet, like common fowls. The maleo poises himself on one leg, and gives rapid digs with the other, the large foot, slightly webbed at the base of the toes, being as large and effective as a man's hand.

great numbers upon the seashore, they by the rival craft. could only get them by creeping up shouting; when, instead of running off, pertinacity of a postage stamp in a they took to their wings and perched pocket-book on a damp day. The taxthey took to their wings and perched to think themselves perfectly safe, and Then it is that the man whose property one can be shot at a time, without put- is being sold for taxes lifts his voice ting to flight the others. They wer found to be delicious eating, and their skins, being unique, most valuable for stuffing, for museums and collections.

The maleo's egg is huge, in proportion to the size of the body, and some days elapses between the laying; and the question is, why should the egg be so disproportionate to the size of the bird?

The theory of Doctor Guillemard, the naturalist who describes them, is that the eggs of these birds would be exposed to much risk if in an open nest, uried as they are they are com-

POT-HOUSE POLITICS.

The Character of the Things Engaged in Expounding Its Merits.

As a general thing the bar-room politician is not attractive personally. He rarely pays much attention to his clothing or his general make-up, be-cause his time is completely absorbed with matters of great political import. He is kept so busy saving the country (as are our common fowls or pheas-ants), which are found in Australia and in removing grease spots on his rai-ants), which are found in Australia and Papua, or New Guinea, and which lay their eggs, and then scratch up and brush. The blush on his cheek is not carry immense quantities of sticks, leaves and earth over them, so that the heat of fermentation under a hot sun, hatches them. These birds have all immense feet, well adapted for such a purpose, two or three times as large in proportion as these of each of the purpose. Instead of using leaves and sticks and sand, the maleo of Celebes uses the gravel of the sea-beach alone to hatch its eggs, and these eggs are extremely that the continuance of the planetary large in proportion to the size of the system, somehow or other, rests on him. As for the political party to which he claims to belong, or rather like their cousins, the megapodes of which he/magines belongs to him, he Australia, but the whole beach shows is perfectly sure that but for his sage counsel it would fall to pieces and resolve itself into chaos. It is almost impossible for the small-bore demagogue to believe that his party could survive a single campaign in case he

does pay.

Instead of being a modern Atlas with the whole world on his shoulders, he himself is a burden grievous to be borne. He wanders around, never allowing himself to stray far away from the saloons, like an evil spirit seeking rest and finding none, and allowing nobody else to find any, either. He will halt gentlemen on the public highways, and unless they seek safety in flight, the surface of the mound. The heat of he will inflict on such victims, in a whisky-laden whisper, whole libraries of stale political lore and decayed cam-

In regardeto the actual services he an honest difference of opinion. There is good reason to believe that this postulant for pap does more to cause the respectable element of his party to go. over to the opposition than all the other causes put together. The shrewder politicians and office-seekers perceive that the unsavory but enthusiastic demagogue is in reality a dangerous Jonah, who should be promptly inserted into the raging main if the ship is to be saved, and they often do throw him Although the explorers from the overboard; but he always bobs serenely Marchesa found the curious birds in up and swims to shore, or is picked up

Occasionally the small-bore politician quite close, and then running in and gets into power and sticks with the upon the forest trees which formed a payers discover that they are being belt along the beach. Here they seemed | robbed by a set of famished cormorants. and a rebellious hoof and rails at the small-bore demagogue. An independent tidal wave sweeps over the neighborhood, and the small-bore demagogue and his friends are left high and dry when the waters recede.

This style of politician prevails, in a more or less malignant type, from Maine to the Rio Grande, and infests every political party .- Texas Siftings.

VILLAGES OF RUSSIA.

CONSUMPTION CURED.

An old physician, retired from practice, having had placed in his hands by an East India missionary the formula of a simple vegetable remedy for the speedy and permanent cure of Consumption, Bronchitis, Catarrh, Asthma, and all Throat and Lung Affections, also a positive and radical cure for Nervous Debility and all Nervous Complaints, after having tested its wonderful curative powers in thousands of cases, has felt it his duty to make it known to his suffering fellows. Actuated by this motive and a desire to relieve human suffering, I will send free of charge, to all who desire it, this recipe, in German, French or English, with full directions for preparing and using. Sent by mail by addressing with stamp, naming this paper, W. A. Novas, 149 Fower's Block, Rochester, N. Y.

Shall Women be Allowed to Vote?

The question of female suffrage has agitated the tongues and pens of reformers for many years, and good arguments have been adduced for and against it. Many of the softer sex could vote intelligently, and many would vote as their husbands did, and give no thought to the merits of a political issue. They would all vote for Dr. Pierce's Favorite Prescription, f'r they know it is a boon to their sex. It is unlequided for the cure of leucorrhea, abnormal discharge, morning siekness, and the countless ills to which women are subject. It is the only remedy for woman's peculiar weeknesses and allments, sold by druggists, under a positive guarantee from the manufacturers that it will give satisfaction in every case, or money will be refunded. See guarantee on wrapper around bottle.
