The fiftieth congress has adjourned at
last. The event happened at 1 o'clock
on Saturday last. This has been the
longest session in the history of Con-
gress. There were fifteen members of
the house present at adjournment. The
session lasted 321 days and in both
houses there were 15,589 measures in-
troduced.

A petition to the Oregon legislature is
in circulation in Pendleton, and is ob-
taining innumerable signatures, praying
that a stringent law be passed at its
coming session prohibiting the slaughter

this kind becomes absolutely necessary
to prevent the total extinction of this
beautiful animal in Oregon forests.

Statistician Brown, of the Produce Ex-

concerning wheat: The total amount of
wheat in reserve in America is \$40,000,
000 bushels, taking out for our own
consumption and for seed leaves about 100,
000,000 bushels for export. Allowing for
reducing to standard bushels we have
\$5,000,000 to 60,000,000 bushels to sell.

Italians are working on the Heppner

There was a time says an exchange,
when advertising was not supposed to
amount to much, and the advertising
columns of a newspaper were patronized
either through personal sympathy or be-
cause supporting the local paper helped
along the community in a general way.
But that notion is fast dying out, and
wide awake, observant business men
realize that the public in order to get
the share of patronage. Some still
drag along in the old way, wondering
why the other fellow gets nearly all the
customers.

THE WORLD'S FAIR.
The American Exhibits to be Made at the
Paris World's Fair Next Year.

The Universal Exposition of 1889, at
Paris, promises to be one of the largest
and most successful of the world's fairs
held in recent years. Elaborate arrange-
ments for the reception and display of
the exhibits are well under way and un-
usual facilities both for the transporta-
tion of goods from this country and their
care are assured. The French govern-
ment extended a formal invitation to the
United States to take part in the ex-
position. The invitation was accepted by a
joint resolution of the senate and house
of representatives, and the governors of
the several states and territories were
requested to invite the people to assist
in the proper representation of the pro-
ducts of American industry and of the
natural resources of the country. The
president was directed to appoint a com-
missioner-general and an assistant com-
missioner-general, to make all of the ar-
rangements for exhibits and represent
the government at the exposition. He
was also directed to appoint nine scien-
tific experts as assistants to the com-
missioner, each to be assigned to one of
the nine groups into which the exhibits
will be divided. Provision was made for
the salaries of the commissioners and the
necessary assistants, and the sum of
\$250,000 was appropriated to be used un-
der the direction of the secretary of
state to defray all expenses. The action
of congress was approved May 10, and
the president has appointed General Wil-
liam B. Franklin, commissioner-general
and Mr. Somerville P. Tuck, assistant
commissioner-general.

The exposition will open May 5, and
close October 31, 1889, and there will be
no charge for space occupied by exhibi-
tors. The commission will forward and
return all articles received free of freight
charges.

Goods of exhibitors who are unable to
go to Paris or send representatives, will
be cared for free of all expense, except
that of unpacking and repacking. There
will be no duties to pay except on goods
that are sold or consumed. The French
regulations state that all objects exhibi-
ted will be protected against piracy of in-
ventions or designs.

THE FAIR'S MAGNITUDE.
It is expected that the total number
of exhibitors from all countries will
reach 30,000; it is estimated that 12,000,
000 persons will enter the grounds and
buildings. Some idea of the magnitude
of the exhibition may be gained from the
fact that the total area of buildings and
enclosed grounds, which is to be lighted
by electricity, is 3,000,000 square feet.
The space allotted to the United States
is about 75,000 square feet. An exhibit
worth this country fully equal to that of
1878 is expected, and it is hoped that it
will be much larger. There are numer-
ous lines of industry that need new
markets for their goods, and this exhibi-
tion will afford them an opportunity
for foreign display.

All of the European countries except
Germany, take an interest in the ex-
position, and will make displays. The
South American republics and Mexico
will also take a particularly active part,
as well as Japan.

The usual awards of medals and diplo-
mas will be made, but the details as to
this have not yet been determined.

He Didn't Advertise.
A nervous looking man went into a
store the other day and sat down for a
half an hour or so, when a clerk asked
him if he could do anything for him.
He said no, he didn't want anything.
She went away and he sat there for half
an hour longer, when the proprietor
went to him and asked him if he wanted
to be shown anything. "No," said the
nervous man. "I just want to set
around. My physician has recommended
perfect quiet for me, and says above all
things I should avoid being in crowds.
Noticing that you did not advertise in
the newspapers, I thought that this would
be as quiet a place as I could find, so I
just dropped in for a few hours' isolation."
The merchant picked up a bolt of
paper cambric to brain him, but the
man went out. He said all he wanted
was a quiet life.—Peck's Sun.

