If furnished in time to be current news. Additional matter 10 cents per line.

FRIDAY, AUGUST 6, 1907.

THE New York Independent and St. Louis Globe Democrat spell it Klondike. The Inter Ocean has it Klondyke. Clondyke is right in Oregon because that is the way the Oregonian spells it.

OREGON will form the chief base of supplies for the new gold region. With a mining population of forty or fifty thousand settled on the frozen Yukon, the demand for Oregon flour, pork, beef, butter, eggs and poultry will be something worth mentioning.

KEEP an eye on the democratic party. The manner in which leading democrats are flocking to the standard of protection is ground for apprehension that before long it will lay claim to being the original and only true advocate of protection to American industries.

THE Corvallis Times used to be a Bryan organ, and we fail entirely to comprehend this sentence from a cheerful editorial of last week pre-arranging the arrival of better times: "Removal of the cheap silver wheat of India and Argentina from competition places our own wheat upon an equal footing and a double effect in lifting the price should be felt." The silver basis, then, makes cheap wheat.

THE union party in Yamhill county is one of those unfortunate creatures deprived of parental affection or pride. Both democrats and populists blush every time they think of the record it has made—the part it took in the legislative hold-up last winter, its failure to redeem its promises of economical administration, the violation of its pledges in regard to deputy hire, and worst of all the "county seat ring" that has taken charge of its affairs. What better could be expected of a mongrel posterity though?

SPEAKING of the decision of Judge Stearns that nickel-in-the-slot machines are gambling devices under the law, the Tillamook Herald, which is edited by a lawyer, says: "This is quite right. Such machines are a harm to the community, as by their use a spirit of dependency upon chance is cultivated which is demoralizing to young people, who lose the ambition so necessary in this fierce age of competition, and gradually are led to idle away their time, waiting to hear the result of some speculation in a lottery ticket, or are led to resort to the gaming table by such apparently harmless things as nickel-in-the-slot machines. They should be wiped out of existence. A merchant who cannot sell his wares on their merits without resorting to such devices is not worthy of patronage."

"CAMPAIGN promises on the part of republican officials have never been lived up to. The present county officials have not yet violated a promise. With more business and more prisoners to feed, the expenses have been \$1800 less for the year 1896-97 than for the year 1894-95," says the Telephone-Register. For bold, audacious mendacity the foregoing takes the cake. Point out a single instance in which republican officials have failed to live up to their promises. You can't do it. The popocratic officials have "not yet" violated a promise. Not yet is good. Why? If you caught a man with a halter on one of your horses trying to lead it out of the barnyard, would you say the man had not yet done anything wrong? The popocratic officials have got their halter on that \$1800, at least the most of it, in the shape of a suit against the county. And you say the business of the year just closed has been greater than during the year preceding? Then what has become of the fees that should have been turned into the treasury? According to the records, the county clerk's office has collected and turned into the treasury over \$800 less fees than was collected and accounted for in the last year of Asa McKern's administration.

YOU WILL LIKE IT.

This week we present The Reporter in enlarged and improved form. This step has been decided upon after careful consideration of the problem, how best to meet and continue to serve the public demand for a newspaper giving the largest possible amount of intelligence, both local and general. The problem is forced to the front by the unmistakable signs of reviving prosperity among the people, the result of bountiful harvests and the assurance of remunerative prices for their toil. From this time-forward The Reporter will give more than double the former amount of general news, and expects through the development of its corresponding staff to cover the local field more fully than has ever been done by any newspaper in the county heretofore. While the expense of printing the paper will involve an increased outlay of cash, the price will not be advanced but will remain at the exceedingly low figure of one dollar a year. We ask and shall expect our friends to help us in this enterprise. There are several ways in which they can do so: 1. By paying their subscriptions in advance. 2. Those who are in arrears can assist greatly by paying up back amounts, and just for the sake of a fair turn about, a year in advance. During the past three years we have said very little to patrons about pay, owing to the fact that times were very hard. Some few have paid very promptly in advance (these are the printer's salt of the earth), many others have fallen a year or so behind, and not a few are still farther back. 3. All can assist us materially by speaking a kind word for The Reporter and inducing their neighbors to become patrons. 4. By calling at the office or hailing the editor on the street and communicating any item of news or interest to the public.

