THE manner in which the nomination of Hill is received by the democrats of New York does not give promise of harmonizing the differences between the several factions.

We consider Mr. Hill the most dangerous man in American public life. He is a "Dare Devil" and delights to be considered such.

Anagrams and Acrostics Have Been Known Since the Days of the Egyptians.

It seems ridiculous that the people who lived hundreds and hundreds of years ago were more interested in puzzles than you and I are today. This is true nevertheless. The puzzles I refer to are those in writing, although the ancients probably occupied some of their spare time with strange and puzzling devices of wood and metal, as we do.

few words. Strive to strengthen and develop those parts of the body which have been slightly by nature or weakened by disease or abuse; guard zealously such structures and see that they are never subjected to undue strain or too active exertion; neglect not the improvement of every part of the economy, but seek first to improve the weakest structures; look well to organs of vital importance—the heart, kidneys, etc.—and seek especially to advance their good. A fine physique is not to be ignored, but of far greater importance are a strong pair of lungs, a normal, well guarded heart, good digestive apparatus and functionally sound kidneys. The strengthening and developing of vital structures require more skill and perseverance than the training of the muscular system and should be conducted with much care and diligence.—Dietetic and Hygienic Gazette.

Est Fruits.

The warmth of summer tends to biliousness and fevers, and the free use of fruits counteracts this tendency. This is because the acids of the fruit help to facilitate the separation of the bile from the blood, a process slackened by the approach of hot weather. "Fruits are cooling" is an expression often used, but why this is so very few understand. It is so because the acid of the fruit stimulates the liver to greater activity in separating the bile from the blood, which is its proper work; the result of which is the bowels become free, the pores of the skin are open, and under such conditions fever and want of appetite are impossible.

Sugar.

Sugar, the modern commodity, which we class among the indispensable necessities, was wholly unknown to the ancient nations. The word "saccharum" occurs but once in the Latin translation of the Bible, and the equivalent for our word "sugar" is first used by Pliny, whose writings are almost contemporaneous with the ministry of Christ. He calls it "honey collected in (from) reeds" and says that the Romans first became acquainted with its use in Arabia Felix.

Americans in England.

Not for years have Americans and America occupied such a large share of attention and interest among Englishmen. In the first place, London is full of Americans. They monopolize the hotels and are everywhere in evidence. The throng at Embassy Bayard's dinner was as great as in any previous year. The heat on the continent is driving the majority of tourists to England, and it is fair to say that John Bull is treating Brother Jonathan with warmer hospitality than has been his wont.—London Standard.
