Edwin Larry.

Edmin, E. Habster.

JACKSON, Cal., Sept. 28, 1887.—Last December one of my boy-, aged 34 years, was troubled with what seemed to be a bad cold. He g ew worse and I called a doctor who called it Dropsy and began to treat my child for it. He con-tinued to grow worse and I got another doctor who analized his urine and pronounced it Bright's Disease in a bad form. All the doctors said my boy would die, and he looked as if he surely would. I began to give my boy "Warner's Safe Cure" without saying anything to the doctors. In three days his urine showed a change, and an analysis made three weeks ister indicated a perfect condition of his urine. Every doctor who heard of his ca-se said that he would die sure, but he took "Warner's Safe Cure" and is alive, if not well, which is more than could have been said if the doctors had been left to stuff him.
