While there is a gloomy outlook for an immense yield, yet for the state as a whole there will be an average yield. Crops do not fail in Oregon. There is no need now of any real drouth and yet there is a possibility of rain coming and partly retrieving the wheat crop. While the wheat prospects are not so good the other crops show signs of large yields.

The application of any of the remedies used for the destruction of the Green Aphis are also recommended as being good. It is thought by this board that owners also recommended as being good. It is thought by this board that showelf the world for an immense mass of invaluable material the Willamette valley that the Woolly Aphis will not invest the roots to any great extent, and that a shovelfull or so of fresh ashes placed around the base of of fresh ashes placed around the base of the tree will destroy those that may
