Pure Olive Oil from California

The convention of olive oil producers, recently assembled in this city, took a de-cided stand for pure, homemade oil. This While a number of the leading European overnments have recently adopted the so lled colonial policy as a means both of stand was not taken a day too soon. When creasing their national trade and of proa few months ago some official tests were iding an outlet for their people, experimade of the purity of olive oll it was found that some brands, or rather certain ences which have recently been brought to light in France would indicate that a lots, had already been adulterated. The colonial policy may be an exceedingly ex-pensive luxury for a nation to adopt. temptation is very strong to keep a spurious article on the market. Cottonseed oil In a recent debate in the chamber of and some other vegetable oils will always leputies on the government of the colony be cheaper than pure olive oil. The im-ported article is continually sold at a lower of Algiera the calculation was made from official reports that in the last forty years

The area suited to olive culture in this country has never been accurately defined. In general terms it may be said to include the country on the western side of the Sierras, below 42 degs. of latitude, down to and including parts of Arizona and New Mexico. Beyond this territorial area it is not probable that the olive will make much of a figure. Indeed, there is a strong probedlity that for at least a whole generation the only state in the Union that will get nuch commercial prominence for the production of the olive will be California

The growers who have already become producers here are pioneers. Olive orchards the last two or three years as apple or plum orchards. The area of olives not now in bearing is greater than that in fruitage. The planting will go on in coming sensons, because there is satisfactory evidence that the business will be a paying one. The the business will be a paying one. The convention has now established the very

onditions of success-concerted action uring a perfect guarantee of the purity of olive oil produced in California.-San Fran cisco Bulletin.

Ginseng in Commerce

The trade in ginseng is a revival of one that formerly existed. In the autumn of 1716 Pere Joseph Francols Lafitan, a Jesuit father, who had arrived in the country in 1712, and was stationed at the Sault, above Montreal, discovered the plant. He had been in Quebec in 1715, and there saw a

letter of Pere Jartoux, who had seen ginseng in Tartary in 1709, and who gave a description of it. Lafitan inquired about t from the Indians, and examined the country to find it.

At this time it was worth its weight in gold at Pekin. A company was formed to export it to China, Japan and Tartary. sium water glass, to which has been added The price at Quebec was from thirty to ten parts of a lead acctate solution-fifteen forty sous or cents per pound. At first parts lead acctate in 100 parts of water-and stirred by an air stream until well value increased the company exercised its mixed; the other solution is a mixture of monopoly rights, and in 1751 undertook to fifty parts of borax dissolved in 100 parts of warm water and twenty parts of glycdemand increased the care with which it was obtained and prepared was relaxed.

Sixty parts of the first described solution It was gathered out of season and imperfectly dried in stove ovens. Even in this are mixed with forty parts of the second. and with this mixture the colors are state it brought twenty-five livres per
