THE TIPPING EVIL

Why Waiters Should Not Be Paid Extra

by Customers. It is to the selfishness and thoughtlessness of the rich that the growth of "tipping" is mainly due. But, while the result is not oppressive to them, it has become a serious tax on persons of moderate incomes who travel much or take their meals in restaurants. The man who can afford to pay anywhere from \$2 to \$5 for his dinner does not miss the quarter, which is the lowest that he will give othe waiter. To the man or woman of moderate means who takes three meals a day at a restaurant where the service is sufficiently good to be agreeable the necessity of paying thirty cents a day for "tips" is a serious addition to the expense of living. If his three meals cost from \$1.50 to \$2 the increase is from 16 to 20 per cent.

Over \$100 a year compulsorily spent in "tips" is a sum which, if saved, would make to many people the difference between continual pinching and a fair degree of comfort. Ten cents is the lowest "tip" that can be given in a good second-class restaurant. Now, if a man has a chop and a glass of beer or a cup of ten or coffee for lunch at the cost of thirty-five or forty cents he is paying twenty-five per cent, additional for the privilege of giving the restaurant-keeper a large profit, as the cost of the meal, with all expenses added, is at the highest not more than twothirds of the amount charged.

The necessity for "tipping" is ever on the increase. Even at the lunchcounter down-town where the hurried eater sits upon a swinging stool, it is customary to "tip" the waiter, and some patrons also "tip" the carver. In the cases of the large hotels, where an abnormally high charge is made for liquid refreshment, the waiter who carries an order from the bar to a table now expects a tip. If the system extends much further the bar-tender who draws a glass of beer will want ten cents instead of five.

The public has become so accustomed to the necessity of "tipping" that while there is much private grumbling there is no organized public opposition Persons who really can not afford to "tip" either do so and stint themselves In other directions, or patronize cheap and uncomfortable restaurants where "tips" are not expected. There will be no public move against this practice. because people who banded themselve in opposition to it would foolishly fear to be called mean. Hotel and restaur ant keepers claim it is impossible to stop the system, because some selfish people would always try to get the better service by continuing the "tip," and therefore they (the proprietors) are only acting wisely in taking advantage of the public's weakness. This is worthless argument, for the experience of nearly all the best clubs where "gratuities to servants are absolutely forbidden" is that equally good attention is paid to all members. Selfish people would be the first to cease giving 'tips" when they found that so doing did not bring any advantage.

Reform is only to be hoped for through the action of hotel and restaurant keepers who will possess enough intelligence to see that larger profits can be made by ridding the public of this, to many, almost intolerable burden. Any man who will start a good restaurant or hotel in which there shall be a strict and ridgidly enforced rule against "tips" will almost assuredly have more patronage than he can accommodate. It would need only a few such entering wedges to generally relieve the public of this irksome and unnecessary tax. - Epoch.

Arctic and Antarctic Icebergs.

It is not generally known that a the icebergs of the two hemispheres. Those of the Arctic ocean are irregular in shape, with lofty pinnacles, cloudcapped towers and glittering domes, whereas the Southern icebergs are flattopped and solid looking. The former reach the shore by narrow fords, but the formation of the latter is more regular. The northern are neither so large the southern ocean. In 1855 an imsouth latitude, which drifted about for several months and was sighted by many ships. It was 300 feet high, sixty miles long and forty miles wide, and was in shape like a horseshoe. Its two sides inclosed a sheltered bay measuring forty miles across. large emigrant ship ran into this bay and was lost with all on board. Only about one-ninth of an iceberg is visible above water. There are several well authenticated accounts of icebergs 1,000 feet high having been sighted in the southern ocean. This would make their total height 9,000 feet, or nearly two miles. - Science.

