The great herds of cattle in Southern and Eastern Oregon are being bought in large numbers and the price of beef will be advanced greatly before long. It is believed by many that an attempt is being made to corner the cattle market. Papers in various sections of the state report representatives of an eastern syndicate in their respective localities buying all the cattle they can get and making no effort to send them away to any market. It is more likely, therefore, that a systematic effort is being made throughout the state to raise the price by reducing the supply.

The sheep industry in Oregon is a growing one. Oregon is now furnishing sheer for the Black Hills country. Frequent thieves are found in the country press complaining that some man or woman while in Portland has been made the victim of pickpockets. The state alliance of Washington, which claims to have 220 local organizations, is strictly non-partisan in its methods. Instead of aiming at the formation of a third party, each member is urged to use his utmost influence within the political party of his choice to secure the nomination of candidates for congressional or legislative honors committed to alliance principles. Its national constitution in its declaration of principles, declared that its members are to labor for the education of the agricultural classes in the science of economical government in a strictly non-partisan spirit.
