ADMINISTRATOR'S NOTICE.
In the County Court of Yamhill County, State of Oregon,
In the matter of the estate of Lars A. Newgard, deceased.
NOTICE is hereby given that the undersigned has been appointed administrator of the estate of Lars A. Newgard, deceased, by the county court of Yamhill county, Oregon. All persons having claims against said estate are requested to present them to me at McMinnville, Oregon, within six months from the date of this notice. Filed at McMinnville, Oregon, this 28th day of June, A. D. 1895.
E. NELSON, Administrator.

CASTORIA
for Infants and Children.

THIRTY years' observation of Castoria with the patronage of millions of persons, permit us to speak of it without hesitating. It is unquestionably the best remedy for Infants and Children the world has ever known. It is harmless. Children like it. It gives them health. It will save their lives. In it Mothers have something which is absolutely safe and practically perfect as a child's medicine.

Castoria destroys Worms.
Castoria allays Feverishness.
Castoria prevents vomiting Sour Curd.
Castoria cures Diarrhoea and Wind Colic.
Castoria relieves Teething Troubles.
Castoria cures Constipation and Flatulency.
Castoria neutralizes the effects of carbonic acid gas or poisonous air.
Castoria does not contain morphine, opium, or other narcotic property.
Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep.
Castoria is put up in one-size bottles only. It is not sold in bulk. Don't allow any one to sell you anything else on the plea or promise that it is "just as good" and "will answer every purpose."
See that you get C-A-S-T-O-R-I-A.

The fac-simile signature of J. C. H. Pitcher is on every wrapper.

Children Cry for Pitcher's Castoria.

The Reporter and Inter Ocean one year for \$1.35.

FROM THE COUNTY PRESS.

Dayton Herald.
T. W. Smith was notified from Washington, D. C., that his application for pension has been allowed, and would date from April 3d, 1895. The application was for an increase, and was granted within 60 days.
A. L. Alderman bid in a lot of potatoes at sheriff's sale, several weeks since, which he had attached. He disposed of 600 sacks at 5 cents a sack. The "culis" he sold at 50 cents per wagon load.

Grandmother Sawyer, who lives near Wheatland, and whose condition is such that she cannot swallow food, is in a critical condition. The attending physicians say that nothing can be done for her relief, except to insert a tube into her stomach, through which to convey food to her stomach. This the old lady is unwilling to have done.

Yamhill Independent.
Pacific band is decidedly in it, having accepted a proposition to play at Portland on the 4th at a good figure.
Mr. A. Bowman is having a scow towed up from Portland, and will then be ready to furnish gravel for the roads. The prospect is that there will be a good deal of gravel road built this year, considering the hard times.

A number of young men, including Prof. C. E. Lewis, Prof. A. C. Stanbrough, Clifford Terrell, Walter Kirk, Charley Wilson, Oscar Cox, Harlan Ong, Geo. Tolson, L. R. Stanley, and possibly Prof. C. A. Hodson and others, will leave the first of the week for British Columbia, where they expect to combine business with pleasure by canvassing for the sale of Kilburn's stereoscopic views. We hope they may have a pleasant vacation and secure lots of the queen's gold at the same time.

Newberg Graphic.
Charley Hodson has secured the principalship of the Dundee school for next year. Charley has proven himself to be a successful teacher, and the patrons of Dundee schools will no doubt be well served.

Amity Blade.
One of the Converse boys, whose home is on the W. H. Harrison farm west of town, left yesterday for a visit in Iowa.
Road Supervisor Henderson is doing the right kind of work in the hauling of gravel for the repairing of bad places. When done in this way it is done for all time and the increased expense is easily offset in the repairing of the same road for the space of even two years of the old way. Much gravel has been put on during the past two weeks in and around Amity, where most needed, and many mudholes of long standing will be known no more. Mr. Henderson has been busy for several days past in moving the road south of town off the railroad land. The telephone poles are being moved by the company, out of the county road. In several places along the line the poles are yet in the road contrary to the agreement, which allowed them to be placed at the edge of the roadway.

Travelers find a safe companion in DeWitt's Colic and Cholera Cure. A change in drinking water and in diet, often causes severe and dangerous complaints. This medicine always cures them. Rogers Bros.