The later statistics do not improve the record of some New England States as to the number of divorces granted by the courts. In New Hampshire in 1886 there was one divorce for every 8.3 marriages. In Maine in 1887 512 divorces were granted by the courts. Doubtless hasty, thoughtless marriages are to blame for many of these, as alleged, but probably hasty, thoughtless words, and unkind and neglectful acts after marriage are responsible for a word, invisible to the naked eye, but much larger number.—United Presbyte-discernable with a lens.

sessed-evidently a man of the world. He strolled into a commission house at the Elk Street Market, where stood a bushel basket full of eggs. The Set less than thou throwest." A bushel basket full of eggs. The the words, "Fait par Justin Raymond, the words, "Fait par Justin Raymond, then deliberately stepped into the basket. The crash that followed brought Union." The hair stroke of the X out the proprietor. "See here! what forms the name of the owner, Edward in the name of the seven devils are Huntley. Under the numerals XII and you doing?" "Oh, I only wanted to see how it would seem to stand on this basket of eggs," said the man, calmly. "You'll settle for this before you leave here," was the reply of the irate merchant. "I haven't any objection," he loss of sight. It is said to be the only said, producing a well-filled wallet, thing of the kind in the country, and and paying in full for the damage. competent judges pronounce it to be the best piece of workmanship they had strolled in.

FACTS ABOUT PEARLS. Where the Finest Are Found and How Thele

How to Obtain Nice Lawns.

The lawn mower is a great institution n many ways. In one respect, like many other modern inventions, it is a valuable device when properly used. Unfortunately it is generally operated without any other idea or purpose nor so numerous as those met with in than to keep the grass cut short. This it is expected, will make a soft, velvet mense berg was sighted in 42 degrees sward; but it doesn't, unless the lawn can be deluged with water, which is not often the case. It should be borne in mind by all persons desiring to have a rich full, soft and thickly set sward. that if the roots are exposed to the sun they will be burned, and if not partially destroyed, produce a thin, straggling crop. In order to avoid this the roots should never be exposed. but sheltered by the young grass they produce. The lawn mower should not be used until the grass has attained a ength of at least four inches, then it should not be cut more than two inches in well set grass, leaving at least two nches to protect the roots. This applies only to properly graded lawns and a luxuriant growth. If the soil is poor and the sward new, a longer growth should be kept cultivated. A eautiful, well-kept lawn requires intelligent treatment to become an ornanental adjunct to the family residence. Harrisburg (Pa.) Call.

The yellow feathers are obpearls of the kind known in commerce tained from the Oo or Uho, and as statas "seed pearls" were sent from Bor. ed, are of great value, as the bird is neo, under the name of "breeding rare, very shy and difficult to capture pearls." These pearls are enclosed in and it has but a very small tuft of these a glass tube along with some grains of feathers upon each shoulder. The rice "to feed upon." The sender gravely black feathers are from the head and back of the same bird-its general in Borneo that pearls when put up for plumage being a glossy black. The Oo is caught alive by means of bird lime would reproduce their kind. Three or the yellow feathers are then plucked four months afterward the grains of and the bird released. The red feathers

panis Coccinea, the most abundant bird of the Sandwich Islands. The Hawaiian Spectator, a newspaper published in 1839, refers to this, or a similar mantle, as follows: "Kaw keauli has the mams, or feather warcloak of his father, Te-Meha-Meha. It was not completed until his reign, having occupied eight preceding ones in its fabrication. A piece of nankeen, valued at one dollar and a half, wa formerly the price of five of the yellow feathers. By this estimate the value of the cloak would equal that of the purest diamonds in several of the European regalia, and, including the price of the eathers, not less than a million dollars worth of labor was expended upon it a

he present rate of computing wages. A bunch of the vellow feathers called ulu was received by the king from his abjects in payment of a poll tax, and required many years to collect the material and manufacture one of these mantles. Until recent years these mantles were the royal robes of state and considered the principal treasures of the crown, but European clothing has entirely superseded them and they are not now manufactured. A beauti ful head-dress for women, called leis. was made of these feathers.

