THE RACKET

and that the proprietor does not intend to

be restricted in his purchases, but will buy any and everything that in his judgment will be saleable and meet the requirements of the trade. The writer wishes to impress on your memory the following pointed and pertinent truths, facts and figures: First-That that there are two ways of doing business-one is the old and exploded idea that you must buy on time and sell on time, that you must have a set of books and a bookkeeper, a collector, and last, but not the least, an assignee to wind up your affairs; that in order to do business you must buy tax-laden goods on time and after having loaded them to the water's edge with additional taxes, you sell them on long time to the consumer. Is it any wonder that there are so many failures among men, not only those who merchandise but also among the tillers of the soil. The old credit system is the deadly upas plan and should be shunned. My PLAN is altogether a different way. I pay cash for my goods and buy where I can do the best. I sell my goods at a very small margin for the

sold by any credit concern in the city. All I ask is this, first and foremost, come and see me, and if I have what you want buy it of me and save from 25 to 50 per cent; if I should not have the article sought for, then would be ample opportunity for you to pay the old and ruinous prices. A dollar saved is a dollar earned, and the sooner mankind learns to shun the credit system the sooner will prosperity perch on their banner.
