The TELEPHONE will visit them the deman since; so they have to go about the country as it were, "busted."

Our Public Scoool.

This is, or ought to be the thing that s uppermost in the minds of our people. A place that shows a live interest in public school work is the most desirable as a place of residence. Such is the case with McMinnville at present. The directors have secured the best corps of teachers possible, with Prof. J. A. Price as principal. Under the management of this gentleman last year the school was worked up to a high point of excellence. Departing from the usual ties. rule of having bare walls to gaze upon, charts and maps were purchased and

placed in several rooms, not only beautifying them, but proving a source of instruction to all. Besides these, books, periodicals and papers of various kinds have all been taken, but the shooting were added for the edification of the has not all been done. more advanced pupils. But still the Am Shadden has been out on a hunt principal is not satisfied with the good and says he captured 132 grouse in three work begun, for last week were ordered work begun, for last week were ordered Chambers' Encyclopedia consisting of the last two weeks. 12 volumes and 25 volumes of the standard poems of the country. These books added to those already on hand will make a neat library and one from which about all items relating to history and general topics of the country can be obtained. Speaking of books, Prof. Price Rev. T. H. Stipson of the M. equests us to state that if any person has a good book they wish to donate for the furtherance of educational work, it will be thankfully received by him for the school library. This is an excellent scheme; and while we think about it, why would it not be a good idea to doate the books that formerly belonged the library union for this purpose hey are lying idle, somewhere, and night as well be put to some use. Now hen, all that our citizens have got to do

College Notes.

Many students start to college with little or no purpose in view. They go to school, it may be, because their parents urge them to do so. You ask them ents urge them to do so. You ask them of Dr. Winter, is here. They intend to why they are seeking knowledge and remain with us for some time. most of them are unable to give a rea-Mr. J. L. Ladd, of Amity, was with systerday. He says that things in delent and reckless boys is fine fun. so they will make some preparation in that direction. Others think, possibly, that the world will need a few doctors or lawyers by and by as well as now, so they think favorably of a calling in that direction. The dignity of a profession seldom enters the mind of the average study standing at the head of some Proceeds to go to aid the Sunday school grand and noble work of life. Of course in buying papers, etc.
