UNEQUALED IN HISTORY. A Large Saw Mill Stolen and Carried to Canada.

A tremendous sensation was created at Sault Ste Marie, Michigan, by the arrival of a deputy sheriff from Detour, a miles from here, with the news of the bodily theft of a saw mill building, including machinery, etc. The officer came overland with a dog team. He with a tug, two towing barges and nearly two hundred men, and immediately began the work of tearing down the mill and loading it on the scows. They had all of the machinery and most of the mill loaded when the sheriff left. The mill was owned by the Moiles Bros., but was mortgaged to Hurd & Havenstein, of Buffalo, for \$60,000. A contract was drawn up between the parties to the effect that the Moiles should saw 5,000,000 feet each season during the pendency of the loan for Hurd & Havenstein at \$2.50 per 1000; and another provision was made by which the mortgage obtained a sawed in which they had no interest, These papers were drawn up September 18, 1884, and were placed on record at No. 6, B-40 acres, three miles from Mc-Minnville. Price, \$25 per acre. One half year, During 1885 the parties had a bickering time of it doing ousiness above specified, and after a futile attempt to settle. Hurd & Havenstein began mortgage foreclosure proceedings in the United States court, February 4, 1886. Moiles Bros. took opposing steps, and no result has been reached beyond recent denouments. To avoid further entanglement the Moiles determined to encamp to Canada. Their destination is on the Spanish river, on the Georgian bay. Judge Steere granted an injunction and the officer was dispatched with an order for their apprehension. They are probably well on their way to Georgian bay by this time. The telegraph lines are cut and there is no communica-

LONSDALE ARRIVES.

The Story of His Long Journey in the North.

point on the St. Mary's river, sixty HIS MOST REMARKABE TRIP

From Winnipeg to Banks' Land, Thence Across the Alaska Peninsula.

McKenzie River.

The Earl of Lonsdale, whose remarkable Arctic journey from Winnipeg to Banks' Land, and thence across Alaska, has attracted the attention of the whole civilized world, arrived in San Francisco Tuesday by the Alaska Commercial com pany's steamer Bertha from Kodiak island. He is in excellent health, and in spite of extraordinary hardships, returns to civilization none the worse for his adventures.

The following summary of Lord Lons dale's journey was taken from his dictation at the Examiner office. The story of his fourteen months' journey, in brief,

is as follows: The purposes of my trip was merely t btain specimens, information as to losledging. I wanted to go as far as I believed animal life to exist or as far as I my outfit, or any outfit at all, at Winnipeg. I got all my outfit from the Hudson Bay company from fort to fort.

Starting from the Saskatchewan, hardequals the move in boldness. The mill

We went down the McKenzie he and I would become disagreeable to sleeper is that on which the sleeper runs obtained from reliable and well-informed We finally got in the boat again and river on this little steamer, which was each other before long, and so it proved. while the sleeper sleeps. Therefore, started in what we supposed was the built by the Hudson Bay company, and He kept following me, and I saw that he while the sleeper sleeps in the sleeper, part from personal observation during right direction. We came to a wide is called Wrigley, after the Hudson Bay had a knife in his hand, so I turned the sleeper carries the sleeper over the the past year. - Franklin Satterthwaite stretch of water, which we thought was commissioner. I went from there to around to speak to him, but he went into sleeper under the sleeper until the sleeper which carries the sleeper jumps the Became a Father at Seventythe east. We frequently got aground, Norman, 160 miles, and from there to I had no sooner gotten inside the door sleeper and wakes the sleeper in the pened to be a little quicker than his sleeper, and there is no longer any sleep-

Biggest City in the World.

The birds were very thick here, and I timber country I passed through was saw countless numbers of geese, ducks, mostly composed of balsam, spruce, wilaw countiess numbers of geese, ducks, mostly composed of balsain, spruce, will camp at all times, and this guard saw some suppose that Hankow, in China, swan, and all sorts of wild lowl. We low, fir, a sprinking of birch and some thought we were on the lake, for we poplar. On the west side of the river me go in here and fearing something was has more inhabitants. But there is a teenth street. He is nearly six feet tall, were out of sight of land, but when the weather cleared up and we got to where we could see land, we found that we had not been on the lake at all, but simply scenery. The rest of this country is very large the Rocky mountains commence to come down just as I knocked him out. They were terribly angry with this man for attempting my life, and took his knife long—much longer than the Rocky mountains commence to come down just as I knocked him out. They were terribly angry with this man for attempting my life, and took his knife long—much longer than the Rocky mountains commence to come down just as I knocked him out.
