Mr. Newton finally replied that no arguments would avail. He must enter upon his work according to his own ideas of independent action or not at all.

A few days saw all the changes com-pleted. The splendid mansion where the Newtons had passed so many happy hours was transferred to other hands, not without natural regrets, but without a murmur. Selecting such articles as would suit their altered circumstances, the family removed immediately to their new home, leaving such property as they could claim to be sold at auction. When all was sold and fully settled, Mr. Newton was thankful to find that between \$4,000 and \$5,000 clear remained in his hands, besides the unpretentious furnishings of the farm home and the expenses of removal. Part of this money he at once safely invested, reserving only what would supply their wants till they might hope to receive something available from

Eustace the stock and farming implements he had secured with the place. A very honest and efficient farmer, who had for some years lived in a little cottage near by and superintended the work, was also retained, Mr. Newton being aware that he should economize by securing trusty and experienced farm laborers till such time as he might hope to acquire the requisite knowledge him-self. During the coming winter, while engrossed in such preparatory labor as every farmer understands is essential for summer operations, he would at the

same time become familiar with both theoretical and practical agriculture. The storm that threatened Rose's peace had onicity subsided, and her spirits rose often to their natural tone, but at times discordant note told too plainly that her heart was not fully reassured. The young man meanwhile was assiduously to banish every cloud from the sweet girl's brow, and all his really excellent qualities were called into action and his hasty temper and natural hauteur were wisely controlled when at the farm, which by no means was infre-

And so, happy in their new occupations, without ennui or discontent, each actively employed during the day, looking forward with even more than the old exhilaration to the peaceful evenings, which always gathered them together to mingle in pleasant conversation or instructive reading, the winter glided

cheerfully on.

Fearful of another explosion from Grenville the family had all been very careful not to hazard any remark in his presence with reference to the intense public feeling which by this time was fast culminating toward a crisis. The wisdom may be doubted of the strict reticence, but the time was drawing near which must compel a full separation of the "sheep from the goats" and call in trumpet tones to all: "Choose ye this day whom ye will serve. If the Lord be God, then follow him. If Baal, then follow him." That strong affection which shrinks so naturally from giving pain to the beloved one is not always the wisest counselor, but the good parents,

"It certainly will not be half so heavy upon her as the torturing suspense under which she has for some weeks been pin-ing. I think we have been unwise to nceal our knowledge of his intentions so long. But I will at once unmask the villain! My sweet darling sister!"

When the young men entered the house, all gathered anxiously around Eustace, for, his face once seen, there could be no doubt he brought tidings of great importance. The tale was soon told. The fearful step had been too long anticwith the excitement and indignation it caused. The color fled from every face, in his behalf. There were a dozen men on horseback and one of them produced a noosed rope and flung it words to ten how willingly they would offer their lives for a country so dearly loved and bitterly insulted.

"And now may God bless us and speed us to our work," said Eustace, while with his arm thrown closely around Lillian he read with pride and admiring love the unselfish spirit with which she laid her heart's life on her country's altar.
