The remarkable weather of last week was supplemented by rain after a most delightful Easter Sunday. There is a compensating feature, however. Fruit buds are rapidly approaching the opening stage.

We are under obligations to W. D. McDonald for copies of the San Diego papers. We hope Doug is enjoying himself in the land of climate sun oranges, but he is a little early for the approaching bull fights and square dances we see advertised in the papers. Witnessing one of these spirited entertainments must be a thrilling experience that an Oregon bank cashier would not intentionally miss. The paper says that as this part of the entertainment is so dangerous it is kept until the last of the day's performances. The wildest bulls that can be found will be let loose in a corral 100 feet square. To the best and most successful matador with his assistants, who succeeds in vanquishing the bull, a premium of \$50 will be given. It doesn't say what the bull gets if he succeeds in vanquishing the matador, but it ought to be something handsome.

The executive committee of Workmen, composed of one member from each lodge in the county, met in this city Saturday, to fix a basis of delegate representation to a meeting to be held in this city April 21st, to fix a time and place for holding the annual picnic celebration. The basis was made one delegate for every fifteen members and one for every fraction of ten. Some think the last of May in this country has less rain than the first part of June, and there will be a disposition to set the date earlier this year. Last year the celebration was held June 14th, and rain did much to mar the pleasure of the occasion. There are seven lodges of the order in the county, with an aggregate membership of about 400. McMinnville leads with 104 members. The others are located at Amity, Newberg, Sheridan, Dayton, Lafayette and Carlton.

His quarters had become very foul and he was living on insufficient food for his proper nourishment. It is thought the new associations, wholesome food and a good bath occasionally will at least restore him to former mental vigor. He was not averse to making the change.

Is more to be dreaded than an open and visible one. That subtle and lurking foe, which under the generic name of malaria manifests itself, when it clings to us in dangerous grasp, in the various forms of chills and fever, bilious remittent, dumb ague or ague cake, can only be effectually guarded against by fortifying the system against its insidious attacks with Hostetter's Stomach Bitters, a thorough antidote to the poison of miasmata in the system, and a safeguard against it thoroughly to be relied upon. In the event of a malarious attack, avoid poisoning your system with quinine, and use instead this wholesome remedy, unobjectionable in taste and far more efficacious than any drug. Use the Bitters for dyspepsia, biliousness, constipation, kidney complaints and rheumatism.

Taken to the Asylum.—Peter Head, the little French Italian, on familiar terms with and known to everybody in McMinnville, was taken to the insane asylum by C. R. Cook on Friday. Poor Peter had for some time been getting more and more mentally unbalanced. He thought he saw spirits at night, and would go gunning for them, and keep up a fusillade until the early hours of the morning. The shanty he occupied in the north part of town is peppered with bullets. One of the spirits he could see every night was a little woman which he tried to drive away with a club, but she would dodge him every time he would strike at her. Taken to the Asylum.—Peter Head, the little French Italian, on familiar terms with and known to everybody in McMinnville, was taken to the insane asylum by C. R. Cook on Friday. Poor Peter had for some time been getting more and more mentally unbalanced. He thought he saw spirits at night, and would go gunning for them, and keep up a fusillade until the early hours of the morning. The shanty he occupied in the north part of town is peppered with bullets. One of the spirits he could see every night was a little woman which he tried to drive away with a club, but she would dodge him every time he would strike at her. His quarters had become very foul and he was living on insufficient food for his proper nourishment. It is thought the new associations, wholesome food and a good bath occasionally will at least restore him to former mental vigor. He was not averse to making the change.

No woman has any real admiration for a man's physique unless the man has a good physique—legs and arms well filled out. "You can't be well-looking" if you suffer from any of the diseases caused by a disordered liver or impure blood—dyspepsia, biliousness and scrofulous affections. Dr. Pierce's Golden Medical Discovery is a medicine that cures these cases. It's the only remedy that's guaranteed to benefit or cure, in every case, or the money refunded. Medical science stamps it "absolutely potent" as a blood-cleanser, strength-restorer and flesh-builder.
