There were no windows able correctness of Mr. Elkins' erages 15 to 25 per cent better than the post office, and for a law office he on the streets, the life being concenstatement, but he is mistaken in the that of a year ago. In some sections has rented a room in the Bank of trated in the interiors of their houses; idea that the people of this country the situation resembles a "boom" Newberg brick. want to be Mexicanized. The greater and the recent rainfall has helped on The safe cracker seems to be on "relative prosperity" of the Mexicans consists in the fact that they are consists in the fact that they are the case. Several years ago the writer lived in a frontier settlement where the people were "relatively ore, coke, pig iron, steel billets and biggest haul they have made in these and takes notes of "the safe currenprosperous," but as his memory serves him now there were few of ture, as well as the advance of Ex-Policeman Tom Belcher of the past thirty years. There was no them that cared so much about the relativeness of their situation as they did about the opportunity of getting did about the opportunity of getting.

Wages to workingmen, which would indicate that an increase in the prices of finished products must indid about the opportunity of getting on in the world. Pleasant recol- evitably follow. Railroad companies next fall. Mr. Belcher spent about from active business. The president lections cluster about those days of and other iron consumers have been two years in California where fruit has evidently learned a lesson. equality, but there were a great scrimping so in their purchases for has been king for several years, many inconveniences to put up with. two years past that a speedy and and he is now an enthusiast in the If we wanted any more of it we would general revival of the demand is in fruit business. He will set about go to Mexico and live under free- prospect. coinage. If "relative prosperity" of the Mexican kind is what the people and Black seas will be about 1000 of this country want, it is time to cease the clamor for more money.

\$4.70 per capita is all we need, and estimated cost is £20,000,000, and the control of \$4.13 of that can be silver. Four-fifths of our money should be retired at once. If free-coinage is the cause of this relative prosperity in Mexico, as Mr. Elkins infers, it is fair to

says it would be molasses for the democratic party to select a presidential candidate from the south. Items to be performed in six days, reckoning six knots as a maximum speed. Other dential candidate from the south. No southern man, it says, is anxious touched by the canal will be benefitto lead a forlorn hope. It is a for-navigation in the various rivers. lorn hope whether the candidate Scientific American. comes from the south or the north, but the Times-Democrat and other papers are wrong in assuming that the north would object to a southern man for president because of the prejudices growing out of the war which ended thirty years ago. The trouble is nearer the present. It is due to the election methods in the southern states. When they will allow all men to vote and be counted as is the rule in the north a southern candidate will stand before the whole people just as does a northern candidate. But in the northern states the people do not allow one man or a set of men to own and control a section of the state and use that power to secure the endorsement of the whole state. The downfall of David B. Hill as the Tammany gard the Japanese race as an offshoot the whole. Only about six or eight
