Facts Worth Remembering

—THAT—

BURNS & DANIELS

Have the Largest Stock of

Furniture, Wall Paper, Carpets, etc.,

In the valley outside of Portland.

—THAT—

They can and will sell for CASH, or a reasonable length of time, cheaper than the public have ever been able to buy.

—THAT—

This does not mean six months or one year, and then 10 per cent. to our attorney for collection.

—THAT—

It is a mistaken idea that goods can be sold as cheap on time as for Cash.

—THAT—

The proposition is this: That CASH IS THE BASIS, and that those who allow their names to go on our books must pay from 5 to 10 per cent. for that luxury.

BURNS & DANIELS.

WE WANT YOUR EYE

Points to Remember for 1892, in the purchase of Groceries.

Fully one-half of the People do not stop to consider the money they can save during the year in purchasing goods of a firm that pays strict attention to the selling of First Class Goods at a Small Profit.

People usually go to the nearest place regardless of cost. We sell our goods cheap and deliver them at your door. You will be able to find every thing in the grocery line in our store.

We are in it--The Grocery Business; and we will always give you the best goods in the city for the money. We give cash or trade for all produce, suit yourself in the matter.

MILLSAP & SON.

Combination? Yes

O. O. HODSON

HAS MADE A BIG COMBINATION!

I have enlarged my store and have combined a full and complete stock of

Sash, Doors, Mouldings, Glass, Paints, Oils, Varnishes, Brushes,

And everything belonging to this class of goods

Have also Combined a Line of Fishing Tackle & Guns

This with my Immense Stock of

HARDWARE, STOVES AND TINWARE

ALTOGETHER MAKES A COMPLETE COMBINATION

As to stocks, but not with any other firm or men.

STILL RUN MY BUSINESS AT THE OLD STAND, WHERE PRICES AND GOODS CAN'T BE BEAT.

Call and see me before buying.

O. O. HODSON.

\$3000 A YEAR! I am anxious to locate

DRUNKENNESS—LIQUOR HABIT—In

REMARKABLE POWER.

A Water Wheel Running with a Vertical

Head of 2100 Feet.

Altogether the most extraordinary water power installation—so far as head is concerned—ever known has recently been made by the Pelton Water Wheel company, in one of the famous Comstock mines at Virginia City, Nevada. The wheel is 36 inches in diameter, made of a solid steel disk with the buckets riveted to the periphery in a way to afford absolute security, weighing complete 180 pounds.

It is running under a vertical head of 2100 feet, equal to 911 pounds pressure, 400 feet of this head is obtained from the pipe line of the Gold Hill Water company and the remaining 1,640 feet from the California and Con. Virginia shaft, down which the pipe line is run to the Suro tunnel level, where the power station is located, and through which the water discharges after passing over the wheel. The wheel runs at 1,150 revolutions, with a peripheral speed of 10,804 feet per minute, or about 120 miles per hour.

The construction of the wheel simply provides for the centrifugal wheel the velocity of the water gives it, running without load, when it would attain the enormous speed of 21,708 feet per minute, equal to about 240 miles per hour.

A nozzle tip one-half inch diameter gives under above conditions 100 h. p. Every miner's inch of water, equal to a flow of 1.5 cubic feet per minute, gives 5 h. p., while 1 h. p. is given for every 2 lb. of metal in the wheel. It is only by comparison that an idea can be obtained of the height of a column of water due to such pressure. It is more than four times as high as the Washington monument and considerably more than twice the height of the Eiffel tower. It is safe to say that no water wheel has ever before been operated under such head, nor any such demonstration afforded of the velocity and power of water with such an extreme pressure.

The installation made by the Pelton company some two years ago in the Chollar shaft on the Comstock lode is in some respects no less extraordinary. This consisted of six 40 in. Pelton wheels, which run under a vertical head of 1,800 feet, driving that number of electrical generators, the power from which is conveyed up the shaft to the Nevada mill, some 2,000 feet distant. These wheels only weigh 220 lb. each and with nozzle tips of an inch diameter develop 125 h. p. each.

The water is first run over a Pelton wheel on the surface under 400 feet head, and then carried down the shaft by a pipe to the Suro tunnel level, where the underground station is located, the power from the electrical generators being conveyed to the counter-shaft of the mill with which the surface wheel is connected, the two distinct forces working together in perfect harmony.

A most interesting illustration of the double use of water is here given, some 400 h. p. being produced in this way from what may be termed waste water. This station has now been running more than three years without interruption and practically without expense in the way of repairs, as well as without any appreciable loss of efficiency, affording a most striking example of the advantages of water power, both by direct application and electric transmission, as well as the reliability of such a plant under such extraordinary conditions.

London Streets in the Time of George II.

There were certain dangers and inconveniences in walking along the streets in London in the seventeenth century, says Walter Besant in *Harpers*. The finest street might be ruined by the carelessness of a dustman or chimney sweep; the custom of exposing meat on open bulkheads led to many irreparable stains of grease. Bulbs pushed the peaceful passenger into the gutter—it was a great time for street swaggers; letters were flung into wigs at open doorways, causing violent wrath among those outside; mad bulls careered up and down the streets; men quarreled, made a ring and fought it out before the traffic could go on; pickpockets were numerous and dexterous; footpads abounded in open squares of Lincoln's Inn, Bloomsbury and Portman; highwaymen swarmed on all the roads; men servants were insolent and rascally; the noise in the leading streets was deafening; in a shower the way became impassable from the rain spots in the roofs, which discharged their contents upon the streets below.

Manners by a Boy.

Manners ain't if it with mussul. When it comes to a pinch mussul is what count.

Manners is mostly for company. Ma don't say so, but that's the only time she uses any manners is when they is company.

Manners is all rite for girls. It don't matter whether they appear well or not.

Manners only pays for boys when they is nine p' cent coming and you like to get away from the table if you don't act perlit.

I'll yer haf ter do is ter drink soop out the side of yer soop and not laf while the minister sez grace.—*De Troit Tribune*.

At a London bookseller's is a complete set, in fifty volumes, of Voltaire's works bound in calf. They were the possession of a lawyer who gave them their sober covering for the purpose, doubtless, of deceiving his clients; and to further the delusion he had the books labelled "Arouet's Reports," Arouet being one of the philosopher's baptismal names.

Of late years Rosa Bonheur has painted only heads or single figures of animals, but there is now an exhibition in London a recent work from her studio showing a group composed of a lion, a lioness and several cuts. The background is a representation of an African scene, with palm, date and aloes trees and a mountain range in the distance.

A Game of Blind Man's Buff.

Eating Before Sleeping.

It used to be considered prejudicial to good health to partake of food just before going to bed. But many physicians now recommend to their patients a light meal before retiring. On this subject Dr. W. T. Cathell, in *Md. Med. Jour.*, says:
