POWHATAN'S TRIBE.

LAST REMNANT EXISTS IN THE PA-MUNKEY INDIANS OF VIRGINIA.

A Town of 800 Acres With 110 Inhabitants. White Persons as Equals, but Will Have | seem so simple. Nothing to Do With Negroes.

How strange it seems that a remnant the once powerful confederacy of Powhatan should actually exist at this day not so very far from Washington? This last fragment of a nation, which, at the time of the landing of Columbus, occupied all of the region hereabout, cluding a large part of Virginia and Maryland, consists of about 110 individuals. They call themselves the Pamunkeys and dwell at what is known as "Indiantown," which is situated on and comprises the whole of a curiously shaped neck of land extending into Pamunkey river and adjoining King William county, Va., on the south. The "town" consists of 800 acres and is almost entirely surrounded by water, being connected with the mainland by a narrow strip. The comparative safety afforded by the situation in time of war is doubtless accountable for the presence Tickets of the tribe in this spectrum their survival is due to the protection of the tribe in this spot. Very likely

On the death of Powhatan he was suceeded by Opechancanough, chief of the DENVER, Pamunkeys. The tribe was at that time the most powerful of the 30 warlike tribes which composed the confederacy. The entire nation had 2,400 warriors, and comprised about 8,000 individuals. Of this population 1,000 were of the Pamunkey contingent.

Powhatan was a chief of remarkable valor and judgment. The confederacy organized under the direction of his savage genius was one of the most notable among the many unions of native 32 CHICAGO this aboriginal nation in the early hisfact that Captain John Smith was a hair in stock. writer as well as an explorer. Opechancanough himself was a man of unusual ability. His leadership in the massacre of 1622 made him the most dreaded enemy ever encountered by the colonists

of that period. The Pamunkey Indians, whose distinction it is to be the only Virginia tribe that has survived the encroachment of civilization, have excited the interest of the bureau of ethnology, which has issued a bulletin describing them. Oddly enough, their number has varied hardly at all during the last century. Jefferson, writing in 1781, estimated the population of Indiantown at 100, and How, nearly 70 years later, placed it at the same figure. No member of the tribe is of full blood. While the copper colored skin and the straight, coarse hair of the aboriginal American show decidedly in some individuals, there are others whose origin would not be detected by the ordinary observer.

There has been considerable intermixture of white blood and not a little of that of the negro, though the laws of the tribe now strictly forbid marriage with persons of African descent. The Pamunkeys have a great deal of race pride. Though they acknowledge the whites as equals, they consider the blacks far beneath their social level. Their feeling toward the negro is illus-Above trains stop at all stations from Portland to Albany inclusive. Also Tangent, Shedds, Haisey, Harrisburg, Junction City, Irving, Eugene and all stations from Roseburg to Ashland incluses to accept a colored teacher who was sent to them to conduct the free school. sent to them to conduct the free school which the state of Virginia provides for with that of other races, and how to accomplish this purpose is a serious prob-

lem of theirs, inasmuch as they recognize the danger of too frequent marriages within the pale of consanguinity. To obviate this difficulty the chief men have been trying to devise a plan by which they may induce immigration from the Cherokees of North Carolina. The Pamunkey Indians are not particularly strong and robust, perhaps because of frequent marriages between relatives. They are temperate, moral and peaceable. There is good feeling between them and their white neighbors. They are exceedingly proud of their lineage and love to tell how bravely and stubbornly their forefathers resisted the encroachments of the whites. Opechancanough is their hero. They take great delight in reciting the famil-Through Tickets to all points in Eastern iar story of how this noted chief, when States, Capada and Europe can be obtained at lowest rates from G. A. mustache!" This explanation from one street gamwho were conversing on the corner. o collect the mail from the box. At- Washington Star. tached to it was a small sized sorrel horse, which had, sure enough, an elegant mustache about 2 inches long and curled in a manner which would excite the envy of any dude. From Mr. Brown it was learned that the horse was about 6 years old, and that he purchased him from a negro. The negro raised him from a colt, and in early life he commenced sporting his mustache. To relieve himself of the bother of answering questions, the colored man had kept the whiskers trimmed, but Mr. Brown, since he became possessed of the animal, had permitted them to grow. -- Nashville American.

A curious case of "cure by suggestion" is reported from a large German hospital. A girl of 18 was under the impression that she had swallowed a frog, which was alive in her stomach and often jumped almost up into her throat. The doctors had vainly tried to cure her of this illusion, and she was rapidly dying, when it occurred to one of the medical men to put a tube into her mouth in which a small frog had been placed. The lively creature jumped almost immediately out of its prison house onto the table in front of the girl, and a youthful student put it into spirits, labeling the bottle, "Extracted from a stomach." The moment the girl saw the creature a beaming smile spread over her pale face, she took food at once and greedily and is now completely cured. - Westminster Gazette.