THE fact is that our popocratic contemporary seldom makes a statement in reference to county affairs except for the purpose of misrepresentation. This was notably the case with its references to the affairs in the sheriff's office prior to and since the 1896 election. When during that campaign it declared that all of the \$3,500 paid to Mr. Henderson over and above his salary was "stealings," it stated what every intelligent person knew to be false and malicious. When it stated that not only this item of "stealings," but also the item of deputy hire in the sheriff's office, would be saved if Henry was elected, it stated that which was untrue. And now, in the face of the fact that Henry has drawn more in excess of the salary stipend than his predecessor, and in the full knowledge that he has involved the county in expensive litigation to recover that \$600 item for deputy hire, when it publishes a statement that the present county officials have saved the county \$1800 or any other amount, it is simply lying down and wallowing in the filth of lie number one.

NEW POPOCRATIC PLATFORM.

The New York Sun is authority for the statement that the popocratic and populist platforms will have a new plank next fall. It will read somewhat as follows:

Whereas, The crop of wheat in the United States is said to be unusually large, and,

Whereas, The price of wheat has been advanced by the money power:

Resolved, That the condition of the farmer can never be improved by large crops or large returns for the same, due to the iniquitous machinations and manipulations of Wall street; and,

Resolved, That we view with alarm and denounce with indignation the alleged increase in the production of wheat and the demand for the same; and,

Resolved, That the alleged foreign demand for wheat is indubitably an artificial crisis produced by the Rothschilds; and,

Resolved, That the wheat crop and the price of wheat cannot be increased or made normal by natural and honest means until the free coinage of silver at the ratio of 16 to 1 has stimulated nature, boomed prices, and relieved the downtrodden farmer from the clutch of the usurer and the money shark.

Resolved, That in the present condition of things large crops and large prices for the same are an outrage and a curse, and a distinct insult to the popocrats and populists.

A full-blooded democratic organ suggests that "the reason Secretary Gage visited Gray Gables was to take counsel on money matters." Our contemporary must think Gage is arranging for "a deficit," and to sell bonds to London.

CURRENT NOTE AND COMMENT.

Silver touched the lowest price in its history last week.

Wheat continues to advance in price notwithstanding the fact that silver continues to fall.

The mercury at Clondyke reached 97 above this summer and 72 below last winter. It is in order to praise our own climate for uniformity and moderation.

Recent reports from Mexico show that the fall in the value of silver is creating great business disturbances there, and may lead to the adoption of the gold standard.

The discovery of gold in California was followed by years of unusual business prosperity. Our neglected territory of Alaska promises to confer similar favor on the country.

Some of the pundits are worrying about what will happen if the supply of gold should exceed the demand. This is one of the questions that may safely be referred to posterity.

The House sugar rate is written in the tariff bill, not the corruptly purchased senate rate. It is a great victory for right, for justice, and for the people.—New York World (Democratic).

The Clondyke diggings are less than a thousand miles from the North Pole. If there is gold beyond the Yukon the argonauts may be the first to reach the point that has defied other explorers.

The country learned to value a McKinley tariff after losing it through political error and neglect. Again we have a McKinley tariff, and the people will be slow to vote away the prosperous times it will bring.

The discovery of a large lake of petroleum in Alaska comes along with a greatly increased excitement about gold deposits in the territory. Not many Americans are so sorry that we annexed Alaska.

The battle-ship Oregon, which is going to Hawaii, has a total armament of forty-six guns and six torpedo tubes. She is 348 feet long, has 18 inches of armor on the sides, and carries a crew of 424 men.

The first week under the new tariff law shows a marked improvement in business all over the country, not only in manufactures, but in business confidence and general activity. Reports from every direction show a general improvement.

The sugar trust is not wholly happy. The Dingley law deprived it of the special advantages which it had enjoyed under the Wilson law, and now the farmers of the United States are preparing to raise beets for the sugar of the country and refine it in the factories where the sugar is made.

The treasury receipts during the first few months of the operations of the Dingley law will probably be light because of the enormous quantities of foreign goods which were brought into the country during the months in which the democrats and populists held the Dingley bill up in the senate.