Another authority states that two ellow feathers only are obtained from each Oo, and these are found under the vings. When the much-prized feathers are plucked the bird is set at liberty. The price of the feathers, according to his authority, was one dollar and a hal for three, and the time occupied in naking the cloak was estimated from ifty to one hundred years. - Washington

-A noted Boston physician, while returning from Cincinnati recently rested over night at Buffalo on his way home. Here he met a son of a dear friend of his childhood's days in distress and lent him \$50. After he had received the benedictions of this unfortunate youth he discovered that his gold watch and his railroad tickets were missing. The young man disappeared very suddenly, and the doctor waked up to realize and mourn his expensive experience.

In the waste of tissue that precedes consumption, in the slight cough at night or morning if Duiardin's Life Essance is taken, a valuable life may be saved. Don't neglect a cough, but take Life Essance and stop it at once. Frice \$1.50 a bottle. All druggists.

HAMBURG FIGS are a crystal zed fruit cathartic, composed of fruits and ve estables, and, being in lozenge form, are handy to carry with you. They act middly but surely, and by their regulating influence overcome the tendency to constipation from any cause. This is especially true in all cases of soa sickness or car sickness, which is due to a dangerous condition of the digestive organs, over which Hamburg Figs exercise a peculiar influence. It is well known that even if the system is in good condition at the beginning, change in food a dhabits during a journey often produce constipation.

Hamburg Figs are therefore recommended to all travelers as being the only medicine that is certain in action, hendy to lare with you, most pleasant and agreeacle to the taste, and always harmless. Hamburg Figs are sold at 25 cents a box.

The growling and kicking of the Old Fogy gents is only equaled by the amount of grain kicked out in the straw by the Old Fogy machines. The New Fangled by the amount of grain kicked out in the straw by the Old Fogy agents is only equaled wish a cheap machine, Old Fogies will supply you at your own price; but their machines are Do not be talked 'nto buying a machine seause it is cheap and Old Fogyish. Ask the Old experimental machine, and sold on its merits. I have never yet had to call on any court to help decide the merits of the new-fangled machine. Please earl, ince the court records in reference to the Old Fogie's plan. Many years ago a man built a new-fungled machine, country. Do you not want to be ruined in the same way? Remember, the new-perimented with all the time, and at your expense. Do not fool with them any longer, while member, your whole dependence is upon your crop proceeds, and if you allow Old Fogy machines to waste your grain is going to waste.

Remember the new-fangled machine is sold on its merits entirely. Rechines to waste your grain is going to grain, you are just that much out of pocket. To prevent this, see that the next that does you allow the forms.

Remember the new-fangled machine is sold on its merits entirely. Remember, your whole dependence is upon your crop proceeds, and if you allow Old Fegy machines to waste your grain, you are just that much out of pocket. To prevant this, see that the party that does your threshing procures a new-fangled ADVANCE Thresher, ruschine. Write for further particulars. I am prepared to prove all my statements—i. e., The I hereby challenge any old fogy agent to name ANY case where the On this Coast. Show up or shut up.

ADVANCE machine has failed to do as represented since its introduction this Coast. Show up or shut up.

Remember that old fogy agents saying the contrary does not make it so. It will pay you to investigate. I can prove all 1 say.

I also sell the well known DINGEE WOODBURY POWER. A number of manufacturers make them on a royalty but I do not know of any imitations, but am always in-Machinery. Farm, Church and Schoel Bells, General Machinery, Swift Ollers, Orme Safety Wrenches, Blacksmith Drills, Self-Heating Bath Tubs, the Westinghouse Engines. See the cash. General Agent for Colburn's Dynamos and Lamps for Electric Lighting—5 to

THE RAWSON LIGHT RUNNING REAPERS AND MOWERS.

THE LINDGREN CHEMICAL FIRE ENGINES

Your village cannot do without one. You must have one for your mills. You cannot afford to be without a small one in your house. For particulars, address

Z. T. WRIGHT. Foot of Morrison Street, Portland, Oregon.
