Wille, Emmet county, in., penetrating to the depth of 14 feet. Within two miles other fragments were found, one of which weighed 170 pounds and another about 32 pounds. The principal mass weighed 431 pounds. All the discovered parts aggregated about 640 pounds. The one of 170 pounds is now in the cabinet of the State University of Minnesota. The composition of this aerolite is peculiar in many respects; but, as in nearly all aerolites, there is a considerable proportion of iron and nickel.—Iowa State Register.
The tax roll for the year 1898 will be in my fands for collection on Monday, the 12th day of March, 1894, at the hour of one o'clock p. and state day of March, 1894, at the bour of one o'clock p. and state day of March, 1894, at the south door of the county organ, settle their tax. On account of the low mass.
February 7, 1894.