While W. J. Bryan is wandering all over the Union shouting "calamity" and "no hope of prosperity" his neighbors in Nebraska are gathering in and arranging for the biggest harvest and the largest clear gain in money, and good money, that they have had in a decade. Nebraska will pay more debts from money earned this year than she ever paid before in any single year.

American wool-growers are likely to gain some advantages in prices through the great reduction in the supply of Australian wool which must ensue from the shortage of the pasturage in the great wool-producing area of that country. Australian sheep are reported starving to death in large numbers, and others are being slaughtered for their skins, so that it is estimated that one-half of the usual wool clip of that country will be sacrificed in this way. As last year's clip amounted to 643,000,000 pounds, the effect of this will be very materially felt.

The silver wing of the democratic party is very much depressed by the developments in the various states in which campaigns are in prospect. In every one of these states, gold democrats are actively at work preparing to run tickets of their own, and the preliminary work which has been done indicates that a much larger percentage of the democracy will ally itself with the sound-money men this time than was the case last year. Many democrats, who last fall felt bound to support the national ticket and platform, will this year co-operate with the sound-money men of the party.

Merit

Is what gives Hood's Sarsaparilla its great popularity, its constantly increasing sales, and enables it to accomplish its wonderful and unequalled cures. The combination, proportion and process used in preparing Hood's Sarsaparilla are unknown to other medicines, and make Hood's Sarsaparilla

Peculiar to Itself

It cures a wide range of diseases because of its power as a blood purifier. It acts directly and positively upon the blood, and the blood reaches every nook and corner of the human system. Thus all the nerves, muscles, bones and tissues come under the beneficent influence of

Hood's Sarsaparilla

The One True Blood Purifier. \$1 per bottle.

Hood's Pills cure Liver Ills; easy to take, easy to operate. 25c.

All the routes yet opened to the Clondyke mines are over United States territory, the trade comes to our merchants, and the gold to our mints. The Canadians will not find it easy to reverse the current.

The population of Japan is increasing rapidly and the people at the same time are increasing the average consumption of wheat per person. At the present time they eat only one-tenth as much wheat per person as the people of the United States. The restricted area of the Japanese empire makes it plain that they cannot long continue to increase their home production of wheat. If the population continues to increase and at the same time to use an increasing proportion of wheat, the imports of wheat into that country must become large. The very rapid growth of manufacturing and commerce in Japan will naturally accelerate the acquirement of wheat-eating habits in that country.

STATE OF OHIO, CITY OF TOLEDO, ss.

LUCAS COUNTY.

Frank J. Cheney makes oath that he is the senior partner of the firm of F. J. Cheney & Co., doing business in the city of Toledo, county and state aforesaid, and that said firm will pay the sum of ONE HUNDRED DOLLARS for each and every case of Catarrh that cannot be cured by the use of Hall's Catarrh Cure.

Sworn to before me and subscribed in my presence, this 6th day of December, A. D. 1906.

A. W. GLEASON, Notary Public.

Hall's Catarrh Cure is taken internally and acts directly on the blood and mucous surfaces of the system. Send for testimonials, free.

F. J. CHENEY & CO., Toledo, O.

Sold by druggists, 75c.

If it is true, as reported, that the independent American and Canadian surveys for the purpose of marking the exact boundary line between Alaska and the Canadian Northwest agree within a few feet, there is one prolific source of contention happily avoided. The boundary line is coincident with the 141st meridian of longitude.

When an innocent man is jailed by mistake, he prefers to come out the same way he went in. He may break jail and be caught and put back again. He'd rather be the door unlocked and walk out and stay out.