A Remarkable Coincidence.
The killing of Bud Douglas at Cracker
Creek and John Smith at Weiser City on
the same day brings to light a remark-
able coincidence. It is said that John
Smith was quite recently on a visit to the
niece at Cracker Creek, and remarked:
"I'll be the first to start a gracyard in
the new camp." Bud Douglas, hearing
Smith's remark, rejoined: "Not much,
Smith, I'll get there myself." And Bud
Douglas did start it, but Smith was at
the same time trying to keep his word
good.—Baker City Democrat.

Another Election Bet.
Seattle comes to the front with the
most peculiar campaign wagger that we
have heard of. A young couple of that
place who have decided to wed at some
indefinite period, take opposite views of
the political question, and make the fol-
lowing wager: If Cleveland is re-
elected, the wedding will be celebrated
on the 4th of March next, the day the
president takes his seat, but if the Re-
publican candidate is elected, they will
not be married until March 4th, the
year following. This seems to be one of
those bets where you win if you lose.

A MUSICAL WONDER.
Remarkable Genius of a Seven-Year-Old
Boy.

Thomas Elmore is the name of seven-
year-old Florida boy now at Seawane,
Tenn., where his parents have been
spending the summer, who is said to be
a musical genius of the Josef Hofnar
order. At a concert given a few even-
ings since he is said to have astonished
his listeners by his performances on the
violin and piano. An account says of
him: "He is just 7 years old, and, owing
to his long curls, which he will not
allow touched, seems even younger.
When he was 4 years old his father found
him reproducing on the piano the airs
he had heard some one play, and from
that time until a little violin was given
him he played accompaniments, etc.,
when called upon. To see the little fellow
tuck his violin under his chin, close
his eyes and proceed to make his instru-
ment speak is a wonderful sight. He
plays either first or second violin, chang-
ing from one to the other in the middle
of a bar. He sits on his father's knee
and does the fingering while his father
manages the bow, or vice versa. His
playing is full of soul and expression,
and especially accurate as to both time
and touch. He is of an old South Carolina
family, and his concert was given to
gratify his friends simply."

OFF AGAIN.
The Oregonian Wrong Again in regard
to Sam's' pos.

Last week some crazy correspondent
of the Oregonian reported a case of small
pox in Dallas, the victim being a
McMinnville girl. We will inform the
readers of that paper that the girl was
"one" a resident of this city but has
not been here for more than a year.
The Oregonian will please correct. The
small-pox in this city has disappeared,
and no more cases will appear unless
brought in by some outside parties, and
there is no danger of that.

**The Size of Oregon and Washington Ter-
ritories.**

Many people have but little idea of
the size of Oregon and Washington ter-
ritory, combined, as compared with
other states in the Union, especially our
friends in the east. We herewith give
a few comparisons: Oregon and Wash-
ington territory are larger than the
states of Maine, New Hampshire, Ver-
mont, Massachusetts, Connecticut,
Rhode Island, Maryland, New Jersey,
Delaware and West Virginia by 5000
square miles. They are larger than
North Carolina, South Carolina, Virginia
and Kentucky by 2000 square miles.
They are larger than England, Scotland,
Ireland, Switzerland and Holland by
5000 square miles. They would make
five states larger than Maine, or 35 states
larger than Connecticut, or 152 states
larger than Rhode Island.

**The Only Remedy
FOR
Contagious Blood Poison.**

Mr. D. E. Adams, Union, South Carolina,
writes: "I was afflicted with a terrible case
of blood poison for about thirteen months. I
was treated by the best physicians and used
various kinds of remedies, but received no
substantial relief. I finally tried the Serravallo
and about four bottles cured me
sound and well."

Col. R. H. Kiser, editor and proprietor of
the Oregonian, writes: "When I was
a young man, through indiscretion, I con-
tracted a disease which has stuck to
me for years. Some five or six years
since I was troubled with pain, so as to
make it difficult for me to walk. Having
advertised the S. S. E. in my paper for several
years, I concluded I would try it to see if
there was any efficacy in the medicine. I
commenced using it according to directions
and used half dozen bottles. I was once at
a way station and getting left, I walked the
seven miles and never felt any return
of the old malady. After expecting the
good effects I must say I was surprised.
I feel now like a young man and can en-
joy the case when necessary and set up from
eight to ten hours without any trouble
whatever. I send you this without solici-
tation."

Mr. F. W. Cook, 311 North Avenue, Chicago,
writes: "I have been afflicted with blood
poison for many years. I have used every
remedy I could find, but have not been
able to get any relief. I finally tried the
Serravallo and used about a dozen bottles.