A Peculiar Land Case.
A very complicated land contest case occupied the attention of the United States land officials the greater part of last week. M. L. Jones who lives on the Willamette river about six miles north of Salem, purchased from the state a small tract of land adjoining the farm on which he lives and cultivates, as school land, but for some unexplainable reason this tract of land remained on the maps at the land office as vacant. It was about fifteen years ago that Jones secured this land, with title from the state, and proceeded to fence and place the same in cultivation. Two years ago Thomas J. Arthur discovered that this piece of ground was marked vacant on the plats in the land office, and J. T. Apperson, who was registered in the land office at that time, permitted him to file a homestead on the piece of improved land in question. Mr. Jones brought suit against Arthur in the state court to establish his title to the property, and received a favorable verdict, but the latter still had a claim on the improved possessions of the former by virtue of a homestead entry, in the United States land office. Mr. Jones now brings suit before the land officials to cancel Arthur's homestead entry, in order that he can take up a homestead on occupied premises that he purchased from the state. Mr. Jones desires to homestead the land himself, so as to settle any claim the United States government has to the land. Numerous witnesses were examined and further consideration of the case postponed until next November.—Oregon City Enterprise.

Highest of all in Leavening Power.—Latest U. S. Gov't Report

Royal Baking Powder
ABSOLUTELY PURE

Portland has a Trilby quartette. It is said the Oswego iron works will soon resume operations on a reduced scale, and if business increases will employ again the old force of 300 men.

They were married at Eugene the other day. His name is Johnnie May Bower, and her name was Jennie Mae Bowersox. She simply took off her sex, and the issue was joined.

Alonso Swarts, who killed his son in Marion county, was found guilty of murder in the second degree, and Judge Burnett sentenced him on Saturday to life imprisonment.

The Swarts family has cost Marion county many thousands of dollars in various criminal prosecutions. We presume it would aggregate as much as the total of the present county indebtedness. Some day, and the time approaches, the people will quit raising such families.—Statesman.

A young woman at Astoria, whose husband has been missing five days, hearing that the body of a man had been found in the river at once decided that it was that of her spouse. She immediately went to town and without troubling herself to identify the remains, spent \$15 buying crepe and material for a mourning dress. When she reached home she found her husband making a pot of tea at the kitchen fire.

The Southern Pacific on Sunday made effective a new time card, on the east side, which means faster running of trains. The overland now leaves Portland at 8:50 p. m. instead of 9:15, and arrives at 8:10 a. m. instead of 8:20. The Roseburg passenger train will leave Roseburg each morning at 8 o'clock instead of 7, and arrive in Portland at 4:40 in the afternoon, instead of 4:30, making 50 minutes faster time from terminus to terminus. South bound it will leave Portland at 8:30 a. m. and reach Roseburg 30 minutes earlier than formerly. The new local train between Portland and Salem will make fast time. It will leave Salem each morning at 8 o'clock and arrive in Portland at 10:15. In the evening it will leave Portland at 4 o'clock and arrive at Salem at 6:15. This train will be known as the "Salem passenger."

James McErlane, freight train conductor between Albany and Yaquina, is a hero. On the 16th inst. his train was rushing along near Blodgett station at a speed of 15 miles per hour. A county road parallels the track for some distance in this vicinity, and as the train shot around a curve in one of the narrow defiles those on the train saw a sight that almost froze their blood. On the hillside road, a few yards distant from the pitched and plunged. To his side, her foot hanging in the stirrup and her head dragging was a young woman. The sudden appearance of the train had frightened the animal, and he had thrown his rider but her foot had hung in the stirrup and refused to become disengaged. She had already lost her hold of the reins and the horse was free to dash away in any direction with his burden, and the only thing that seemed to hold him temporarily in one spot was his fright at the long train. All suspense was ended when Jimmy McErlane leaped from the train and up the bank, grasped the reins and saved the frightened lady. As she is young and pretty and Jimmy single, the Corvallis Times is wondering why the story might not end as the yarns they tell of in the novels.

We recommend DeWitt's Colic and Cholera Cure because we believe it a safe and reliable remedy. Its good effects are shown at once in cases of cholera morbus and similar complaints. Rogers Bros.

The Western Stationer states that a new bicycle tire is being tried, built on the compartment plan. The arrangement is such that a series of chambers are produced in the tire, each independent of the other, so that in case the tire is punctured that in case the sharp piece of glass, only part of the tire will collapse and the rider of the wheel can continue on his journey. If a pneumatic tire is punctured now, the entire tire will collapse wholly, and the machine is useless until repaired. The new tires are made of pulp produced from paper stock, and are of sufficient durability to permit usage on carriage wheels as well as bicycles. It is claimed that the tires manufactured on the compartment plan are as easy riding as the most elastic rubber pneumatics.