A sick man is a prisoner in the jail of disease; he has gone in by some door of carelessness or neglect or irregular living, and he must unlock this same door by careful, sensible habits if he wants to be a free, well man again. If dyspepsia and biliousness or constipation is the way he got into disease, he has got to overcome just those troubles before he can get out. The majority of diseases begin with some trouble of the digestive organs or of the liver, which prevents the supply of proper nourishment to the system. The best remedy for these troubles is Dr. Pierce's Golden Medical Discovery, because it gives the digestive and blood-making organs power to assimilate food and transform it into pure, nourishing blood, vitalized with an abundance of red corpuscles. It acts directly upon the liver and gives it capacity to filter all bilious impurities out of the circulation. It builds up solid, muscular flesh and healthy nerve-force. In obstinate constipation the "Discovery" should be used in conjunction with Dr. Pierce's Pleasant Pellets, the most natural and thoroughly scientific laxative ever devised. The "Pellets" regulate and invigorate the stomach, liver and bowels. One is a gentle laxative; two act as a mild cathartic.

My wife had suffered for seven years with dyspepsia, sick headache and constipation. Mr. Alonso D. Jameson of DuPont, W. Va., writes: "We tried many doctors and many kinds of medicine, but all were of no avail. We purchased six bottles of your 'Golden Medical Discovery,' which together with the 'Pleasant Pellets' has entirely restored my wife's health. We cannot say enough in praise of you for these valuable medicines."

A Sure Thing

Is what all are looking for in **GROCERIES**

Most people would rather trade where they know they will get a good article at the lowest living figure, and one which when delivered at your door is ready to use, is just what it was represented to be when sold, is full weight and full measure, rather than to have a lingering conviction that you need a house scales, an analyzing microscope, or a blue room in which you can retire and swear in order to get even with your grocer.

THIS EXPENSE IS SAVED

if you trade with us. Our idea of the grocery business is **BEST SERVICE POSSIBLE AT LOWEST FIGURES.** Not to secretly cut weights and measures down, make slight reduction in price as a bait, and yet skin the customer on the measure he gets. Such methods bring sure defeat.

VITAE ORE. Nature's Remedy

Many prominent physicians use it in their practice extensively. Pestilence, famine and war have done less to depopulate the earth than quack nostrums. Vitae Ore is as far above anything man can make as the sun of a tallow dip.

Read about it and bless the day you tried it. Those who want some ailment to constantly complain of have no more use for V. O. than the devil has for holy water.

Vitae Ore cures all kidney complaints, blood poisoning, diphtheria, dyspepsia, female complaints, rheumatism, piles, old sores, bruises, burns, erysipelas, chilblains, ulcers, ring worm, all skin diseases, typhoid and malarial fevers, etc., etc. It is the best blood purifier on earth, the greatest disease germ destroyer known, and yet is perfectly harmless under protracted use. Oh, suffering woman! treat yourself, be cured and enjoy life by using V. O. WHEN YOU HAVE tried every patent medicine, quack nostrum, catch-penny humbug and doctors, without relief, and want to be cured—that if you believe God is greater than man, that His creations are better and more perfect than man's, buy this great natural remedy.

Buy none not stamped with the red ink signature of Theo. Noel, or if the envelope has been opened. Sold only on direct orders or through local agents.

It has been the desideratum of scientists for ages where to procure the mineral ore from whence flows the waters of the world's most noted healing mineral springs, and in the discovery of this ore the problem has been solved. In the deep from whence it comes it is a hard, black and very magnetic mineral, when exposed to the air it cracks, and 20 per cent. of it is then soluble in water—being an elixir which for the CURE of so called incurable ailments, as bright's disease, kidney and urinary complaints, general debility, loss of vitality, womb, ovarian, neural troubles and lost manhood, all private diseases, as also all throat and stomach complaints, as diphtheria, tonsillitis, catarrh, dyspepsia. Nothing man can make equals it. Nature cannot be counterfeited. Vitae Ore will reach the nidus of every ill. We go on no theory of practice or dogma. Only the howling ethical quack who lives on the prolongation of human ills more than by curing them cries fraud against V. O. If you suffer from any ill you need O. V. worse than I need your money.

The evidence herein given will convince any one who is not made up of tricks and fraud, and such we want nothing to do with. If you will persist in galloping to the grave by devouring poisonous drugs and nostrums have mercy on innocent children.

The position of V. O. is impregnable, has come to stay. We neither make nor ask concession. It is the marvel of the century. Theo. Noel, the discoverer, is the greatest benefactor of the age.

**W. G. ROBBINS, General Agent,
Whiteson, Oregon.**
