The Kickapoo Indian Med. Co. will locate their Indian village at McMinnville, commencing Monday, Aug. 28th, and remain for three weeks. The mere fact that they remain the length of time they ought to convince the most skeptical that their medicines have all the virtues that they claim for them.

The youngsters of the city are growing quite athletic. One day last week Jesse Irvine and Wells Cooper wrestled for a purse of \$4. Wells won the last two falls. It was catch-as-catch-can and the question of strength is now settled. This is considerable better than settling the matter by a fight.

On Saturday last an alarm was turned on and the water plant, two hose teams and the hook and ladder truck responded promptly, owing to the new alarm. The fire was put out before the fire department arrived. It was the grass in a vacant block north of A. J. Peckham's house.

A Unattila man with a very long face who knew his crops were ruined has found upon threshing his wheat that it averaged nearly 25 bushels per acre. There will be quite a number in Linn county in the same boat. The harvest will prove a great deal better than the expectations.—Albany Democrat.

A sample of Oregon teasels has been sent to this office by A. R. Burbank of Lafayette. Mr. Burbank does not grow them in quantities, but says that A. F. Sawtelle, of Molalla, Clackamas county, cultivates them largely and ships to New York and Europe, finding a demand for all he can produce. Teasels are a biennial crop on first seedling, grow to perfection in this state and would undoubtedly prove a profitable crop for a large number of farmers, as nothing has ever been found or invented for raising their place in woolen factories for taking the nap on cloth. France produces them in the largest quantities.—Oregonian.

The Pioneers Object.

The old pioneers of Oregon City object to having the body of Wilson, the murderer, rest with the bodies of the old pioneers of Oregon in the Oregon City cemetery, and in all probability the body will be taken up and buried elsewhere. It may be interesting to note that Wilson's brain weighed 64 ounces, and has but one superior and but one equal in weight. The brain of the French naturalist Cuvier, the heaviest on record, and that of Edward Henry Knight weighed the same as Wilson's.

They go to Vancouver.

On the coming Saturday Chas Woods and his string of motters will leave the McMinnville track for Vancouver, Wash., where they will go into training on the new track lately finished at that place. They will go by steamboat taking it at Dayton. Several of the best bred and most promising horses in the state are in the hands of Mr. Woods, and the loss of him at this time will do the breeding and speed interests of this section a vast injury. He has been in this track for a number of years and he has had all that he could do. He thinks that he can better his condition by being in a city that attempts to keep up the trotting interest. This track, while one of the best in the state, has received but little attention from the association that owns it and it is slowly going down. The association is in a comatose condition, and unless an association takes place soon the property will probably be sold out or cut up into city lots. It seems as if this profitable and rich section of the state could support a track and also a county fair. Lack of proper interest in the matter has brought it to its present condition.

Astoria Railroad.

The Astorian says that the news of the most encouraging nature comes in from the vicinity of the great tunnel on the route of the Astoria & Eastern rail way. A gentleman who came in from that point states that about 700 men are bunched on the last three miles of the rock this side of the tunnel, and that but a short time will elapse before that portion of the road will be finished. All who have inspected the completed portions of the road say that the work is as good, if not better, than anything else of the kind in the country, and no expense is being spared in that construction. Where the route lies along that selected by William Reid for the Astoria & South Coast many changes have been made and where Reid intended gutting in trestle work in crossing gulches Mr. Gross is filling in by cutting immense quantities of rock, thereby making the roadbed one of the best ever built. It is expected that as soon as the first assignment of rails arrives here, cars will be running from the seaside to the tunnel within two weeks at farthest, as the Messrs. Corey Bros. are confident that they will lay three miles of steel daily. It is even possible that the connection will be made between the tunnel and this city before the expiration of the present year, and that the citizens may have the pleasure of riding out behind the iron horse and viewing the picturesque scenery of the Nehalem country, and inspecting its magnificent timber.

HILLSBORO, Or., July 23.

This is to certify that I have had a skin disease on my face for the last 12 years. It was first started by the explosion of a gun while out duck hunting. I have used all kinds of medicine in fact, I used everything I could hear of, all to no avail. About eight days ago I bought a box of the Kickapoo Indian salve and have used it every night before retiring and now I am entirely cured. I have only used about half a box and would not take \$10 for the balance of the box if I could not get any more of it. T. R. SLATTERY.

Mr. S. T. Davidson, of Forest Grove, says: "I have been troubled with Dyspepsia in a most aggravated form and suffer very much when eating.
