The Pennington air ship, which has been under construction in Chicago, is reported to have taken its first flight without a railway truck. This invention at one time caused so much excitement that a company with a capital of a million was formed, the stockholders all being sanguine of speedy success. Y. M. C. A. District Conference.

The second annual conference for the third district, composed of all the associations in western Oregon, met in Albany last Friday, Saturday and Sunday.

Delegates were present from nearly all parts of the valley. The program of exercises consisted of the reading of papers, delivering of addresses, and discussions, all with a view of imparting and gaining a knowledge of the work of the association.

The conference was in charge of Mr. J. A. Dummett, traveling secretary of the Pacific Northwest, which includes Oregon, Washington, Idaho and British Columbia. This territory more than a thousand miles from east to west and over eight hundred and fifty miles from north to south.

The Y. M. C. A. work in this territory is just beginning to take root. Heretofore the country has been so sparsely settled that it was impossible to support associations. But now there are in Idaho and Eastern Oregon several associations that are wholly or in part supported by the Union Pacific railway company.

In the larger cities of these states and the province there are flourishing associations, and it is hoped that it will not be many months, or a year at the most, before there will be an association in every town of 1500 or more people. If there is not it will not be the fault of the traveling secretary or of the executive committee who are behind him in this work.

Shall We Celebrate.

A meeting of the McMinnville Board of Trade was held last Friday night, for the purpose of discussing whether or not the city would celebrate the 4th of July.

A committee was appointed to interview the business men and find out their opinion of the matter. As yet no definite steps have been taken. It is growing rather late and if anything is to be done, it better be done at once.

In connection with this matter it might be proper to explain the position of the military and naval bands. The first regiment is ordered into camp on the evening of the 4th of July and this company will either have to report for duty or disobey orders, in other words; mutiny. The time will interfere with the company taking part in the ceremonies of the day should the city celebrate.

The commanding officer of the company has no say in this matter and it is idle talk on the part of the citizens who are blaming the company for this state of affairs. The company would like to celebrate the day in this city and will if it is possible for them to do so but they do not intend to disobey orders to please a few misinformed citizens.

Boys' Foolishness.

It is the custom of the youngsters of the city to hang around the depot until a freight comes in and ride about until the train leaves. Deafness Can't be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian tube. When this tube gets inflamed you have a running, or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out of this tube restored to its normal condition hearing will be destroyed forever. Nine cases out of ten are caused by colds. When colds affect the throat, the condition of the mucous surface of the tube, which is nothing but an inflamed condition of the mucous surface.