Persons who are subject to diarrhoea will find a speedy cure in DeWitt's Colic and Cholera Cure. Use no other. It is the best that can be made or that money can procure. It leaves the system in natural condition after its use. We sell it. Rogers Bros.

A Cure for Colds.
We are often told that while we may be able to cure consumption or pneumonia, yet we cannot cure a common cold. We desire to state in this connection what we have often said before, that we have a very favorite remedy for all these cases. We have tried it in very many instances and with almost invariable success. The remedy to which we refer is pharmaceutical. So soon as the patient feels the premonitory symptoms of the cold let him take a hot footbath at bedtime, drink freely of some warm drinks, and take five, seven and a half, or even ten grains of pharmaceutical. In a strong adult we do not hesitate to give the full dose of ten grains. The result is that the patient has a good night's sleep and awakens in the morning free from pain, while nearly all the symptoms of the cold have disappeared. Of course unusual care must be exercised during the day to prevent the body from becoming chilled.—Medical Compend.

DeWitt's Colic and Cholera Cure never fails to give immediate relief. It cures just as sure as you take it. Rogers Bros.

DEFINITIONS OF HOME.

A prize was offered recently by the London Tit-Bits for the best answer to the question, "What is home?" Here are a few of the answers which were received:
The golden setting, in which the brightest jewel is "mother."
A world of strife shut out, a world of love shut in.
Home is the blossom of which heaven is the fruit.
The only spot on earth where the faults and failings of fallen humanity are hidden under the mantle of charity.

An abode in which the inmate, the "superior being called man," can pay back at night, with fifty per cent interest, every annoyance that has met him in business during that day.
The place where the great are sometimes small, and the small often great.
The father's kingdom, the children's paradise, the mother's world.
The jewel casket, containing the most precious of all jewels—domestic happiness.

Where you are treated best and you grumble most.
Home is the central telegraph office of human love, into which run innumerable wires of affection, many of which, though extending thousands of miles, are never disconnected from the one great terminus.
The center of our affections, around which our heart's best wishes twine.
A little hollow scooped out of the windy hill of the world, where we can be shielded from its cares and annoyances.
A popular but paradoxical institution, which woman works in the absence of man, and man rests in the presence of woman.

Fishing by Electric Light.
Eastern anglers are taking a leaf out of the book of the fishermen of the Pacific coast. It will be remembered that an enterprising Californian was the first in this country to utilize the idea of attracting fish by the electric light. He had the net for his coast fishing studded with incandescent lamps, which were connected to batteries in an accompanying boat. As soon as the nets were sunk the current was turned on, and the incandescent filament drew fish from far and near, far surpassing in its effect on the haul the most irresistible of baits. An Albany man has devised an "electric net," which works very much after the same fashion, except that the electric light used is fixed above the water instead of below its surface. When the light is placed in position, the nets are set either to seaward of it or around it, flat upon the bottom. When the fish are drawn to the lamp, a rubber tube which runs along the top of the net is inflated by a pump in the boat, the upper edge of the net will rise to the surface—the lower edge being held up by sinkers—and the fish are caught. A New Yorker has made a modification of the Californian plan of using submerged lights. He simply puts a three candle-power lamp into a quart preserving jar, lowers it into the water, and runs it with a sewing-machine battery. He recommends those who wish to follow his example not to spend \$20 on a battery, but buy an electric hand-book, and with three globes securely fastened in a plain wooden box make for themselves for about \$2.50 a battery which will do just as well. He says that night fishing becomes a very lively sport if the light is placed anywhere in the neighborhood of fish. They swim around and spend considerable time investigating, but as soon as their curiosity is satisfied they get down to business and discuss the baited hook, which is dangling nearby.

The agricultural experiment station at Morgantown, W. Va., announces that it has been making a study of cut worms under glass cases, and finds that they turn into grasshoppers. The cut worms are very numerous this spring on account of the scarcity for two years of quail and turkeys.
According to the official statistics, there were 926 strikes in England during 1894. Of this number, 17 per cent ended successfully for the strikers, 14 per cent were partly successful, 51 per cent were failures, and 16 per cent had no definite result. Generally speaking, therefore, the workmen got the worst of it, and the cause of labor lost more than it gained.
Most medical men consider that a cold bath every morning is apt to do more harm than good to any but very vigorous constitutions. The sensible thing to do is to see that the temperature of the water in cold weather is not lower than that of the air. A daily bath is a most healthful practice; but it should not be so cold as to give a shock to the system.—Scientific American.
